The Discursive Construction of Identities On- and Offline Birte Bös, Sonja Kleinke, Sandra Mollin, Nuria Hernández, 2018-07-23 This volume explores linguistic identity construction across online and offline contexts. The contributors focus on ‘clusivity’ as an overarching aspect and offer a multifaceted operationalisation of the linguistic processes of identity construction. The studies address three major strands of human identity, each of which can be thought of as an aggregative abstraction with its own complexities: personal identity, group identity and collective identity. The contributions pay special attention to the interplay between the public and private dimensions of the interactions and audiences, as well as the potential impact of social and technical affordances of different communicative settings and online and offline modes of identity construction. The volume is aimed at all researchers concerned with the complex notion of identity, both in linguistics and in neighbouring disciplines.

Community-Based Monitoring Initiatives of Water and Environment: Evaluation of Establishment Dynamics and Results Mohammad Gharesifard, 2021-02-25 Citizen participation in water and environmental management via community-based monitoring (CBM) has been praised for the potential to facilitate better informed, more inclusive, transparent, and representative decision making. However, methodological and empirical research trying to conceptualize and evaluate the dynamics at play that might enable or hinder these initiatives from delivering on their potential is limited. This research contributed to the conceptualization of CBMs through development of a conceptual framework that is suitable for Context analysis, Process evaluation and Impact assessment of CBMs – the CPI Framework. This conceptualization provides an interpretation of what 'community' means in the context of a CBM initiative. In addition, this research contributed to the existing empirical knowledge about the establishment, functioning and outcomes of CBMs by testing the CPI Framework for studying two real life CBMs throughout the lifetime of an EU-funded project – the Ground Truth 2.0. The first CBM is called Grip op Water Altena that focuses on the issue of pluvial floods in 'Land van Heusden en Altena' of the Netherlands. The second CBM is Maasai Mara Citizen Observatory and aims at contributing to a better balance between biodiversity conservation and sustainable livelihood management in the Mara ecosystem in Kenya.

The WhatsApp India Story Sunetra Sen Narayan, Shalini Narayanan, 2024-02-13 WhatsApp is used by over half a billion people in India today in all fields – in business, corporate and informal sectors, in government, for education and among friends, families and acquaintances. This book critically explores the social messaging app’s rapid expansion in India and its growing influence and looks at whether, as a form of horizontal communication, it poses a challenge to more traditional structures of communication. The book examines WhatsApp’s spread in the personal and professional lives of Indians and the myriad ways in which people in India are using the app in social and business interactions, including among people living with disabilities. Using case studies, interviews, surveys and in-depth research, it analyses key aspects of WhatsApp’s massive popularity and its impact on how people communicate. It also explores its impact on the psycho-social dynamics in India, including the dissemination of fake news and politically motivated content, and the consequent need for media regulation in the country. One of the first books to analyse the pervasiveness of WhatsApp and social media apps in different areas of Indian society, this book will be of interest to scholars and students of media studies, communication studies, digital media, cultural studies, cyberculture studies, sociology and social policy and media law.

The Sustainability of Financial Innovation in E-Payment Systems Deepa Jain, Manoj Kumar Dash, K.S. Thakur, 2023-07-25 The financial system is the heart of an economy and payment systems are the nerves. As we shift towards a cashless economy, it is essential to understand the perception of customers towards digital transactions to design effective and viable E-Payment Systems (EPSs).

Psychological Insights for Understanding COVID-19 and Media and Technology Ciarán Mc Mahon, 2020-12-13 In the Psychological Insights for Understanding COVID-19 series, international experts introduce important themes in psychological science that engage with people’s unprecedented experience of the pandemic, drawing together chapters as they originally appeared before COVID-19 descended on the world. This book explores how COVID-19 has impacted our relationship with media and technology, and chapters examine a range of topics including fake news, social media, conspiracy theories, belonging, online emotional lives and relationship formation, and identity. It shows the benefits media and technology can have in relation to coping with crises and navigating challenging situations, whilst also examining the potential pitfalls that emerge due to our increasing reliance on them. In a world where the cyberpsychological space is constantly developing, this volume exposes the complexities surrounding the interaction of human psychology with media and technology, and reflects on what this might look like in the future. Featuring theory and research on key topics germane to the global pandemic, the Psychological Insights for Understanding COVID-19 series offers thought-provoking reading for professionals, students, academics and policy makers concerned with the psychological consequences of COVID-19 for individuals, families and society.

Rethinking Education in the Context of Post-Pandemic South Asia Uma Pradhan, Karen Valentin, Mohini Gupta, 2023-06-20 This edited volume offers new analytical and methodological approaches to the study of education in the post-pandemic educational context, through case studies from countries in South Asia such as Bhutan, India, Nepal, Pakistan and Sri Lanka. Crossing disciplinary and national boundaries to advance collaborative knowledge production in South Asian education, the book explores how different colonial legacies, religious orientations, and positions in the global economy are played out in regional education systems. In doing so, this volume focuses on the educational challenges faced by the region to better understand South Asian society and the existing societal inequalities in the wake of COVID-19. The book highlights how the pandemic invites a re-thinking of current ways of approaching educational research in hybrid forms, and also opens up new areas of research ranging from pedagogical innovations to the well-being of teachers and students. Offering interdisciplinary perspectives on education in this unique context, this timely book will be highly relevant to students, researchers, and academics in the fields of international and comparative education, South Asian studies, teacher education, and education policy and politics.

Digital Transformation in Journalism and News Media Mike Friedrichsen, Yahya Kamalipour, 2017-05-03 This book analyzes various digital transformation processes in journalism and news media. By investigating how these processes stimulate innovation, the authors identify new business and communication models, as well as digital strategies for a new environment of global information flows. The book will help journalists and practitioners working in news media to identify best practices and discover new types of information flows in a rapidly changing news media landscape.

Digital Technologies, Elections and Campaigns in Africa Duncan Omanga, Admire Mare, Pamela Mainye, 2023-11-15 This book looks at how digital technologies are revolutionizing electoral campaigns and democratization struggles in Africa. Digital technologies are giving voice and civic agency to a cross section of African voters, providing important spaces for political engagement and debate. Drawing on cases from Kenya, Uganda, Mozambique, Nigeria, Ethiopia, and Zimbabwe amongst

others, this book traces the shifts and tensions in this changing electoral communications landscape. In doing so, the book explores themes such as hate speech and disinformation, decolonisation, surveillance, internet shutdowns, influencers, bots, algorithms, and election observation, and looks beyond Facebook, Twitter, WhatsApp and YouTube to the increasingly important role of visual platforms such as Instagram and TikTok. Particularly highlighting the contribution of African scholars, this book is an important guide for researchers across the fields of African politics, media studies, and electoral studies, as well as to professionals and policymakers in political communication.

Handbook of Research on Adapting Remote Learning Practices for Early Childhood and Elementary School Classrooms Courtney-Dattola, Ashley, 2021-12-17 Teaching is a demanding profession as there is constant fluctuation and evolution. A portion of teaching is the ability to be able to adapt to various environments, especially shifting from in-person instruction to online practices. Over the last few years, early childhood and elementary school classrooms have been thrust into hybrid and remote learning environments, and it is vital that educators and institutions adapt to new practices and create various outlets for teachers to be able to more adequately reach their young audience. The Handbook of Research on Adapting Remote Learning Practices for Early Childhood and Elementary School Classrooms is a critical resource to assist teachers as they develop online teaching practices and work to cater to young students so that they can receive the strongest benefits from their education. Through coverage of topics such as hybrid learning and parental involvement, paired with sample lesson plans, course formats, concepts, ideas, and additional components to further the body of research pertaining to remote learning, this book is tremendously beneficial to administrators, researchers, academicians, practitioners, instructors, and students.

Screenscapes of e-Religiosity in India Shekh Moinuddin, 2023-04-01 This book deals with three different subjects: geography, social media and religion equally to discuss e-religiosity in terms of screenscapes that shaped digital socialization processes wherein the role of digital devices in general and smartphones in particular are considered crucial and critical. The spatial dimension is the primary foundation of the book wherein both space and place are discussed in digital manifestations in spatial sense. Religiosity is discussed variably in a sense of spirituality, social theories, religions and images. The book uses some illustrations to understand image politics. Image politics is quintessential in the age of digital technologies when production and reproduction of images are not restricted to business only; rather it attracts politics too and politicians often use the same to make political scores against opponents. The book covers contemporary digital discourses of e-religiosity in a sense of screenscapes that often found pivot in daily discussions across social media platforms. Screenscapes are considered as mediated technologies when contents can be accessed from different social media apps to construct or deconstruct their views, narratives, discourses, ideas, emotions, and perceptions around religious images in day-to-day activities, practices, rituals, customs, traditions, faiths and beliefs. The used illustrations exclusively map Indian religious gestures, identities, values, and rituals in digital-spatial contexts. The book discusses seven major questions and argues the same across the chapters in varied representations and interpretations: How and to what extent has the meaning of religiosity changed in the digital age? What are the dimensions of e-religiosity in India? How are digital devices (re)shaping religiosity in terms of e-religiosity? How and to what extent digital devices are negotiating with social and cultural lives? What is digital spatiality? How and to what extent does social media influence religiosity?

Digitalization of Higher Education using Cloud Computing S. L. Gupta,Nawal Kishor,Niraj Mishra,Sonali Mathur,Utkarsh Gupta,2021-12-29 Digitalization of Higher Education using Cloud Computing: Implications, Risk, and Challenges provides an insight into the latest technology and tools being used to explore learning in Higher Educational Institutions (HEIs). Cloud computing, being an up-and-coming technology, integrates with academia and industry, thereby enhancing the quality of education. The opportunities and challenges faced by HEIs in recent times due to technological disruptions have forced both academia and industry to realign their strategies for survival and growth. With the acceleration of cloud computing in higher education, it has now become imperative for educators to constantly upskill and reskill in order to meet the requirements of the future of work, particularly in the digital age. Technological advancement is an unstoppable wave and the lack of relevant skills to handle the disruptions in higher education will become a huge challenge if not addressed promptly. This is the new phase of Education 4.0 where HEIs are aligning themselves using cloud computing implications, and thus are preparing both faculties and students to embrace the changes happening in the teaching and learning processes. This book focuses on multi-faceted strategies to be adopted by HEIs to deal with the emerging issues related to teaching-learning processes using cloud computing, technological interventions, curriculum overhaul, experiential learning, multi-disciplinary approaches, and continuous innovations and digitalization. The book offers comprehensive coverage of many academic areas, with the most essential topics including: • Pedagogies in digital education using a cloud environment • Risks and challenges in cloud platforms for teaching and learning • Collaborative and group learning in a cloud environment • Enhancing quality of education using e-learning methodologies The sections in this book are Cloud Enabled Digitalization of Higher Education and Innovations and Applications of Digitalization of Higher Education: A Cloud Perspective. The book will be useful for undergraduates, graduates, academicians, scholars, and policy makers. It will help readers acquire skills for a smooth transition from face-to-face teaching to cloud-based teaching.
