World Wide Weed Tom Decorte,2016-02-11 For the majority of its history, the cultivation of cannabis did not stand out, at least compared to the cultivation of other illegal plants. Cannabis plantations, like coca bush or opium poppy plantations, were typically large in size, grown by local farmers in a handful of developing (producing) countries, processed and then exported to industrial (consuming) nations. While cocaine and heroin are still produced in a handful of

developing countries, cannabis cultivation is increasingly universal. From Europe to the Americas and Oceania, import substitution in cannabis markets has been noticed in almost every developed country around the world, with a notable aversion for discrimination. Geographical, technological, cultural and economic factors help to explain why (indoor and outdoor) domestic cultivation is well established, and why the nature and extent of cultivation varies so dramatically across the western, developed nations. As we start the second decade of the 21st century, the new cannabis industry continues to fascinate both casual and academic observers of the drug scene. Researchers around the world have become increasingly interested in the phenomenon, aiming to describe, and potentially explain, the rapid switch from importation to domestic production in their own countries. In bringing together some of the world's leading experts on cannabis cultivation this book contains sixteen chapters that take an interdisciplinary look at global trends in cannabis cultivation. It will serve as an exemplar for wider discussions of key theories and concepts relating to the spread not just of cannabis cultivation, but also of illegal markets more generally, the actors that operate within these markets and the policies and practices that are employed in response to developments within these markets.

Craft Weed Ryan Stoa, 2018-11-13 How the future of post-legalization marijuana farming can be sustainable, local, and artisanal. What will the marijuana industry look like as legalization

spreads? Will corporations sweep in and create Big Marijuana, flooding the market with mass-produced weed? Or will marijuana agriculture stay true to its roots in family farming, and reflect a sustainable, local, and artisanal ethic? In *Craft Weed*, Ryan Stoa argues that the future of the marijuana industry should be powered by small farms—that its model should be more craft beer than Anheuser-Busch. To make his case for craft weed, Stoa interviews veteran and novice marijuana growers, politicians, activists, and investors. He provides a history of marijuana farming and its post-hippie resurgence in the United States. He reports on the amazing adaptability of the cannabis plant and its genetic gifts, the legalization movement, regulatory efforts, the tradeoffs of indoor versus outdoor farms, and the environmental impacts of marijuana agriculture. To protect and promote small farmers and their communities, Stoa proposes a Marijuana Appellation system, modeled after the wine industry, which would provide a certified designation of origin to local crops. A sustainable, local, and artisanal farming model is not an inevitable future for the marijuana industry, but *Craft Weed* makes clear that marijuana legalization has the potential to revitalize rural communities and the American family farm. As the era of marijuana prohibition comes to an end, now is the time to think about what kind of marijuana industry and marijuana agriculture we want. *Craft Weed* will help us plan for a future that is almost here.

Killer Weed Susan C. Boyd, Connie Carter, 2014-02-05 Since the late 1990s, marijuana grow operations have been identified by media and

others as a new and dangerous criminal activity of “epidemic” proportions. With *Killer Weed*, Susan C. Boyd and Connie Carter use their analysis of fifteen years of newspaper coverage to show how consensus about the dangerous people and practices associated with marijuana cultivation was created and disseminated by numerous spokespeople including police, RCMP, and the media in Canada. The authors focus on the context of media reports in Canada to show how claims about marijuana cultivation have intensified the perception that this activity poses “significant” dangers to public safety and thus is an appropriate target for Canada’s war on drugs. Boyd and Carter carefully show how the media draw on the same spokespeople to tell the same story again and again, and how a limited number of messages has led to an expanding anti-drug campaign that uses not only police, but BC Hydro and local municipalities to crack down on drug production. Going beyond the newspapers, *Killer Weed* examines how legal, political, and civil initiatives that have emerged from the media narrative have troubling consequences for a shrinking Canadian civil society.

Cannabis Cultivation Mel Thomas, 2012-02 This classic book is now in full color. Excellent diagrams and images throughout show how to set up anything from a closet grow to a full size marijuana farm. Detailed information is given on both lighting and the associated electricity consumption, including all of the latest developments regarding lamps and off-grid electricity generation. Outdoor growing is also extensively covered and different techniques are fully explained, enabling anyone to cultivate high quality buds, either discreetly in your back yard or at a remote grow area, all at very little cost and just the way nature intended. Written by former commercial-scale grower Mel Thomas, Cannabis Cultivation divulges the expertise, tips, and insight he learned at the helm of one of the world's largest marijuana growing operations. Ideal for beginners the book is free of technical jargon and boring theory, and its step-by-step directions enable anyone to grow and harvest the

highest quality marijuana buds safely using simple techniques. Detailed diagrams and instructions are included showing you how to build inexpensive versions of costly, commercially available equipment needed for successful indoor gardens.

Seed to Weed Chris Stone, 2012 In this era of marijuana activism, DIY, and gardening fever, what better use for that windowsill or small patch than growing your own weed? This fun, colorful guide makes marijuana cultivation less intimidating than ever before. Cannabis grow guides are perennial strong sellers, and with increasing public interest in marijuana, sales can only continue to rise. While other titles on the subject tend to be serious in tone and photographic in treatment, this illustrated, wacky-but-informative gift book with an extremely affordable price is uniquely positioned to appeal to small-scale growers and absolute beginners. *Seed to Weed* covers everything needed to get started growing: hardware, lighting, hydroponics, organics, cloning, pests & diseases, harvesting, curing, and more. With its light touch, humorous tone, and easy-to-follow step-by-step sequences, *Seed to Weed* will have readers growing great ganja in no time.

The Complete Guide to Small-scale Farming
Melissa Gwyn Nelson, 2010 Starting a small scale farm is the dream of Americans young and old, from those who watched the majesty of the great western farm in films during their youth to those who spent their childhood actually working on a farm. However, for many of these individuals it is a matter of logistics and cost that keeps them from realizing their dreams. Raising beef cattle, ducks, rabbits, and any other small animals such as sheep, goats, or chickens takes not only a decent amount of money to get started, but know how that doesn't come in textbooks while in school. This book was written with the intent of

providing anyone who has ever wanted to start their own small scale farm the necessary resources and information needed to start raising small animals and cattle. You will learn everything you need to know to raise a wide variety of small animals. You will learn how to care for chickens, from choosing the right breed to raising them for egg production. You will learn how to handle geese and ducks, choosing the correct breeds, feeding, housing, breeding, and selecting the right ones for egg production. You will also learn about egg incubation, maintaining poultry health, and how raise them for meat. Other animals you will learn how to care for include rabbits, goats, sheep, dairy cows, and beef cattle. Small farmers and animal experts have been interviewed in detail and their responses added to this book to provide additional insight into every aspect of raising farm animals. This includes details about how to purchase, house, feed, breed, record, and butcher animals of all types as well as how to gather milk, use goats and cows for maintaining your fields, and even keeping records of births and selling babies. Everything you might need to know about raising small animals for your farm is included in this guide to provide you the first steps to raising domesticated poultry and livestock.
