**Setting Up a Weather Station and Understanding the Weather** Roger Brugge,2016-07-31 This fascinating and well-illustrated book, which is packed with valuable information and advice, provides a complete guide to observing, recording and understanding the weather and to setting up an amateur weather station. As the author explains, the advent of relatively modern electronic weather sensors means that weather observing is now within the reach of almost everybody. Moreover, thanks to computer software and the internet, it is easier than ever before to record and share with others your weather data and observations. The book considers why it is useful and interesting to set up a weather station and observe the weather, and outlines many different types of weather. It explains how to get started and describes the instruments that are available to the amateur meteorologist. It further demonstrates how good observations can be made using some simple instruments, or, in some instances, no instruments at all. It discusses clouds, snow, wind, optical phenomena, thunder dust, ash and hail and examines atmospheric pressure, precipitation, thermometer screens, air temperature and humidity, soil and surface temperatures and evaporation. It covers sunshine and solar radiation, and also local weather and climate and includes a valuable chapter on instrument and computer software suppliers. Essential reading for all those with an interest in observing and understanding the weather, and superbly illustrated with 132 colour photographs and 20 charts & graphs.

**Decadal Census of Weather Stations** United States. Weather Bureau,1964 A set of seven maps showing weather stations in existence in January of the years 1890, 1900, 1910, 1920, 1930, 1940, and 1950 in Montana.

*Dr Fred's Weather Watch* Fred Bortz,Marshall Shepherd,2014-06-30 This perennial favorite is a how-to book for junior meteorologists. Dr. Fred Bortz and Dr. Marshall Shepherd (former NASA meteorologist and the 2013 President of the American Meteorological Society) show kids how to predict the weather in their own backyards - using simple, inexpensive, self-built meteorological instruments that add up to a fully operational weather station. Newly updated (2014) to include additional sources for online research.

Weather Station Handbook for the Observer United States. War Department,1944 Weather station handbook for the observer is a manual intended for a weather observer of the Army Air Forces Weather Service. At its creation in 1945, the manual was under restricted access as the War Department technical manual 1-235. The handbook includes maps, illustrations, an index, and a bibliography.

**A Review of the Forest Service Remote Automated Weather Station (RAWS) Network** John Zachariassen,2003 The RAWS network and RAWS data-use systems are closely reviewed and summarized in this report. RAWS is an active program created by the many land-management agencies that share a common need for accurate and timely weather data from remote locations for vital operational and program decisions specific to wildland and prescribed fires. A RAWS measures basic observable weather parameters such as temperature, relative humidity, wind speed, wind direction, and precipitation as well as fuel stick temperature. Data from almost 1,900 stations deployed across the conterminous United States, Alaska, and Hawaii are now routinely used to calculate and forecast daily fire danger indices, components, and adjective ratings. Fire business applications include the National Fire Danger Rating System (NFDRS), fire behavior, and fire use. Findings point to the fact that although the RAWS program works and provides needed weather data in support of fire operations, there are inefficiencies and significant problem areas that require leadership attention at the National level.

*Historical Climate Variability and Impacts in North America* Lesley-Ann Dupigny-Giroux,Cary J. Mock,2009-09-18 Climatologists with an eye on the past have any number of sources for their work, from personal diaries to weather station reports. Piecing together the trajectory of a weather event can thus be a painstaking process taking years and involving real detective work. Missing pieces of a climate puzzle can come from very far afield, often in unlikely places. In this book, a series of case studies examine specific regions across North America, using instrumental and documentary data from the 17th to the 19th centuries. Extreme weather events such as the Sitka hurricane of 1880 are recounted in detail, while the chapters also cover more widespread phenomena such as the collapse of the Low Country rice culture. The book also looks at the role of weather station histories in complementing the instrumental record, and sets out the methods that involve early instrumental and documentary climate data. Finally, the book's focus on North America reflects the fact that the historical climate community there has only grown relatively recently. Up to now, most such studies have focused on Europe and Asia. The four sections begin with regional case studies, and move on to reconstruct extreme events and parameters. This is followed by the role of station history and, lastly, methodologies and other analyses. The editors' aim has been to produce a volume that would be instrumental in molding the next generation of historical climatologists. They designed this book for use by general researchers as well as in upper-level undergraduate or graduate level courses.

**An Expendable, Remote-Operating Weather Station (EROWS)** Russell M. Peirce,James F. Church,1972 A self contained, air-droppable, Expendable, Remote-Operating Weather Station (EROWS) has been developed to obtain information on several basic meteorological parameters from those areas where such data are either limited or otherwise unattainable. The EROWS vehicle and its associated sensors are described in detail, along with a functional description of the control-recorder, aircraft repeater, and aircraft dispenser that constitute the remaining components of the complete system. The results of field tests of EROWS units conducted at several locations are described. The testing indicates that the system performed satisfactorily under a wide variety of conditions. (Author).
