The Internet of Things Michael Miller, 2015 The old Internet typically connected personal computers. But a radically new Internet is emerging. Some call it an Internet of Things (IoT) or Internet of Everything (IoE). The IoT won't just connect people: it'll connect smart homes, appliances, cars, aircraft (a.k.a. drones)... offices, factories, cities... the world. By some estimates, the IoE will explode into a \$19 trillion market in just a few years. If that happens... when that happens... it will transform your life. ¿ You need to know what's coming. But, until now, most guides to the Internet of Everything have been written for technical experts. Now, the world's #1 author of beginning technology books has written the perfect introduction for every consumer and citizen. In *The Internet of Things*, Michael Miller reveals how a new generation of autonomously connected smart devices is emerging, and how it will enable people and devices to do more things, more intelligently, and more rapidly. ¿ Miller demystifies every type of smart device, both current and future. Each chapter ends with a special ...and You section, offering up-to-the-minute advice for using today's IoE technologies or preparing for tomorrow's. ¿ You'll also discover the potential downsides and risks associated with intelligent, automatic interaction. When all your devices can communicate with each other (and with the companies that sell and monitor them), how private is your private life? Do the benefits outweigh the risks? And what does a connected world do when the connections suddenly go down? Packed with scenarios and insider interviews, *The Internet of*

Things makes our future utterly, vividly real.

The Internet of Things (IoT) won't just connect people: It will connect "smart" homes, appliances, cars, offices, factories, cities... the world. You need to know what's coming: It might just transform your life. Now, the world's #1 author of beginning technology books has written the perfect introduction to IoT for everyone. Michael Miller shows how connected smart devices will help people do more, do it smarter, do it faster. He also reveals the potential risks—to your privacy, your freedom, and maybe your life. Make no mistake: IoT is coming quickly. Miller explains why you care, helps you use what's already here, and prepares you for the world that's hurtling toward you. --What is IoT? How does it work? How will it affect me? --What's realistic, and what's just hype? --How smart is my "smart TV" really? (And, is it watching me?) --Can smart IoT devices make me healthier? --Will smart appliances ever be useful? --How much energy could I save with a smart home? --What's the future of wearable tech? --When will I have a self-driving car? --When will I have a nearly self-driving car? Grown-ups Never Do That Davide Cali, Benjamin Chaud, 2019-09-10 Forgetting to do chores? Running late? Burping? No adult would ever behave so poorly! At least, that's what you might think. But by the end of this outrageous, laugh-out-loud picture book from celebrated author-illustrator team Davide Cali and Benjamin Chaud, you'll know better. Unbelievable as it may seem, sometimes even grown-ups misbehave! The duo behind Junior Library Guild selection *I Didn't Do My Homework Because . . .* and *A Funny Thing Happened on the Way to School . . .* are back with another relatable, rollicking tale, this time showcasing the humor—and the humanity—of the most important people in kids' lives.

Electric Universe David Bodanis, 2006-02-28 The bestselling author of *E=mc2* weaves tales of romance, divine inspiration, and fraud through an account of the invisible force that permeates our universe—electricity—and introduces us to the virtuoso scientists who plumbed its secrets. For centuries, electricity was seen as little more than a curious property of certain substances that sparked when rubbed. Then, in the 1790s, Alessandro Volta began the scientific investigation that ignited an explosion of knowledge and invention. The force that once seemed inconsequential was revealed to be responsible for everything from the structure of the atom to the functioning of our brains. In harnessing its power, we have created a world of wonders—complete with roller coasters and radar, computer networks and psychopharmaceuticals. In *Electric Universe*, the great discoverers come to life in all their brilliance and idiosyncrasy, including the visionary Michael Faraday, who struggled against the prejudices of the British class system, and Samuel Morse, a painter who, before inventing the telegraph, ran for mayor of New York City on a platform of persecuting Catholics. Here too is Alan Turing, whose dream of a marvelous thinking machine—what we know as the computer—was met with indifference, and who ended his life in despair after British authorities forced him to undergo experimental treatments to “cure” his homosexuality. From the frigid waters of the Atlantic to the streets of Hamburg during a World War II firestorm to the interior of the human body, *Electric Universe* is a mesmerizing journey of discovery.

Which Lie Did I Tell? William Goldman,2001-02-20 From the Oscar-winning screenwriter of *All the President's Men*, *The Princess Bride*, and *Butch Cassidy and the Sundance Kid*, here is essential reading for both the aspiring screenwriter and anyone who loves going to the movies. If you want to know why a no-name like Kathy Bates was cast in *Misery*, it's in here. Or why Linda Hunt's brilliant work in *Maverick* didn't make the final cut, William Goldman gives you the straight truth. Why Clint Eastwood loves working with Gene Hackman and how MTV has changed movies for the worse, William Goldman, one of the most successful screenwriters in Hollywood today, tells all he knows. Devastatingly eye-opening and endlessly entertaining, *Which Lie Did I Tell?* is indispensable reading for anyone even slightly intrigued by the process of how a movie gets made.

Warhol-isms Andy Warhol,2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." *Warhol-isms* separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well.I went to [a psychiatrist] once, and he never called me back.They always say that time changes things, but you actually have to change them yourself.I've never met a person I couldn't call a beauty.New things are always better than old things.I'm still a commercial artist. I was always a commercial artist.
