Super-sticky WeChat and Chinese Society Yujie Chen,Zhifei Mao,Jack Linchuan Qiu,2018-07-13 This book provides a balanced and nuanced study of how the super-sticky WeChat platform interweaves into the fabric of Chinese social, cultural, and political life. It keeps the wider global and national social media landscape in view and compares and contrasts WeChat with Weibo, QQ and other Western social media platforms.

Cyberpragmatics Francisco Yus,2011-08-22 Cyberpragmatics is an analysis of Internet-mediated communication from the perspective of cognitive pragmatics. It addresses a whole range of interactions that can be found on the Net: the web page, chat rooms, instant messaging, social networking sites, 3D virtual worlds, blogs, videoconference, e-mail, Twitter, etc. Of special interest is the role of intentions and the quality of interpretations when these Internet-mediated interactions take place, which is often affected by the textual properties of the medium. The book also analyses the pragmatic implications of transferring offline discourses (e.g. printed paper, advertisements) to the screen-framed space of the Net. And although the main framework is cognitive pragmatics, the book also draws from other theories and models in order to build up a better picture of what really happens when people communicate on the Net. This book will interest analysts doing research on computer-mediated communication, university students and researchers undergoing post-graduate courses or writing a PhD thesis. Intercultural Friendship Elisabeth Gareis,1995 Elisabeth Gareis breaks new ground in her study of intercultural friendships. She probes the scantily researched subject of friendship to report on the nature of relations between foreigners and Americans in the United States. The approach is descriptive, using data derived from an extensive review of literature, questionnaires and in-depth interviews. Participants in the study were 15 unmarried graduate students from Germany, India, and Taiwan who had been in the U.S. for at least one year. From her study, Gareis concludes that cultural background is much less significant for the successful development of intercultural friendships than might be expected. The investigative results show that other factors play a more important role in developing strong intercultural friendships. These factors include: individual personality, level of confidence, the meaning attached to the concept of friendship, and general cultural expectations. As the only book of its kind to exist in the market, Intercultural Friendships will enlighten students and teachers of intercultural communication classes, counselors working with foreign students, and cross-cultural leaders. It will prove indispensable to foreign students in the U.S. and U.S. citizens working or studying abroad.

Your Post Has Been Removed Frederik Stjernfelt,Anne Mette Lauritzen,2019-01-01 This open access monograph argues established democratic norms for freedom of expression should be implemented on the internet. Moderating policies of tech companies as Facebook, Twitter and Google have resulted in posts being removed on an industrial scale. While this moderation is often encouraged by governments - on the pretext that terrorism, bullying, pornography, hate speech and fake news will slowly disappear from the internet - it enables tech companies to censor our society. It is the social media companies who define what is blacklisted in their community standards. And given the dominance of social media in our information society, we run the risk of outsourcing the definition of our principles for discussion in the public domain to private companies. Instead of leaving it to social media companies only to take action, the authors argue democratic institutions should take an active role in moderating criminal content on the internet. To make this possible, tech companies should be analyzed whether they are approaching a monopoly. Antitrust legislation should be applied to bring those monopolies within democratic governmental oversight. Despite being in different stages in their lives, Anne Mette is in the startup phase of her research career, while Frederik is one of the most prolific philosophers in Denmark, the authors found each other in their concern about Free Speech on the internet. The book was originally published in Danish as Dit opslag er blevet fjernet - techgiganter & ytringsfrihed. Praise for 'Your Post has been Removed' From my perspective both as a politician and as private book collector, this is the most important non-fiction book of the 21st Century. It should be disseminated to all European citizens. The learnings of this book and the use we make of them today are crucial for every man, woman and child on earth. Now and in the future. Jens Rohde, member of the European Parliament for the Alliance of Liberals and Democrats for Europe This timely book compellingly presents an impressive array of information and analysis about the urgent threats the tech giants pose to the robust freedom of speech and access to information that are essential for individual liberty and democratic self-government. It constructively explores potential strategies for restoring individual control over information flows to and about us. Policymakers worldwide should take heed! Nadine Strossen, Professor, New York Law School. Author, HATE: Why We Should Resist It with Free Speech, Not Censorship.

How the World Changed Social Media Daniel Miller,Elisabetta Costa,Nell Haynes,Tom McDonald,Razvan Nicolescu,Jolynna Sinanan,Juliano Spyer,Shriram Venkatraman,Xinyuan Wang,2016-02-29 How the World Changed Social Media is the first book in Why We Post, a book series that investigates the findings of anthropologists who each spent 15 months living in communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences

The Global Smartphone Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang,2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual

opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

Social Media in Industrial China Xinyuan Wang, 2016-09-13 Life outside the mobile phone is unbearable.' Lily, 19, factory worker. Described as the biggest migration in human history, an estimated 250 million Chinese people have left their villages in recent decades to live and work in urban areas. Xinyuan Wang spent 15 months living among a community of these migrants in a small factory town in southeast China to track their use of social media. It was here she witnessed a second migration taking place: a movement from offline to online. As Wang argues, this is not simply a convenient analogy but represents the convergence of two phenomena as profound and consequential as each other, where the online world now provides a home for the migrant workers who feel otherwise 'homeless'. Wang's fascinating study explores the full range of preconceptions commonly held about Chinese people – their relationship with education, with family, with politics, with 'home' – and argues why, for this vast population, it is time to reassess what we think we know about contemporary China and the evolving role of social media.

Emotions, Technology, and Design Sharon Tettegah, Safiya Noble, 2015-12-28 Emotional design explicitly addresses the emotional relationship between the objects and the subjects of design—in this book, the objects are technologies, and the subjects are technology users. The first section delves into the philosophy and theory of emotional design to provide a foundation for the rest of the book, which goes on to discuss emotional design principles, the design and use of emoticons, and then intelligent agents in a variety of settings. A conclusion chapter covers future research and directions. *Emotions, Technology, and Design* provides a thorough look at how technology design affects emotions and how to use that understanding to in practical applications. Discusses the role of culture, trust, and identity in empathetic technology Presents a framework for using sound to elicit positive emotional responses Details the emotional use of color in design Explores the use of emoticons, earcons, and tactons Addresses the emotional design specific to agent-based environments

Social Media in an English Village Daniel Miller, 2016-02-29 Daniel Miller spent 18 months undertaking an ethnographic study with the residents of an English village, tracking their use of the different social media platforms. Following his study, he argues that a focus on platforms such as Facebook, Twitter and Instagram does little to explain what we post on social media. Instead, the key to understanding how people in an English village use social media is to appreciate just how 'English' their usage has become. He introduces the 'Goldilocks Strategy': how villagers use social media to calibrate precise levels of interaction ensuring that each relationship is neither too cold nor too hot, but 'just right'.

Essentials of Business Communication Mary Ellen Guffey, 2004 This text-workbook is a streamlined, no-nonsense approach to business communication. It takes a three-in-one approach: (1) text, (2) practical workbook, and (3) self-teaching grammar/mechanics handbook. The chapters reinforce basic writing skills, then apply these skills to a variety of memos, letters, reports, and resumes. This new edition features increased coverage of contemporary business communication issues including oral communication, electronic forms of communication, diversity and ethics.

Inclusive Design P. John Clarkson, Roger Coleman, Simeon Keates, Cherie Lebbon, 2013-06-29 Inclusive Design: What's in It for Me? presents a comprehensive review of current practice in inclusive design. With emphasis on new ideas for improvement and arguments for wider implementation in future, a unique combination of leading opinions on inclusive design from both industry and academia are offered. The theme throughout encourages a positive view of inclusive design as a good and profitable process and to produce a change to more effective approaches to design for all. Inclusive Design is composed of two parts with a common chapter structure so that the business and design arguments in favour of inclusive design can be easily compared and assimilated: The Business Case presents the industrial and management benefits of inclusive design. It concentrates on demographic, legal and ethical reasons for all businesses being better off taking inclusivity into account in the design of their products or services. Case histories demonstrating the commercial success of inclusive design are drawn from the experiences of companies such as Tesco, Fiat and The Royal Mail. The Designers' Case focuses on the factors a designer needs to take into account when dealing with inclusivity. Who is going to use my design? What do they need from my design? How do I take any medical needs into account? Just how inclusive is my design? are all questions answered in this section which presents the necessary tools for effective inclusive design. This part of the book aims to convince a designer that inclusive design is a realistic goal. Inclusive Design will appeal to designers, researchers and students and to managers making decisions about the research and design strategies of their companies.

Natural Language Processing for Social Media Atefeh Farzindar, Diana Inkpen, 2017-12-15 In recent years, online social networking has revolutionized interpersonal communication. The newer research on language analysis in social media has been increasingly focusing on the latter's impact on our daily lives, both on a personal and a professional level. Natural language processing (NLP) is one of the most promising avenues for social media data processing. It is a scientific challenge to develop powerful methods and algorithms which extract relevant information from a large volume of data coming from multiple sources and languages in various formats or in free form. We discuss the challenges in analyzing social media texts in contrast with traditional documents. Research methods in information extraction, automatic categorization and clustering, automatic summarization and indexing, and statistical machine translation need to be adapted to a new kind of data. This book reviews the current research on NLP tools and methods for processing the non-traditional information from social media data that is available in large amounts (big data), and shows how innovative NLP approaches can integrate appropriate linguistic information in various fields such as social media monitoring, healthcare, business intelligence, industry, marketing, and security and defence. We review the existing evaluation metrics for NLP and social media applications, and the new efforts in evaluation campaigns or shared tasks on new datasets collected from social media. Such tasks are organized by the Association for Computational Linguistics (such as SemEval tasks) or by the National Institute of Standards and Technology via the Text REtrieval Conference (TREC) and the Text Analysis Conference (TAC). In the concluding chapter, we discuss the importance of this dynamic discipline and its great potential for NLP in the coming decade, in the context of changes in mobile

technology, cloud computing, virtual reality, and social networking. In this second edition, we have added information about recent progress in the tasks and applications presented in the first edition. We discuss new methods and their results. The number of research projects and publications that use social media data is constantly increasing due to continuously growing amounts of social media data and the need to automatically process them. We have added 85 new references to the more than 300 references from the first edition. Besides updating each section, we have added a new application (digital marketing) to the section on media monitoring and we have augmented the section on healthcare applications with an extended discussion of recent research on detecting signs of mental illness from social media.

Human Interaction, Emerging Technologies and Future Applications III Tareq Ahram, Redha Taiar, Karine Langlois, Arnaud Choplin, 2020-08-05 This book reports on research and developments in human-technology interaction. A special emphasis is given to human-computer interaction, and its implementation for a wide range of purposes such as healthcare, aerospace, telecommunication, and education, among others. The human aspects are analyzed in detail. Timely studies on human-centered design, wearable technologies, social and affective computing, augmented, virtual and mixed reality simulation, human rehabilitation and biomechanics represent the core of the book. Emerging technology applications in business, security, and infrastructure are also critically examined, thus offering a timely, scientifically-grounded, but also professionally-oriented snapshot of the current state of the field. The book is based on contributions presented at the 3rd International Conference on Human Interaction and Emerging Technologies: Future Applications, IHET 2020, held on August 27-29, 2020. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design and/or management of the new generation of service systems.

The Semiotics of Emoji Marcel Danesi, 2016-11-17 Shortlisted for the BAAL Book Prize 2017 Emoji have gone from being virtually unknown to being a central topic in internet communication. What is behind the rise and rise of these winky faces, clinking glasses and smiling poos? Given the sheer variety of verbal communication on the internet and English's still-controversial role as lingua mundi for the web, these icons have emerged as a compensatory universal language. The Semiotics of Emoji looks at what is officially the world's fastest-growing form of communication. Emoji, the colourful symbols and glyphs that represent everything from frowning disapproval to red-faced shame, are fast becoming embedded into digital communication. Controlled by a centralized body and regulated across the web, emoji seems to be a language: but is it? The rapid adoption of emoji in such a short span of time makes it a rich study in exploring the functions of language. Professor Marcel Danesi, an internationally-known expert in semiotics, branding and communication, answers the pertinent questions. Are emoji making us dumber? Can they ultimately replace language? Will people grow up emoji literate as well as digitally native? Can there be such a thing as a Universal Visual Language? Read this book for the answers.

Sentiment Analysis Bing Liu, 2020-10-15 Sentiment analysis is the computational study of people's opinions, sentiments, emotions, moods, and attitudes. This fascinating problem offers numerous research challenges, but promises insight useful to anyone interested in opinion analysis and social media analysis. This comprehensive introduction to the topic takes a natural-language-processing point of view to help readers understand the underlying structure of the problem and the language constructs commonly used to express opinions, sentiments, and emotions. The book covers core areas of sentiment analysis and also includes related topics such as debate analysis, intention mining, and fake-opinion detection. It will be a valuable resource for researchers and practitioners in natural language processing, computer science, management sciences, and the social sciences. In addition to traditional computational methods, this second edition includes recent deep learning methods to analyze and summarize sentiments and opinions, and also new material on emotion and mood analysis techniques, emotion-enhanced dialogues, and multimodal emotion analysis.

Radicalizing Care Elke Krasny, Sophie Lingg, Lena Fritsch, Brigit Bosold, Vera Hofmann, 2022-05-03 Critical theoretical essays, case studies, and manifestos offer insights from diverse contexts and geographies of feminist and queer care ethics. What happens when feminist and queer care ethics are put into curating practice? What happens when the notion of care based on the politics of relatedness, interdependence, reciprocity, and response-ability informs the practices of curating? Delivered through critical theoretical essays, practice-informed case studies, and manifestos, the essays in this book offer insights from diverse contexts and geographies. These texts examine a year-long program at Schwules Museum Berlin focused on the perspectives of women, lesbian, inter, non-binary and trans people at Schwules Museum Berlin; the formation of the Queer Trans Intersex People of Colour Narratives Collective in Brighton; Métis Kitchen Table Talks, organized around indigenous knowledge practices in Canada; complex navigations of motherhood and censorship in China; the rethinking of institutions together with First Nations artists in Melbourne; the reanimation of collectivity in immigrant and diasporic contexts in welfare state spaces in Vienna and Stockholm; struggles against Japanese vagina censorship; and an imagined museum of care for Rojava. Strategies include crippling and decolonizing as well as emergent forms of digital caring labor, including curating, hacking, and organizing online drag parties for pandemic times. The Holistic Curriculum John P. Miller, 2007-03-17 Holistic education is concerned with connections in human experience - connections between mind and body, between linear thinking and intuitive ways of knowing, between individual and community, and between the personal self and the transpersonal self. First published in 1988, The Holistic Curriculum examines the philosophical, psychological, and social foundations of holistic education, outlining its history and discussing practical applications in the classroom. This revised and expanded second edition concisely describes how holistic thinking integrates spiritual and scientific perspectives, drawing on romantic, humanistic, and other radical alternatives to the atomistic worldview of the modern age. The role of the teacher, the issue of accountability, and strategies for implementing the Holistic Curriculum are also discussed.

The Emoji Code Vyvyan Evans,2017-08 Drawing from disciplines as diverse as linguistics, cognitive science, psychology, and neuroscience, The Emoji Code explores how emojis are expanding communication and not ending it. For all the handwringing about the imminent death of written language, emoji—those happy faces and hearts—is not taking us backward to the dark ages of illiteracy. Every day 41.5 billion texts are sent by one quarter of the world, using 6 million emoji. Evans argues that these symbols enrich our ability to communicate and allow us to express our emotions and induce empathy—ultimately making us all better communicators. Vyvyan Evans's Emoji Code charts the evolutionary origins of language, the social and cultural factors that govern its use, change, and development; as well as what it reveals about the human mind. In most communication, nonverbal cues are our emotional expression, signal our personality, and are our attitude toward our addressee. They provide the essential means of nuance and are essential to getting our ideas across. But in digital communication, these cues are missing, which can lead to miscommunication. The explosion of emoji, in less than four years, has arisen precisely because it fulfills exactly these functions which are essential for communication but are otherwise absent in texts and emails. Evans persuasively argues that emoji add tone and an emotional voice and nuance, making us more effective communicators in the digital age.

Digital Entrepreneurship Mariusz Soltanifar,Mathew Hughes,Lutz Göcke,2020-11-13 This open access book explores the global challenges and experiences related to digital entrepreneurial activities, using carefully selected examples from leading companies and economies that shape world business today and tomorrow. Digital entrepreneurship and the companies steering it have an enormous global impact; they promise to transform the business world and change the way we communicate with each other. These companies use digitalization and artificial intelligence to enhance the quality of decisions and augment their business and customer operations. This book demonstrates how cloud services are continuing to evolve; how cryptocurrencies are traded in the banking industry; how platforms are created to commercialize business, and how, taken together, these developments provide new opportunities in the digitalized era. Further, it discusses a wide range of digital factors changing the way businesses operate, including artificial intelligence, chatbots, voice search, augmented and virtual reality, as well as cyber threats and data privacy management. “Digitalization mirrors the Industrial Revolution’s impact. This book provides a complement of perspectives on the opportunities emanating from such a deep seated change in our economy. It is a comprehensive collection of thought leadership mapped into a very useful framework. Scholars, digital entrepreneurs and practitioners will benefit from this timely work.” Gina O’Connor, Professor of Innovation Management at Babson College, USA “This book defines and delineates the requirements for companies to enable their businesses to succeed in a post-COVID19 world. This book deftly examines how to accomplish and achieve digital entrepreneurship by leveraging cloud computing, AI, IoT and other critical technologies. This is truly a unique “must-read” book because it goes beyond theory and provides practical examples.” Charlie Isaacs, CTO of Customer Connection at Salesforce.com, USA This book provides digital entrepreneurs useful guidance identifying, validating and building their venture. The international authors developed new perspectives on digital entrepreneurship that can support to create impact ventures.” Felix Staeritz, CEO FoundersLane, Member of the World Economic Forum Digital Leaders Board and bestselling author of FightBack, Germany
