Windows Video Editor Made Easy James Bernstein, 2021-06-12 Video editing software has been around for many years and for many years only people who were in the movie business or had a large budget could afford to use such software. Even when your average home videographer was able to afford their own video camera, they still had no reasonable way to edit their movies. Now that everyone has a smartphone and considers themselves a professional movie maker, the need to edit their own footage has dramatically increased. Thankfully, Microsoft has a free app built into Windows that allows anyone with a camera and a computer to make some great looking movies. If you have some basic computer skills and a little creativity, it's not too difficult to create your own movies that will make your viewers think you are a video editing pro. You can even use the footage from your smartphone to create custom videos and add all kinds of fun effects, text and music to your movies. The goal of this book is to get you up and running with the Windows Video Editor and cover all the things you need to know to get you started on making great looking videos without confusing you at the same time. It sticks with the basics yet covers a wide variety of topics to help you achieve some great looking results without needing to be a movie editing expert. The chapters in the book cover the following topics: Chapter 1 - The Video Editor Interface Chapter 2 - Importing Videos Into Your Project Chapter 3 - Editing Your Videos Chapter 4 - Exporting Your Video Chapter 5 - Settings and Additional Features

The New Digital Storytelling Bryan Alexander, 2017-07-20 Newly revised and updated, this is the essential guide to state-of-the-art digital storytelling for audiences, creators, and teachers. Written for everyone interested in the communication potential of digital media, including educators, marketers, communication professionals, and community activists, this is the ultimate guide to harnessing technology for storytelling. No other book covers the digital storytelling movement as thoroughly as this updated second edition of a popular work, nor does any incorporate as many technologies, from video to augmented reality, mobile devices to virtual reality. The book combines history, analysis, and practical guidance about digital storytelling. It begins with a history that encompasses an exploration of storytelling itself, as well as a description of narratives using digital tools from the 1980s through 2000. From there, the author dives into modern digital storytelling, offering analysis and guidance regarding the use of digital video, podcasting, social media, gaming, mobile devices, and virtual and augmented reality. The work concludes with practical advice about how to create and share digital stories using the most current tools so even the new would-be storyteller can create their first digital narrative. Of course, the second edition is updated to take into account the many ways the field has advanced since the original book appeared. With many new examples of digital stories, this edition's evidence base is current and fresh. New or transformed technologies are also addressed, including virtual reality; mobile devices that have become mainstream tools for creating, sharing, and experiencing digital stories; and the wide variety of new storytelling apps and services.

Teaching Literature to Adolescents Richard Beach, Deborah Appleman, Bob Fecho, Rob Simon, 2020-12-28 Now in its fourth edition, this popular textbook introduces prospective and practicing English teachers to current methods of teaching literature in middle and high school classrooms. This new edition broadens its focus to cover important topics such as critical race theory; perspectives on teaching fiction, nonfiction, and drama; the integration of digital literacy; and teacher research for ongoing learning and professional development. It underscores the value of providing students with a range of different critical approaches and tools for interpreting texts. It also addresses the need to organize literature instruction around topics and issues of interest to today's adolescents. By using authentic dilemmas and contemporary issues, the authors encourage preservice English teachers and their instructors to raise and explore inquiry-based questions that center on the teaching of a variety of literary texts, both classic and contemporary, traditional and digital. New to the Fourth Edition: Expanded attention to digital tools, multimodal learning, and teaching online New examples of teaching contemporary texts Expanded discussion and illustration of formative assessment Revised response activities for incorporating young adult literature into the literature curriculum Real-world examples of student work to illustrate how students respond to the suggested strategies Extended focus on infusing multicultural and diverse literature in the classroom Each chapter is organized around specific questions that preservice teachers consistently raise as they prepare to become English language arts teachers. The authors model critical inquiry throughout the text by offering authentic case narratives that raise important considerations of both theory and practice. A

companion website, a favorite of English education instructors, <http://teachingliterature.pbworks.com>, provides resources and enrichment activities, inviting teachers to consider important issues in the context of their current or future classrooms.

Teaching to Exceed in the English Language Arts Richard Beach, Ashley S. Boyd, Allen Webb, Amanda Haertling Thein, 2022-07-21 Timely, thoughtful, and comprehensive, this text directly supports pre-service and in-service teachers in developing curriculum and instruction that both addresses and exceeds the requirements of English language arts standards. It demonstrates how the Common Core State Standards as well as other local and national standards' highest and best intentions for student success can be implemented from a critical, culturally relevant perspective firmly grounded in current literacy learning theory and research. The third edition frames ELA instruction around adopting a justice, inquiry, and action approach that supports students in their schools and community contexts. Offering new ways to respond to current issues and events, the text provides specific examples of teachers employing the justice, inquiry, and action curriculum framework to promote critical engagement and learning. Chapters cover common problems and challenges, alternative models, and theories of language arts teaching. The framework, knowledge, and guidance in this book shows how ELA standards can not only be addressed but also surpassed through engaging instruction to foster truly diverse and inclusive classrooms. The third edition provides new material on: adopting a justice, inquiry, and action approach to enhance student engagement and critical thinking planning instruction to effectively implement standards in the classroom teaching literary and informational texts, with a focus on authors of color integrating drama activities into literature teaching informational, explanatory, argumentative, and narrative writing supporting bilingual/ELL students using digital tools and apps to respond to and create digital texts addressing how larger contextual and political factors shape instruction fostering preservice teacher development
