Germany's Security Arne Schönbohm, 2012 -In his current book Arne Schonbohm is focusing on a new kind of threat that not only private individuals and companies are exposed to but also states. The risk of even leading war in cyberspace creates a need to rethink it in politics. Presenting an overall survey on background, competence and trends the book includes proposals for options of action. Being an exploratory and readable work, it captures all aspects of the subject matter and offers important impulses for handling the new challenge. Talking about Cybercrime and Cyber war this book should be the basis.- Dr. Karl Lamers Member of German Federal Parliament

The Polka Dot Century Margaret B. de Wetter, 2015-11-21 From earliest childhood, the author has lived in a rainbow world, surrounded by the astonishment of remarkable and loving adults. She rarely contemplated the realities presented by a polka dot world in which the grey and tan dominated the red and gold. Growing up in the American West where the freedom to achieve appeared unlimited, she reached for it all and embraced both the people and adventures she found at her fingertips. This is the story of her

life as it reflects the unfathomable beauty of her childhood blessed by American freedom.

Building to Suit the Climate Petra Liedl, Gerhard Hausladen, Michael Saldanha, 2012-11-05 In future, buildings that make sense from a bioclimatic perspective will not be the exception; planners will simply be expected to design them. With its wealth of facts, this book serves as a concrete aid to planning and design. With the planning process as its roadmap, it accompanies the planner from the basic evaluation stage through conception and implementation planning all the way to building operation. The building-related characteristics of the various climatic zones form the basis for the made-to-measure development of integrated building solutions. Well-conceived graphics illustrate planning contexts and facilitate efficient planning decisions and realistic predimensioning. Materials, systems, and technologies are described, and their areas of application are pointed out. Reference parameters, costs, and the presentation of interrelationships equip the planner to make a strategic and well-informed selection.

Online journalism Gabriele Hooffacker, 2022-05-11 The handbook provides tips and practical guidance on copywriting for the Internet and intranet, moving images and podcasts, social networks and communities, forms and formats of the medium, and content management processes. How does one become an online journalist? Where do online journalists work? What do they need to know: journalistic craft, Internet skills, online law? How do you write teasers? How do you integrate user activities? What role do audio and video play in the cross-media web offering? How do you ensure that your content is found (search engine optimization)? This book is a translation of an original German 5th edition *Online-Journalismus* by Gabriele Hooffacker, published by Springer VS, imprint of Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2020. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.
