Communication Analysis for the Expendable Explorer Spacecraft National Aeronautics and Space Administration (NASA),2018-07-17 This report provides the results of communication analysis for the baseline and enhanced performance spacecraft designs proposed for Expendable Explorer Spacecraft (EES) series of missions. Five classes of orbits (Geosynchronous, Circular-28 degree inclination, Polar-90 degree inclination, Sunsynchronous-97 degree inclination, Molniya orbit) and a set of candidate instrument payloads provided by the ESS Study Manager were used to formulate the basis for the ESS Communications Study. The study was performed to assess the feasibility of using Space Network or ground stations for supporting the communications, tracking and data handling of the candidate instruments that are proposed to be launched into the desired orbit. Instrumentation of the Ionosphere Direct Measurements Satellite (explorer Viii). R. E. Bourdeau,J. L. Donley,E. C. JR. WHIPPLE,NATIONAL AERONAUTICS AND SPACE ADMINISTRATION WASHINGTON D C.,1962 This paper describes the ionosphere direct measurements satellite Explorer VIII, with emphasis on the physics of the experiments designed to measure electron density (RF impedance probe), electron temperature (electron temperature probe), positive ion concentration (ion current monitor), and ion mass (retarding potential probe). Experiments were also performed which measured the momentum, energy, and spatial distribution of dust particles. Experimental data presented are typical of that processed to date. Methods used by systems engineers to fulfill the special requirements imposed by the scientific experiments upon the over-all satellite design are described; and data such as the satellite's thermal and spin-decay history are reported. Of interest to spacecraft technologists concerned with the influence of the earth's magnetic field are measurements on effects of potential differences at various points on the satellite surface. A method for determining satellite aspect is also introduced. (Author).
