Research Methods in Sociolinguistics Janet Holmes, Kirk Hazen, 2013-08-14 This single-volume guide equips students of sociolinguistics with a full set of methodological tools including data collection and analysis techniques, explained in clear and accessible terms by leading experts. It features project suggestions, troubleshooting tips, and data assessment across diverse languages. Explores an array of anthropological and scientific methods that cover the full spectrum of contemporary sociolinguistics, from the study of style and discourse analysis to the study of phonetics Details the types of data available, and explains collection methods ranging from sociolinguistic interviews to linguistic landscapes Provides comprehensive coverage of data analysis, subdivided into segments on linguistic and socio-cultural techniques, and linked to numerous languages Includes useful summaries, seasoned advice and troubleshooting tips, ideas for research projects, and a full directory of supplementary reading

Virginia Woolf and the Natural World Kristin Czarnecki, Carrie Rohman, 2011 Virginia Woolf and the Natural World is a compilation of thirty-one essays presented at the twentieth annual international conference on Virginia Woolf. This volume explores Woolf's complex engagement with the natural world, an engagement that was as political as it was aesthetic. The diversity of topics within this collection-ecofeminism, the nature of time, the nature of the self, nature and sporting, botany, climate, and landscape, just to name a few-fosters a deeper understanding of the nature of nature in Woolf's works. Contributors include Bonnie Kime Scott, Carrie Rohman, Diana Swanson, Elisa Kay Sparks, Beth Rigel Daugherty, Jane Goldman, and Diane Gillespie, among many others from the international community of Woolf scholars.

Complex Analysis in one Variable NARASIMHAN, 2012-12-06 This book is based on a first-year graduate course I gave three times at the University of Chicago. As it was addressed to graduate students who intended to specialize in mathematics, I tried to put the classical theory of functions of a complex variable in context, presenting proofs and points of view which relate the subject to other branches of mathematics. Complex analysis in one variable is ideally suited to this attempt. Of course, the branches of mathematics one chooses, and the connections one makes, must depend on personal taste and knowledge. My own leaning towards several complex variables will be apparent, especially in the notes at the end of the different chapters. The first three chapters deal largely with classical material which is available in the many books on the subject. I have tried to present this material as efficiently as I could, and, even here, to show the relationship with other branches of mathematics. Chapter 4 contains a proof of Picard's theorem; the method of proof I have chosen has far-reaching generalizations in several complex variables and in differential geometry. The next two chapters deal with the Runge approximation theorem and its many applications. The presentation here has been strongly influenced by work on several complex variables.

JIAC2009 book of abstracts C. Lokhorst, J. Huijsmans, R.P.M. de Louw, 2023-09-04 The broad range of research topics reported in this abstract book is a valuable resource for researchers, advisors, teachers and professionals in agriculture. ICT in agriculture, the field of EFITA's interest, precision agriculture and precision livestock farming are becoming ever more relevant as the agricultural industry struggles to come to terms with various developments. These include issues of cooperation, Internet, standardisation, software architecture, robotics, environment, animal and human welfare, economics, traceability, farm management, vehicle guidance, crop

management, animal disease and livestock management. Whilst some benefits have proved elusive, others contribute positively to today's agriculture. Research continues to be necessary and needs to be reported and disseminated to a wide audience. Also note that the reviewed papers from the 4th European Conference on Precision Livestock Farming and the 7th ECPA conference are presented in companion publications.

Evaluation of Pavement Surface Friction Treatments Shuo Li, Sammy Noureldin, Yi Jiang, Yanna Sun, 2012-01-12 The implementation of a pavement preservation program involves a learning curve with not only a determination to succeed, but also the courage to fail. Also, successful implementation of pavement preservation program requires knowledge of the performance of preservation surface treatments over time, which is critical to the select of candidate projects and the development of performance models for pavement management analysis. In addition, preservation surface treatments, such as chip seal, fog seal, microsurfacing, 4.75 mm thin or ultra-thin overlay, can not only repair certain pavement surface defects, but also change the surface characteristics of pavement and therefore affect pavement surface friction performance. Nevertheless, such information is currently not available but is essential for the Indiana Department of Transportation (INDOT) to evaluate the effectiveness of pavement preservation surface treatments. As a concentrated effort, this study focused on the long-term friction performance of preservation surface treatments, particularly those have been widely used and those have seen increasing use by INDOT. Based on the selected field pavement test sections, this study aimed to evaluate the surface characteristics, particularly the long-term friction performance for those surface treatments that have been widely used and have seen increasing use by INDOT, including chip seal, fog-chip, fog seal, rejuvenating seal, microsurfacing, ultrathin bonded wearing course (UBWC), 4.75-mm hot mix asphalt (HMA) thin overlay, and profile milling (or diamond grinding). The test sections for each type of surface treatment covered a wide range of traffic volume from light to high. The service life for the selected test sections varied from 6 months to 60 months. Friction testing was mainly conducted using ASTM E 274 locked wheel trailer. Surface texture testing was conducted using either the ASTM E 2157 circular track meter (CTM) or a laser scanner. Pavement roughness and noise tests were also conducted to address the smoothness and noise issues, particularly on microsurfacing. Detailed analysis was provided to evaluate the friction performance of 4.75-mm HMA overlays. It is believed that the test results and findings drawn from this study not only provides timely information for INDOT to improve its pavement preservation program, but also provides the original information for the potential readers to better utilize preservation surface treatments.

An Introduction to Language Kirk Hazen, 2014-06-24 An Introduction to Language offers an engaging guide to the nature of language, focusing on how language works - its sounds, words, structures, and phrases - all investigated through wide-ranging examples from Old English to contemporary popculture. Explores the idea of a scientific approach to language, inviting students to consider what qualities of language comprise everyday skills for us, be they sounds, words, phrases, or conversation. Helps shape our understanding of what language is, how it works, and why it is both elegantly complex and essential to who we are. Includes exercises within each chapter to help readers explore key concepts and directly observe the patterns that are part of all human language. Examines linguistic variation and change to illustrate social nuances and language-in-use, drawing primarily on examples from English. Avoids linguistic jargon, focusing instead on a broader and more general approach to the study of language, and making it ideal for those coming to the subject for the first time. Supported by additional web resources - available upon publication at <http://www.wiley.com/go/hazen/introlanguage> - including student study

aids and testbank and notes for instructors

Differential Equations for Engineers Wei-Chau Xie, 2010-04-26 Xie presents a systematic introduction to ordinary differential equations for engineering students and practitioners. Mathematical concepts and various techniques are presented in a clear, logical, and concise manner. Various visual features are used to highlight focus areas. Complete illustrative diagrams are used to facilitate mathematical modeling of application problems. Readers are motivated by a focus on the relevance of differential equations through their applications in various engineering disciplines. Studies of various types of differential equations are determined by engineering applications. Theory and techniques for solving differential equations are then applied to solve practical engineering problems. A step-by-step analysis is presented to model the engineering problems using differential equations from physical principles and to solve the differential equations using the easiest possible method. This book is suitable for undergraduate students in engineering.

Leadership, Discourse, and Ethnicity Janet Holmes, Meredith Marra, Bernadette Vine, 2011-12-05 This is the first book in the field of workplace discourse to examine the relationships among leadership, ethnicity, and language use. Taking a social constructionist approach to the ways in which leadership is enacted through discourse, *Leadership, Discourse, and Ethnicity* problematizes the concept of ethnicity and demonstrates the importance of context-particularly the community of practice-in determining what counts as relevant in the analysis of ethnicity. The authors analyse everyday workplace interactions supplemented by interview data to examine the ways in which workplace leaders use language to achieve their transactional and relational goals in contrasting ethnicized contexts, two of which are Maori and two European/Pakeha. Their analysis pays special attention to the roles of ethnic values, beliefs and orientations in talk.

Virginia Woolf in Context Bryony Randall, Jane Goldman, 2012-12-17 Covering a wide range of historical, theoretical, critical and cultural contexts, this collection studies key issues in contemporary Woolf studies.

Pandaemonium 1660-1886 Humphrey Jennings, 2012-10-04 Collecting texts taken from letters, diaries, literature, scientific journals and reports, *Pandaemonium* gathers a beguiling narrative as it traces the development of the machine age in Britain. Covering the years between 1660 and 1886, it offers a rich tapestry of human experience, from eyewitness reports of the Luddite Riots and the Peterloo Massacre to more intimate accounts of child labour, Utopian communities, the desecration of the natural world, ground-breaking scientific experiments, and the coming of the railways. Humphrey Jennings, co-founder of the Mass Observation movement of the 1930s and acclaimed documentary film-maker, assembled an enthralling narrative of this key period in Britain's national consciousness. The result is a highly original artistic achievement in its own right. Thanks to the efforts of his daughter, Marie-Louise Jennings, *Pandaemonium* was originally published in 1985, and in 2012 it was the inspiration behind Danny Boyle's electrifying Opening Ceremony for the London Olympic Games. Frank Cottrell Boyce, who wrote the scenario for the ceremony, contributes a revealing new foreword for this edition.

The Trouble with Islam Today Irshad Manji, 2005-03-16 I have to be honest with you. Islam is on very thin ice with me.... Through our screaming self-pity and our conspicuous silences, we Muslims are conspiring against ourselves. We're in crisis and we're dragging the rest of the world with us. If ever there was a moment for an Islamic reformation, it's now. For the love of God, what are we doing about it? In this open letter, Irshad Manji unearths the troubling cornerstones of mainstream Islam today: tribal insularity, deep-seated anti-Semitism, and an uncritical acceptance of the Koran as the final, and therefore superior, manifesto of God's will. But her

message is ultimately positive. She offers a practical vision of how Islam can undergo a reformation that empowers women, promotes respect for religious minorities, and fosters a competition of ideas. Her vision revives ijtihad, Islam's lost tradition of independent thinking. In that spirit, Irshad has a refreshing challenge for both Muslims and non-Muslims: Don't silence yourselves. Ask questions---out loud. The Trouble with Islam Today is a clarion call for a fatwa-free future.

Human Identification Based on Gait Mark S. Nixon,Tieniu Tan,Rama Chellappa,2010-05-26 Human Identification Based on Gait is the first book to address gait as a biometric. Biometrics is now in a unique position where it affects most people's lives. This is especially true of gait, which is one of the most recent biometrics. Recognizing people by the way they walk and run implies analyzing movement which, in turn, implies analyzing sequences of images, thus requiring memory and computational performance that became available only recently. Human Identification Based on Gait introduces developments from distinguished researchers within this relatively new area of biometrics. This book clearly establishes how human gait is biometric. Human Identification Based on Gait is structured to meet the needs of professionals in industry, as well as advanced-level students in computer science.
