Aliza S. Wong

Spaghetti Westerns Aliza S. Wong, 2018-12-15 This book identifies the most significant Spaghetti Westerns produced and the individuals who contributed to the genre, including actors Clint Eastwood, composers such as Ennio Morricone, and directors like Sergio Leone. The most memorable movies of the genre are also examined, including Django, A Fistful of Dollars, and They Call Me Trinity.

Classic Movie Fight Scenes Gene Freese, 2017-10-05 Both brawls and elaborate martial arts have kept movie audiences on the edges of their seats since cinema began. But the filming of fight scenes has changed significantly through the years--mainly for the safety of the combatants--from improvised scuffles in the Silent Era to exquisitely choreographed and edited sequences involving actors, stuntmen and technical experts. Camera angles prevented many a broken nose. Examining more than 300 films--from The Spoilers (1914) to Road House (1989)--the author provides behind-the-scenes details on memorable melees starring such iconic tough-guys as John Wayne, Randolph Scott, Robert Mitchum, Lee Marvin, Charles Bronson, Clint Eastwood, Bruce Lee, Chuck Norris and Jackie Chan.

Lights and Sirens Kevin Grange, 2015-06-02 A true account of going through UCLA's famed Daniel Freeman Paramedic Program—and practicing emergency medicine on the streets of Los Angeles. Nine months of tying tourniquets and pushing new medications, of IVs, chest compressions, and defibrillator shocks—that was Kevin Grange's initiation into emergency medicine when, at age thirty-six, he enrolled in the "Harvard of paramedic schools": UCLA's Daniel Freeman Paramedic Program, long considered one of the best and most intense paramedic training programs in the

world. Few jobs can match the stress, trauma, and drama that a paramedic calls a typical day at the office, and few educational settings can match the pressure and competitiveness of paramedic school. Blending months of classroom instruction with ER rotations and a grueling field internship with the Los Angeles Fire Department, UCLA's paramedic program is like a mix of boot camp and med school. It would turn out to be the hardest thing Grange had ever done—but also the most transformational and inspiring. An in-depth look at the trials and tragedies that paramedic students experience daily, *Lights and Sirens* is ultimately about the best part of humanity—people working together to help save a human life.

Global Corruption Report: Sport Transparency International, 2016-02-05 Sport is a global phenomenon engaging billions of people and generating annual revenues of more than US\$ 145 billion. Problems in the governance of sports organisations, fixing of matches and staging of major sporting events have spurred action on many fronts. Yet attempts to stop corruption in sport are still at an early stage. The Global Corruption Report (GCR) on sport is the most comprehensive analysis of sports corruption to date. It consists of more than 60 contributions from leading experts in the fields of corruption and sport, from sports organisations, governments, multilateral institutions, sponsors, athletes, supporters, academia and the wider anti-corruption movement. This GCR

provides essential analysis for understanding the corruption risks in sport, focusing on sports governance, the business of sport, planning of major events, and match-fixing. It highlights the significant work that has already been done and presents new approaches to strengthening integrity in sport. In addition to measuring transparency and accountability, the GCR gives priority to participation, from sponsors to athletes to supporters an essential to restoring trust in sport.

Perception, Design and Ecology of the Built Environment Mainak Ghosh, 2020-01-24 This edited volume is a compilation of the 'built environment' in response to many investigations, analyses and sometimes mere observations of the various dialogues and interactions of the built, in context to its ecology, perception and design. The chapters concentrate on various independent issues, integrated as a holistic approach, both in terms of theoretical perspectives and practical approaches, predominantly focusing on the Global South. The book builds fabric knitting into the generic understanding of environment, perception and design encompassing 'different' attitudes and inspirations. This book is an important reference to topics concerning urbanism, urban developments and physical growth, and highlights new methodologies and practices. The book presumes an understanding unearthed from various dimensions and again woven back to a common theme, which emerges as the reader reads through. Various international experts of the respective fields working on the Global South contributed their latest research and insights to the different parts of the book. This trans-disciplinary volume appeals to scientists, students and professionals in the fields of architecture, geography, planning, environmental sciences and many more.

Butterfly Yusra Mardini, 2018-05-03 The inspirational story behind the film The Swimmers on Netflix, by Syrian refugee and Olympic swimmer, Yusra Mardini. 'An extraordinary tale of bravery, survival, and winsome, never-give-up moxie. It is impossible not to be won over by Yusra.' - Khaled Hosseini It's important the world understands what many ordinary people must endure to find a safe place to live. If it will help others, I'll tell my story a million times. When war broke out in her native Syria, Yusra Mardini fled to the Turkish coast in 2015 and boarded a small dinghy full of refugees bound for Greece. When the small and overcrowded boat's engine cut out, it began to sink.

Instinctively, Yusra and her sister took to the treacherous open water and guided the boat for three and a half hours, helped by two other refugees, until they eventually landed on Lesbos, saving the lives of the passengers aboard. Butterfly is the story of that remarkable woman, whose journey started in a war-torn suburb of Damascus and took her through Europe to Berlin and from there to the Olympic Games in Rio de Janeiro and Tokyo. Yusra Mardini is an athlete, one of People magazine's twenty-five women changing the world, on the list of TIME Magazine's most influential teens, and one of the the youngest UNHCR Goodwill Ambassadors. Yusra's and her sister Sara's story is the subject of a major Netflix film documenting her life, written by Jack Thorne. Yusra and Sara were also part of TIME Magazine's 100 most influential people of 2023. Now with an updated afterword.

The Olympic Textbook of Science in Sport Ronald J. Maughan, 2008-12-15 This new volume in the Encyclopaedia of Sports Medicine series, published under the auspices of the International Olympic Committee, delivers an up-to-date, state of the art presentation of the scientific aspects of conditioning, injury prevention, and competition. The book covers the key areas of scientific knowledge in sport and is divided into: physiology and biochemistry; nutrition; anthropometry; immunology; cell biology; biomechanics, engineering and ergonomics; psychology; pharmacology; limitations to performance; special populations; and exercise and health. Presented in a clear style and format, The Olympic Textbook of Science in Sport, draws on the expertise of an international collection of contributors who are recognized as leaders in their respective fields. It will be indispensable for all sport scientists and medical doctors who serve athletes and sports teams and is an invaluable reference for students of sport and exercise science.

Nutrition in Sport Ronald J. Maughan, 2008-04-15 As sports have become more competitive

over recent years researchers and trainers have been searching for new and innovative ways of improving performance. Ironically, an area as mundane as what an athlete eats can have profound effects on fitness, health and ultimately, performance in competition. Sports have also gained widespread acceptance in the therapeutic management of athletes with disorders associated with nutritional status. In addition, exercise has been one of the tools used for studying the control of metabolism, creating a wealth of scientific information that needs to be placed in the context of sports medicine and science. Nutrition in Sport provides an exhaustive review of the biochemistry and physiology of eating. The text is divided into three sections and commences with a discussion of the essential elements of diet, including sections on carbohydrates, proteins, fats, vitamins and trace elements, and drugs associated with nutrition. It also discusses athletes requiring special consideration, including vegetarians and diabetics. The second section considers the practical aspects of sports nutrition and discusses weight control (essential for sports with weight categories and athletes with eating disorders), the travelling athlete (where travel either disrupts established feeding patterns or introduces new hazards), environmental aspects of nutrition (including altitude and heat), and the role of sports nutritional products.
