Androids Chet Haase,2022-07-19 The fascinating inside story of how the Android operating system came to be. In 2004, Android was two people who wanted to build camera software but couldn't get investors interested. Today, Android is a large team at Google, delivering an operating system (including camera software) to over 3 billion devices worldwide. This is the inside story, told by the people who made it happen. Androids: The Team that Built the Android Operating System is a first-hand chronological account of how the startup began, how the team came together, and how they all built an operating system from the kernel level to its applications and everything in between. It describes the tenuous beginnings of this ambitious project as a tiny startup, then as a small acquisition by Google that took on an industry with strong, entrenched competition. Author Chet Haase joined the Android team at Google in May 2010 and later recorded conversations with team members to preserve the early days of Android's history leading to the launch of 1.0. This engaging and accessible book captures the developers' stories in their own voices to answer the question: How did Android succeed?

Every Last Drop Michelle Mulder,2015-04-01 In the developed world, if you want a drink of water you just turn on a tap or open a bottle. But for millions of families worldwide, finding clean water is a daily challenge, and kids are often the ones responsible for carrying water to their homes. Every Last Drop looks at why the world's water resources are at risk and how communities around the world are finding innovative ways to quench their thirst and water their crops. Maybe you're not ready to drink fog, as they do in Chile, or use water made from treated sewage, but you can get a low-flush toilet, plant a tree, protect a wetland or just take shorter showers. Every last drop counts!

The Yellow Wallpaper & Herland Charlotte Perkins Gilman,2021-06-24 Charlotte Perkins Gilman's progressive views on feminism and mental health are powerfully showcased in her two most famous stories. The Yellow Wallpaper skillfully charts one woman's struggle with depression whilst Herland is an entertaining imagining of an all female utopia. Part of the Macmillan Collector's Library; a series of stunning, clothbound, pocket-sized classics with gold foiled edges and ribbon markers. These beautiful books make perfect gifts or a treat for any book lover. This edition is introduced by journalist and author Lucy Mangan. Confined to her attic bedroom and isolated from her newborn baby, the nameless narrator of The Yellow Wallpaper keeps a secret diary in which she records the sprawling and shifting patterns of the room's lurid yellow wallpaper as she slowly sinks into madness. This chilling story is based on the author's own experience of depression. In Herland, a trio of men set out to discover an all-female community rumoured to be hidden

deep in the jungle. What they find surprises them all; they're captured by women who, for two thousand years, have lived in a peaceful and prosperous utopia without men.

**Do Angels Live in Trees?** Crystal Lee,2002-03 Do Angels Live in Trees? could not be more timely! Millions of people suffer from scars of childhood and emotional trauma inflicted by others. Too little emphasis is placed on those who are seen as not important to society. This story unravels with the mind of the child wrapping herself in fantasy and visions of angels who live in trees. This is her way of survival and teaches how faith and determination can change one's life. This book will open eyes to see the deep hurt and needs of the unwanted child. Do Angels Live in Trees may be cross-referenced in several ways. It not only provides spiritual undertones but also addresses child abuse issues. Readers who have concerns for the welfare of children will find it most entertaining and enlightening. It could also easily fit into the self-help category. It is a true biography of the author. The general population will find this book full of intrigue, hope, and a determination to survive, no matter how difficult the circumstances.

*Midnight, Water City* Chris McKinney,2021-07-13 Hawai'i author Chris McKinney's first entry in a brilliant new sci-fi noir trilogy explores the sordid past of a murdered scientist, deified in death, through the eyes of a man who once committed unspeakable crimes for her. Year 2142: Earth is forty years past a near-collision with the asteroid Sessho-seki. Akira Kimura, the scientist responsible for eliminating the threat, has reached heights of celebrity approaching deification. But now, Akira feels her safety is under threat, so after years without contact, she reaches out to her former head of security, who has since become a police detective. When he arrives at her deep-sea home and finds Akira methodically dismembered, this detective will risk everything—his career, his family, even his own life—and delve back into his shared past with Akira to find her killer. With a rich, cinematic voice and burning cynicism, *Midnight, Water City* is both a thrilling neo-noir procedural and a stunning exploration of research, class, climate change, the cult of personality, and the dark sacrifices we are willing to make in the name of progress.

Bodies and Bows Elizabeth Penney,2021-03-30 Bodies & Bows is the third in the charming cozy Iris Buckley mystery series set in an apron shop in Maine—Elizabeth Penney will have you on pins and needles... *Mr. Bloomfield's Orchard* Nicholas P. Money,2002-10-17 Stinkhorns, puffballs, the corpse finder, deadly galerina, Satan's bolete, birch conks, black mold, the old man of the woods--the world of fungi is infinitely varied and not a little weird. Now, in Mr. Bloomfield's Orchard, Nicholas Money

introduces readers to a dazzling array of fungi, from brewer's yeast and Penicillium to the highly lethal death cap. This is an entertaining book that also provides a solid introduction to the biology of fungi as well as much insight into how scientists study fungi in the lab and in the field. Readers will be intrigued by the many exotic fungi discussed. One fungus in Oregon, for instance, covers 2,000 acres and is now considered the world's largest organism. We learn of *Madurella*, which can erode bones until they look moth-eaten; *Cordyceps*, which wracks insects with convulsions, kills them, then sends a stalk out of the insect's head to release more infectious spores; and *Claviceps*, the poisonous ergot fungus, which causes hallucinations (the women charged with demonic possession in Salem in 1691 may have been victims of ergot consumption). Money also showcases the lives of famed mycologists--including Reginald Buller who wore horse blinders as he walked to work, the better to study luminescent fungi in his dark lab, and Charles Tulasne, the Audubon of fungi, whose illustrations of specimens border on art. And he recounts his own childhood introduction to fungi in Mr. Bloomfield's orchard, where trees and fruit were devoured by a rogue's gallery of bitter rot, canker, rust, powdery mildew, rubbery wood, and scab. Told with a refreshing sense of humor, Mr. Bloomfield's Orchard will fascinate anyone interested in the natural world.

New York Times bestselling author Michael Grant says *Not a Drop to Drink* is a debut not to be missed. With evocative, spare language and incredible drama, danger, and romance, Mindy McGinnis depicts one girl's journey in a frontierlike world not so different from our own. Teenage Lynn has been taught to defend her pond against every threat: drought, a snowless winter, coyotes, and most important, people looking for a drink. She makes sure anyone who comes near the pond leaves thirsty—or doesn't leave at all. Confident in her own abilities, Lynn has no use for the world beyond the nearby fields and forest. But when strangers appear, the mysterious footprints by the pond, nighttime threats, and gunshots make it all too clear Lynn has exactly what they want, and they won't stop until they get it. . . . For more in this gritty world, join Lynn on an epic journey to find home in the companion novel, *In a Handful of Dust*.
