Impersonal Influence Diana C. Mutz,1998-11-28 This book is about how people are affected by their perceptions of the collective opinions of others.

Breaking Cardinal Rules Katina Powell ,Dick Cady,2015-10-02 An expose of sexual recruiting tactics from the journal pages of an escort queen. Breaking Cardinal Rules is an exposé by escort Katina Powell based on her experiences providing sexual services for the basketball program at the University of Louisville. It is written with Pulitzer Prize-winning investigative journalist Dick Cady. Powell has filled five journals with details of her escort escapades, sexual encounters and her activities at the University of Louisville. Most of the U of L services she provided took place in the men's dormitory where most of the basket players reside. Her main contact and the man with the money—the school's former director of basketball operations and former graduate assistant, Andre McGee—kept Powell and her girls busy from 2010 to 2014. Powell does not present a sympathetic character. Her life is full of contradictions. She has no remorse over the choices she has made. Her story is true in all its graphic detail. If you think you've heard seamy tales about recruiting before, wait till you get a load of this. The Louisville high command has vowed to take the matter very seriously. It should. -Mike Lopresti, retired USA Today sports columnist

Made From Scratch Kent Taylor,2021-08-24 * An Instant Wall Street Journal Bestseller * From founder Kent Taylor, the incredible made-from-scratch success story of Texas Roadhouse. In Made From Scratch, the late business maverick Kent Taylor tells the legendary story of Texas Roadhouse and in the process reveals its recipe for success: embracing unorthodox business practices. Because isn't it a little unusual for a company to do almost no advertising? Is it wild to give away free peanuts and rolls and keep prices low, even as costs rise, or to keep the menu basically the same since it opened? Does it fly in the face of reason to prohibit coats and ties at headquarters and to have a CEO who dressed like he was part of the landscaping crew? These business practices might be unconventional, but for Kent and Texas Roadhouse, they worked. What Kent and his Roadies cooked up is an island of misfits who are cool with being different. They love to have fun, but are serious about following meticulous recipes to serve up hand-cut steaks, fall-off-the-bone ribs, made-from-scratch sides, ice-cold beer, and irresistible fresh-baked bread. It's Legendary Food, Legendary Service, the Texas Roadhouse way. To show how this company became a staple of American dining and survived a once-in-a-lifetime pandemic, Kent took a trip back in time to offer the lessons learned from his pathbreaking life, revealing how a distracted kid from Louisville, Kentucky, created anything worthwhile at all.

Take 2 Leeza Gibbons,2013 Offers inspiration and advice for women based on the author's own experiences about how to cope with change and unexpected challenges in life and adopt strategies for finding personal success.

The Political Regulation Wave Shiran Victoria Shen,2022-03-31 Why has there been uneven success in reducing air pollution even in the same locality over time? This book offers an innovative theorization of how local political incentives can affect bureaucratic regulation. Using empirical evidence, it examines and compares the control of different air pollutants in China-an autocracy-and, to a lesser extent, Mexico-a democracy. Making use of new data, approaches, and techniques across political science, environmental sciences, and engineering, Shen reveals that local leaders and politicians are incentivized to cater to the policy preferences of their superiors or constituents, respectively, giving rise to varying levels of regulatory stringency during the leaders' tenures. Shen demonstrates that when ambiguity dilutes regulatory effectiveness, having the right incentives and enhanced monitoring is insufficient for successful policy implementation. Vividly explaining key phenomena through anecdotes and personal interviews, this book identifies new causes of air pollution and proposes timely solutions. This title is also available as Open Access on Cambridge Core.

Sole Survivor Holly Dunn,2017-11-07 A memoir of hope, healing, and survival, sure to resonate with fans of Jaycee Dugard's A Stolen Life and Elizabeth Smart's My Story. On August 28, 1997, just as she was starting her junior year at the University of Kentucky, Holly Dunn and her boyfriend, Chris Maier, were walking along railroad tracks on their way home from a party when they were attacked by notorious serial killer Angel Maturino Reséndiz, aka The Railroad Killer. After her boyfriend is beaten to death in front of her, Holly is stabbed, raped, and left for dead. In this memoir of survival and healing from a horrific true crime, Holly recounts how she lived through the vicious assault, helped bring her assailant to justice, and ultimately found meaning and purpose through service to victims of sexual assault and other violent crimes. She has worked as a motivational speaker and activist and founded Holly's House, a safe and nurturing space in her hometown of Evansville, Indiana.

Communication and Democracy Maxwell E. McCombs,Donald L. Shaw,David H. Weaver,2013-11-05 Exciting intellectual frontiers are open for exploration as agenda-setting theory moves beyond its 25th anniversary. This volume offers an intriguing set of maps to guide this exploration over the near future. It is intended for those who are already reasonably well read in the research literature that has accumulated since the publication of McCombs and Shaw's original 1972 Public Opinion Quarterly article. This piece of literature documented the influence of the news media agenda on the public agenda in a wide variety of geographic and social settings, elaborated the characteristics of audiences and media that enhance or diminish those agenda-setting effects, and cataloged those exogenous factors explaining who sets the media's agenda. In the current volume, a provocative set of maps for explicating new levels of agenda-setting theory have been sketched by a new generation of young scholars, launching an enterprise that has significant implications for theoretical research and for the day-to-day role of mass communication in democratic societies. At the first level of agenda setting are agendas of objects--the traditional domain of agenda setting research--represented by an accumulation of hundreds of studies over the past quarter century. At the second level of agenda setting are agendas of attributes--one of the new theoretical frontiers whose aspects are discussed in detail in the opening chapters. Other chapters offer maps of yet other theoretical frontiers, including political advertising agendas and their impact on behavior, the framing of various agendas in the mass media and the differential impact of print and TV, the theoretical role of individual differences in the agenda-setting influence of the news media on the public agenda, methodological advances for determining cause and effect roles in agenda-setting, and the application of agenda-setting theory to historical analysis. This volume is an invitation to others to become active members of the invisible college of agenda-setting scholarship. As such, the goals of this book are threefold: * to introduce a broad set of ideas about agenda-setting; * to enrich the exploration of these ideas by enhancing scholarly dialogue among the members of this invisible college; and * to enhance the discussion of agenda-setting research in seminars and research groups

around the world. Agenda-setting has remained a vital and productive area of communication research over a quarter century because it has continued to introduce new research questions into the marketplace of ideas and to integrate this work with other theoretical concepts and perspectives about journalism and mass communication. Understanding the dynamics of agenda-setting is central to understanding the dynamics of contemporary democracy. This book's set of theoretical essays, grounded in the accumulated literature of agenda-setting theory and in the creative insights of young scholars, will help lead the way toward that understanding.

The Power of Divine Timing Joy Yascone Elms, 2018-11-19 The secret to success in every endeavor is timing. What Divine Time are you on now? Take a look inside to find out! This is The Power of Divine Timing 2019! The Power of Divine Timing 2019 is an annual astrological guide and method that helps readers to nurture the correct source at the right time to create desired results based on astrological timing. You've heard the term, "have an attitude of gratitude"; but how can you be gracious if you can't see the blessings, you're supposed to be grateful for? Indeed, sometimes we have starved the blessings so much, it's as if they do not exist, or they have simply withered and died. That's sad; right? Humans tend to naturally feed the wrong source, challenges. You may also know that whatever we feed, whatever we nurture, grows stronger. You hear this time and time again from wise and prophetic teachers: "Live in the moment." How do you do that when you don't know what moment you're in—or where to place your intention and energy? That's where The Power of Divine Timing 2019 comes in! This is The Power of Divine Timing 2019—the technique that locates your specific, personal Universal blessings and challenges in real time and simply teaches you how to starve your challenges and to nurture and grow your blessings! The question then becomes: what happens to something that starves? It cannot exist without a source of energy feeding it. So, this, simply put, means you can starve your challenges to death until they have no power to survive and wreak havoc in your life. For, what I have intrinsically found is that when you focus on the blessings in your life, solutions for life's challenges can be found there. It's really quite easy. Each chapter focuses on the planet's current transits and movements, how they affect each astrological sign from the perspective of Challenges, Blessings, Change, and how to approach your current chart utilizing The Power of Divine Timing Technique. You should read both your Sun and rising sign. As you get familiar with this year's challenges and apparent Universal Blessings, you can start to nurture the right source. As you nurture the correct source, you will notice your life shifting, the challenges diminishing, and the blessings increasing. I have included exercises and suggestions for each of the astrological signs, and transits, to assist you in nurturing the right source.

Heat Wave 3: The Dinosaur Apocalypse Has Begun Wayne Kyle Spitzer, 2019-09-25 The exciting all-new prequel series to Flashback and Dinosaur Apocalypse ... "We're going to get to the bottom of this, all of it, believe me," the President was saying, gesturing as he spoke—his large frame swaying slightly—just like on TV. "And we're going to win it. It might take time ... but we're going to win it. Believe me. We always win." He paused for a moment as the lead Secret Service agent—Halverson was his name, Agent Halverson—handed him a cup of water. "For one, we've got something the animals don't have. Which is our incredible men and women of law enforcement." He gestured at the surviving State Trooper and then at the soldiers. "Not to mention our armed forces, some of whom are with us right now." Everyone clapped—albeit briefly. "It's hard. So hard. What has happened is so terrible. So many people have disappeared—while others have fallen victim to these—these animals. People are saying they're dinosaurs. I don't know. I think they're dinosaurs. And they're horrible, so horrible. They're eating people alive. I've seen this, and I've sort of witnessed it—in fact, in two cases I have actually witnessed it."

Death on Base Anita Belles Porterfield, John Porterfield, 2015-05-15 When Army psychiatrist Nidal Hasan walked into the Fort Hood Soldier Readiness Processing Center and opened fire on soldiers within, he perpetrated the worst mass shooting on a United States military base in our country's history. Death on Base is an in-depth look at the events surrounding the tragic mass murder that took place on November 5, 2009, and an investigation into the causes and influences that factored into the attack. The story begins with Hasan's early life in Virginia, continues with his time at Fort Hood, Texas, covers the events of the shooting, and concludes with his trial. The authors analyze Hasan's connections to radical Muslim cleric Anwar al-Awlaki and Al Qaeda in the Arabian Peninsula (AQAP) and demonstrate how radical Islam fueled Hasan's hatred of both the American military and the soldiers he treated. Hasan's mass shooting is compared with others, such as George Hennard's shooting rampage at Luby's in Killeen in 1991, Charles Whitman at the University of Texas, and Virginia Tech shooter Seung-Hui Cho. The authors explore the strange paradox that the shooting at Fort Hood was classified as workplace violence rather than a terrorist act. This classification has major implications for the victims of the shooting who have been denied health benefits and compensation.

The Encyclopedia of Louisville John E. Kleber, 2014-07-11 With more than 1,800 entries, The Encyclopedia of Louisville is the ultimate reference for Kentucky's largest city. For more than 125 years, the world's attention has turned to Louisville for the annual running of the Kentucky Derby on the first Saturday in May. Louisville Slugger bats still reign supreme in major league baseball. The city was also the birthplace of the famed Hot Brown and Benedictine spread, and the cheeseburger made its debut at Kaelin's Restaurant on Newburg Road in 1934. The Happy Birthday had its origins in the Louisville kindergarten class of sisters Mildred Jane Hill and Patty Smith Hill. Named for King Louis XVI of France in appreciation for his assistance during the Revolutionary War, Louisville was founded by George Rogers Clark in 1778. The city has been home to a number of men and women who changed the face of American history. President Zachary Taylor was reared in surrounding Jefferson County, and two U.S. Supreme Court Justices were from the city proper. Second Lt. F. Scott Fitzgerald, stationed at Camp Zachary Taylor during World War I, frequented the bar in the famous Seelbach Hotel, immortalized in *The Great Gatsby*. Muhammad Ali was born in Louisville and won six Golden Gloves tournaments in Kentucky.

A Doctor in the House Candy Carson, 2016 While most people think of Dr. Carson as a trailblazing neurosurgeon and an outspoken conservative, Candy, his wife of 40 years, knows him as so much more: a loving husband, a devoted father, a devout Christian, and a patriot. With her new book, Candy Carson introduces America to a man equally remarkable in his private life as he is in public. Above all, she shows us Dr. Carson as a believer: in God, in family, and in America.

Journalism Jim Willis, 1989-12-06 A necessity for the professional journalist's library, Journalism: State of the Art will prove a valuable resource for the student journalist as well. This book summarizes some 200 media studies many from the most prestigious journal in the trade, Journalism Quarterly. In a paraphrased-synthesis format, and using informal terms, the author arranges some of the most interesting studies of the 1980s into eight subject

headings including: Ethics Law, and the Journalist; Advertising in the 1980s; Polling and Precision Journalism; and Predictors of Readership and Viewship. For many years there has been a gap between media researchers and the practicing journalist. Published research about journalism as a discipline may receive attention in the classroom but seldom gets in the newsroom. Viewing the gap between the researcher and practitioner, Willis offers comments from both sides. He surveys nearly 150 news executives on media research and gives an insightful look at what factors cause readers or viewers to pay attention to the news media. From trends in the industry to types of audiences, *Journalism: State of the Art* uses practical research studies presented in an accessible style. Offering the most current data available on media research, this book will prove a great instructional as well as reference tool. It is a must for college journalists, working press, and media marketers.

Heat Wave Eric Klinenberg, 2015-05-06 The "compelling" story behind the 1995 Chicago weather disaster that killed hundreds—and what it revealed about our broken society (Boston Globe). On July 13, 1995, Chicagoans awoke to a blistering day in which the temperature would reach 106 degrees. The heat index—how the temperature actually feels on the body—would hit 126. When the heat wave broke a week later, city streets had buckled; records for electrical use were shattered; and power grids had failed, leaving residents without electricity for up to two days. By July 20, over seven hundred people had perished—twenty times the number of those struck down by Hurricane Andrew in 1992. Heat waves kill more Americans than all other natural disasters combined. Until now, no one could explain either the overwhelming number or the heartbreaking manner of the deaths resulting from the 1995 Chicago heat wave. Meteorologists and medical scientists have been unable to account for the scale of the trauma, and political officials have puzzled over the sources of the city's vulnerability. In *Heat Wave*, Eric Klinenberg takes us inside the anatomy of the metropolis to conduct what he calls a "social autopsy," examining the social, political, and institutional organs of the city that made this urban disaster so much worse than it ought to have been. He investigates why some neighborhoods experienced greater mortality than others, how city government responded, and how journalists, scientists, and public officials reported and explained these events. Through years of fieldwork, interviews, and research, he uncovers the surprising and unsettling forms of social breakdown that contributed to this human catastrophe as hundreds died alone behind locked doors and sealed windows, out of contact with friends, family, community groups, and public agencies. As this incisive and gripping account demonstrates, the widening cracks in the social foundations of American cities made visible by the 1995 heat wave remain in play in America's cities today—and we ignore them at our peril. Includes photos and a new preface on meeting the challenges of climate change in urban centers "Heat Wave is not so much a book about weather, as it is about the calamitous consequences of forgetting our fellow citizens. . . . A provocative, fascinating book, one that applies to much more than weather disasters." —Chicago Sun-Times "It's hard to put down *Heat Wave* without believing you've just read a tale of slow murder by public policy." —Salon "A classic. I can't recommend it enough." —Chris Hayes

Homeland Security James J. F. Forest, 2006-06-30 America is a target; the homeland is under threat. While Americans have been targets of terrorist attacks for quite some time, September 11, 2001, awoke the nation to the reality that we are vulnerable in our homes, our places of work and worship, and our means of public transportation. And yet, we must continue to function as best we can as the world's most vibrant economic and political community. The current threat environment requires greater engagement with the public, as the necessary eyes and ears of the nation's homeland security infrastructure. However, to be effective, the public must be equipped with the knowledge of where and why specific locations and activities may be a terrorist target, what is being done to protect those targets, and how they can help. This three-volume set answers that need. The chapters of each volume of *Homeland Security* revolve around a core of central questions. Are we safer today than we were pre-9/11? What steps have been taken in all these areas to protect ourselves? What are the threats we face, and what new threats have developed since 9/11? Are we staying one step ahead of those who wish to do us harm? In 2002, more than 400 million people, 122 million cars, 11 million trucks, 2.4 million freight cars, and 8 million containers entered the United States. Nearly 60,000 vessels entered the United States at its 301 ports of entry. Clearly the amount of activity this represents will require a long-term commitment to innovation, organizational learning, and public vigilance to complement an already overstretched network of government agencies and security professionals.

The Book of Hidden Things Francesco Dimitri, 2018-07-03 From one of the most significant figures of the last generation of fantasy, comes Francesco Dimitri's debut novel in English, an enthralling and seductive fantasy following four old friends and the secrets they keep. Four old school friends have a pact: to meet up every year in the small town in Puglia they grew up in. Art, the charismatic leader of the group and creator of the pact, insists that the agreement must remain unshakable and enduring. But this year, he never shows up. A visit to his house increases the friends' worry; Art is farming marijuana. In Southern Italy doing that kind of thing can be very dangerous. They can't go to the Carabinieri so must make enquiries of their own. This is how they come across the rumours about Art; bizarre and unbelievable rumours that he miraculously cured the local mafia boss's daughter of terminal leukaemia. And among the chaos of his house, they find a document written by Art, *The Book of Hidden Things*, that promises to reveal dark secrets and wonders beyond anything previously known. Francesco Dimitri's first novel written in English, following his career as one of the most significant fantasy writers in Italy, will entrance fans of Elena Ferrante, Neil Gaiman and Donna Tartt. Set in the beguiling and seductive landscape of Southern Italy, this story is about friendship and landscape, love and betrayal; above all it is about the nature of mystery itself.

THE INDIAN LISTENER All India Radio (AIR), New Delhi, 1943-01-22 The Indian Listener (fortnightly programme journal of AIR in English) published by The Indian State Broadcasting Service, Bombay, started on 22 December, 1935 and was the successor to the Indian Radio Times in English, which was published beginning in July 16 of 1927.
