<u>Cartographic Japan</u> Kären Wigen, Sugimoto Fumiko, Cary Karacas, 2016-03-16 This "deeply rewarding compilation of maps" offers a gorgeously illustrated tour through the evolution of Japan from the Edo Period to the Digital Age (Los Angeles Review of Books). Japanese society underwent a cartographic renaissance in the late sixteenth century that would eventually turn maps and mapmaking into a central part of daily life. Since that time, the nation's society and landscape have undergone major transformations, and at every point, copious maps documented those monumental changes. Cartographic Japan offers a rich introduction to the resulting treasure trove, with close analysis of one hundred maps from the late 1500s to the present day, each one treated as a distinctive window onto Japan's tumultuous history. Forty-seven distinguished contributors—hailing from Japan, North America, Europe, and Australia—uncover the meanings behind a key selection of these maps, situating them in historical context and explaining how they were made, read, and used at the time. With more than one hundred full-color illustrations, Cartographic Japan offers an enlightening tour of Japan's magnificent cartographic archive.

**Space-Earth Matters** Dr. Surendra Parashar,2021-03-30 The human perception of Earth in space is ever changing. Once upon a time there was this belief that our Earth is flat... But scientifically, what is currently

known of Earth in space and life on Earth? In Space-Earth Matters, Dr. Parashar outlines the scientific history of space from the Big Bang and the genesis of stars and planets billions of years ago to the recent human enterprise of placing thousands of satellites in orbit around our Earth. Dr. Parashar will spacewalk you through the characteristics of orbital mechanics and the basics to understanding the motion of planets and satellites in space and answer such questions as: • How are space science and technology through satellites, sensors, and ground systems being employed for the observation of Earth and exploration of our solar system? • Are such activities in space regulated and managed—and by whom? • Who is responsible for the global governance of space including space debris? • Are there any socio-economic returns of space investments and who has the capability to deploy space missions in order to derive these benefits? Dr. Parashar explains why space-based applications like weather and environmental monitoring, resource mapping, disaster management support, communications, and navigation are of utmost value to all of us on Earth. Space-Earth Matters is a diverse and yet thoroughly approachable exploration of all matters Space and Earth for you, your colleagues, friends, and family.

Imprisoned Apart Louis Fiset,2012-01-01 "Please don't cry," wrote Iwao Matsushita to his wife Hanaye, telling her he was to be interned for the duration of the war. He was imprisoned in Fort Missoula, Montana, and she was incarcerated at the Minidoka Relocation Center in southwestern Idaho. Their separation would continue for more than two years. Imprisoned Apart is the poignant story of a young teacher and his bride who came to Seattle from Japan in 1919 so that he might study English language and

literature, and who stayed to make a home. On the night of December 7, 1941, the FBI knocked at the Matsushitas' door and took Iwao away, first to jail at the Seattle Immigration Stateion and then, by special train, windows sealed and guards at the doors, to Montana. He was considered an enemy alien, "potentially dangerous to public safety," because of his Japanese birth and professional associations. The story of Iwao Matsushita's determination to clear his name and be reunited with his wife, and of Hanaye Matsushita's growing confusion and despair, unfolds in their correspondence, presented here in full. Their cards and letters, most written in Japanese, some in English when censors insisted, provided us with the first look at life inside Fort Missoula, one of the Justice Department's wartime camp for enemy aliens. Because Iwao was fluent in both English and Japanese, his communications are always articulate, even lyrical, if restrained. Hanaye communicated briefly and awkwardly in English, more fully and openly in Japanese. Fiset presents a most affecting human story and helps us to read between the lines, to understand what was happening to this gentle, sensitive pair. Hanaye suffered the emotional torment of disruption and displacement from everything safe and familiar. Iwao, a scholarly man who, despite his imprisonment, did not falter in his committment to his adopted country, suffered the ignominity of suspicion of being disloyal. After the war, he worked as a subject specialist at the University of Washington's Far Eastern Library and served as principal of Seattle's Japanese Language School, faithful to the Japanese American community until his death in 1979.

Voices from Company DG. Ward Hubbs,2003 An unprecedented contribution to the field of Civil War history, Voices from Company D collects writings from the diaries of eight members of the Greensboro Guards, Fifth Alabama Infantry Regiment. Woven into a single chronological narrative, these writings provide a unique perspective not only on many of the war's battles and campaigns but also on aspects of life and culture in the nineteenth-century South, including friendship and kinship, duty and honor, and commitment and sacrifice. As part of the Army of Northern Virginia, the Guards marched under Stonewall Jackson and Jubal Early and fought throughout the war in such battles as Seven Pines, Chancellorsville, Gettysburg, Spotsylvania, and finally Petersburg, where all but one of the Guards were captured. Readers will find singular descriptions of the towns and countryside the men saw, of battlefields and camps, of civilians caught in the path of the war. The diarists also commented on such topics as politics, religion, the home front, the presence of slaves alongside the troops, prices and inflation, troop morale, and leisure activities from reading to gambling. While the diaries impart a wealth of information about critical military engagements, they also convey the full range of the wartime experience: from terror to boredom, pride to regret, victory to defeat.
