*An Introduction to the Spaceport Industry* Janet K. Tinoco, Chunyan Yu, Diane Howard, Ruth E. Stilwell, 2020-05-26 This book provides a contemporary look at spaceports, not only from relevant technological drivers, policies, and legal perspectives, but also from impacts associated with airspace use and aviation stakeholders. Economic, business, financial, and environmental considerations; issues facing airports transitioning to air and space ports; and spaceport planning are discussed. Through case and event studies, research and analysis, along with information obtained through professional experience, this book provides an overview of the many benefits, unique challenges, and issues facing commercial spaceports and spaceport operators. Each chapter is a standalone key topic such that the reader can focus on the most compelling issues relevant for them or can view the book as an integrated whole for a full perspective. While examples and case studies come largely from the United States, the reader can draw conclusions that are independent of country and situation. Information on other nation-state policies and advancements, among other topics, is provided to give a global perspective, further expanding the relevancy and benefits of the book to both domestic and international audiences. *An Introduction to the Spaceport Industry: Runways to Space* fills a gap in the literature, providing professionals, government officials, researchers, professors, and students deep insights into the fast-growing commercial spaceport industry.

Challenge to Apollo Asif A. Siddiqi,NASA History Office,2011-03-01 Taking advantage of the Soviet archives, which were opened in the 1990s, Siddiqi has written a groundbreaking work that examines why the Soviet Union fell behind in the space race of the 1960s after changing the course of human history with the first artificial satellite launch, Sputnik, in 1957.

**Emerging Space Markets** Stella Tkatchova,2018-09-04 This book analyzes the commercial space activities and commercialization processes of the last fifteen years and maps the future challenges that NewSpace companies will face developing commercial space markets. What is new and what has happened in these markets up till now? Is there a business case for private companies for commercial space? What are the targeted commercial space markets? Who are the future customers for commercial space transportation markets? How can NewSpace companies attract investors? Can we learn lessons from traditional space industries or other companies in other areas? In what way have the last fifteen years made a difference in the evolution of space markets? Is there a future for in-situ resource mining, space debris services, in-orbit satellite servicing and sub-orbital transportation? What are the lessons learned from ISS commercialization? In addition the reader will find a synopsis of several space transportation programs, commercial space markets, future Moon and Mars missions, in-situ resource exploitation concepts, space debris mitigation projects

and sub-orbital commercial markets. Major lessons learned are identified, related to the attraction of first time customers and long term R&D funding, managing technological and market risks and developing new markets and applications.

The Path of the Pole Charles H. Hapgood,1999 Hapgood's tour de force is back in print! This riveting account of how earth's poles have flipped positions many times is the culmination of Hapgood's extensive research of Antarctica, ancient maps and the geological record. This amazing

book discusses the various pole shifts in earth's history -- occurring when earth's crust slips in the inner core -- and gives evidence for each one. It also predicts future pole shifts: a planetary alignment will cause the next one on 5 May 2000! Packed with illustrations, this book is the reference other books on the subject cite over and over again. With millennium madness in full swing, this is just the book to generate even more excitement at the unknown possibilities.

**Hanging with My Peeps** Kathryn Higgs-Coulthard, 2016-03-31 Before Dad's rust-bucket lurched into the driveway with forty-three chickens in the back, the closest Sami Duggan had ever come to poultry was licking the grease off her fingers at the local KFC. Now Sami better think quick before her whole life is turned upside down by Dad's latest get rich quick scheme.

**Positive Lightning** Laurie Salzler, 2014-12-15 Kate Winter teaches dog owners how to train their canine companions. During her spare time, accompanied by her Lab, Dakota, she explores the woods and beaches on foot or horseback. She's worried that something's happening in her relationship, but she can't get her girlfriend Trish to talk to her about it. Faith Hutchins recently lost her sight after a terrible outdoor accident. She's dealt with her anger, depression, and blindness primarily on her own. A seeing-eye dog would help alleviate her reliance on anyone else, but the guide dog school has been unsuccessful in providing her with one. On a mission to find someone who will train a dog specifically for her, she ultimately zeroes in on Kate. They say lightning never strikes

the same place twice. But positive lightning is notoriously unpredictable and can ignite a fire when and where least expected . . . no matter who's in its path.
