The Adventures of Droppy Uzen Rencuzogullari,2015-06-24 Adventures of Droppy is the first of the picture book series that takes the young children of ages 5 and up to different adventures of Droppy, the water drop In this first book, Droppy meets with drops of different liquids, like milk and honey. He wants to mix with them to get big. He may not be successful in every try, but he found a solution that gets all drops together. Different liquids with different densities will not mix. They can create layers of liquids when they are put on top of each other. Liquids with different densities, is an

interesting and fun experiment for people of all ages. The experiment can be implemented with different liquids, such as, milk, water, oil, honey or molasses. Use clear cups, or tubes for observation First, try to see how water mixes with milk. Then, slowly add the other liquids you found at home, last observe how liquids move to take their places according to their densities. I have a BS degree in physics. After I had my three children, I wanted to learn more about young children and got my associate degree in Early Childhood Development. Currently I am working on my Fine Art Degree at a local college.
