Acquiring Tarifit-Berber by Children in the Netherlands and Morocco Yahya E-Ramdani, 2003 Few people wonder how language acquisition is possible. How do human beings within few years after birth become able to speak by themselves without any explicit guidance, transcending both their limited experience and biological limitations? How is it possible that a child is capable of learning any language, or even more than one language easily? It is this miraculous nature of language acquisition which is the topic of this study. Children of minority groups in the Netherlands do not reach native-like mastery in the language of their parents or their primary home language. The proficiency of these children seems to deviate from established norms of native speakers in the country of origin. Deviations from such norms implicitly refer to inaccurate or incorrect grammatical output. Such deviations can be temporary, related to a slow-down in the order of acquisition, or enduring and permanent as a result of incomplete acquisition. After 40

years of migration, and at the time that the Moroccan community is counting its third generation, many questions emerge as to the process of Berber acquisition and status quo of proficiency of children in the Netherlands in comparison with their peers in Morocco. The outcome of this fascinating comparison is yet the beginning of a deeper understanding of the fascinating path of language acquisition in migration.

Urban Informatics Using Mobile Network Data Santi Phithakkitnukoon, 2022-11-29

This book discusses the role of mobile network data in urban informatics, particularly how mobile network data is utilized in the mobility context, where approaches, models, and systems are developed for understanding travel behavior. The objectives of this book are thus to evaluate the extent to which mobile network data reflects travel behavior and to develop guidelines on how to best use such data to understand and model travel behavior. To achieve these objectives, the book attempts to evaluate the strengths and weaknesses of this data source for urban informatics and its applicability to the development and implementation of travel behavior models through a series of the authors' research studies. Traditionally, survey-based information is used as an input for travel demand models that predict future travel behavior and transportation needs. A survey-based approach is however costly and time-consuming, and hence its information can be dated and limited to a particular region. Mobile network data thus emerges as a promising

alternative data source that is massive in both cross-sectional and longitudinal perspectives, and one that provides both broader geographic coverage of travelers and longer-term travel behavior observation. The two most common types of travel demand model that have played an essential role in managing and planning for transportation systems are four-step models and activity-based models. The book's chapters are structured on the basis of these travel demand models in order to provide researchers and practitioners with an understanding of urban informatics and the important role that mobile network data plays in advancing the state of the art from the perspectives of travel behavior research.

Groundwater Chemicals Desk Reference John H. Montgomery, 2007-04-18 Building on the foundation set by its best-selling predecessors, the Groundwater Chemicals Desk Reference, Fourth Edition is both a broad, comprehensive desk reference and a guide for field research. This fourth edition contains more than 1,700 additional references, including adsorption data for more than 800 organic compounds and metals, solubility data for over 2,500 compounds, octanol-water partition coefficients for 1,475 compounds, toxicity data for 1,100 compounds, more than 31,000 synonyms, and more than 2,250 degradation products, impurities, and compounds in commercially available products cross-referenced to parent compounds. See what's new in the Fourth Edition: · Additional bioconcentration factors · Additional aquatic and mammalian toxicity values · Additional degradation rates and corresponding half-lives in various environmental compartments · Ionization potentials · Additional aqueous solubility of miscellaneous inorganic and organic compounds · Additional Henry's Law constants for 1,850 compound entries · Additional

octanol-water partition coefficients for 1,475 compound entries · Additional biological, chemical, and theoretical oxygen demand values for various organic compounds · Four additional tables: Test Method Number Index, Dielectric Values of Earth Materials and Fluids, Lowest Odor Threshold Concentrations of Organic Compounds in Water, and Lowest Threshold Concentrations of Organic Compounds in Water · A section for each compound entry describing potential sources of compounds detected in the environment The compounds profiled include solvents, herbicides, insecticides, fumigants, and other hazardous substances commonly found in the groundwater and soil environments, the organic Priority Pollutants promulgated by the U.S. EPA under the Clean Water Act of 1977, and compounds commonly found in the workplace and environment. The presentation remains virtually the same as previous editions, making the information easy to find and immediately useful.

A Pride of Princes Jennifer Roberson, 1988-02-02 The fifth book in the Chronicles of the Cheysuli continues a tale of magical warriors and shapeshifters as they battle the sorcerers that threaten their existence Brennan, Hart and Corin were the three Cheysuli sons of Niall, ruler of Homana, and the next link in the generations-old prophecy of the Firstborn. Now the time had come for all three to take the paths for which they were fated: Brennan, heir to the throne of Homana, would face the menace of unknown assassins and treacherous Ihlini magic. Hart, Brennan's younger twin, must journey to Solinde, the kingdom which would one day be his to rule—a land that longed to see the Cheysuli prince overthrown. And Corin, the youngest prince, must battle sorcery and

madness in the court of distant Atvia. Three princes, three destinies—and if even one should fail to fulfill the patterns of prophecy, Homanan and Cheysuli alike would pay a deadly price....
