The Other Sport Mega-Event: Rugby World Cup 2011

StevenJ. Jackson, 2017-07-05 The mention of sport mega-events conjures up images and memories of London 2012 or anticipation of FIFA 2014, the 2016 Rio Olympics and beyond. Indeed, the expanding annual calendar of sport mega-events, both in terms of the bidding process and the actual hosting of the event means that there is rarely time for considered reflection. This is particularly true within the context of neo-liberalism and an obsession with creating world class 'sporting' cities that are propelled by state-private promotional discourses that often silence oppositional voices. This edited collection focuses on Rugby World Cup 2011 in order to examine the contested terrain of one particular sport mega-event with respect to its economic, political and cultural impact both locally and globally. As an event, the 2011 Rugby World Cup was unique in many ways but perhaps the most notable are the nation's remote geographic location and at just over four million people its small population. This anthology addresses how the Rugby World Cup has changed since its inception in 1987 including a major shift in the globalisation of the game, professionalization, player migration and television and sponsorship rights. The core of the anthology explores how the event impacted on various segments of New Zealand society: from the state to regions and individual citizens. Collectively the implications are relevant for all who are interested in sport mega-events whether it is from a political, economic,

scholarly or policy perspective. This book was published as a special issue of Sport and Society.

Systematics Ward C. Wheeler, 2012-06-14

Systematics: A Course of Lectures is designed for use in an advanced undergraduate or introductory graduate level course in systematics and is meant to present core systematic concepts and literature. The book covers topics such as the history of systematic thinking and fundamental concepts in the field including species concepts, homology, and hypothesis testing. Analytical methods are covered in detail with chapters devoted to sequence alignment, optimality criteria, and methods such as distance, parsimony, maximum likelihood and Bayesian approaches. Trees and tree searching, consensus and super-tree methods, support measures, and other relevant topics are each covered in their own sections. The work is not a bleeding-edge statement or in-depth review of the entirety of systematics, but covers the basics as broadly as could be handled in a one semester course. Most chapters are designed to be a single 1.5 hour class, with those on parsimony, likelihood, posterior probability, and tree searching two classes (2 x 1.5 hours).

Annual Report New Zealand Customs Service, 2007

From Leeds to Poole: Sporting Memories 1965-2015

Dr John Davis,

Rugby World Cup Kévin Veyssière, 2023-08-30 How was rugby born in 1823? Why didn't the first Rugby World Cup take place until 1987? Why are there so few «new nations» emerging in the world of rugby? How did the sport establish itself in New Zealand, South Africa, France, Ireland, Fiji, Georgia and Hong Kong? Are women's rugby and the Olympic discipline of 7-a-side rugby opening up new frontiers? Why are the United Arab Emirates, Qatar and Saudi Arabia interested in the sport? Through 50 geopolitical and international questions, Kévin Veyssière invites rugby fans, the curious and budding geographers alike, to discover the genesis and evolution of this sport, so attached to its traditions and long kept out of the spotlight. The book's concise, entertaining approach helps readers to better understand how rugby has become part of the global sports industry over time and across continents, and how it has become a formidable tool for understanding the political,

economic and social changes taking place in the world today. K vin Veyssi re, 31, an expert and professor in the geopolitics of sport, is the founder of the Football Club Geopolitics medium, which has over 70,000 subscribers on social networks. He is already the author of two books (Football Club Geopolitics and Mondial) published by Max Milo.

Cultural Capital and Parental Involvement Siu-hang Kong, 2023-01-12 This book uses Pierre Bourdieu's cultural capital model as a theoretical framework for exploring how students in Beijing and Hong Kong perceive parental influences—their parents' cultural capital and support—on their participation in musical activities. By studying students' perceptions of their parents' cultural capital and support for their musical activities, this book revisits the applicability of Bourdieu's cultural capital model in the contemporary Chinese context and reveals how inequality in terms of parental cultural capital governs parents' support and influences the intergenerational transmission of cultural capital, which in turn contributes to inequality in terms of students' cultural capital.
