Rewired James Patrick Kelly, John

Kessel, 2007-10-01 Cyberpunk is dead. The revolution has been co-opted by half-assed heroes, overclocked CGI, and tricked-out shades. Once radical, cyberpunk is now nothing more than a brand. Time to stop flipping the channel. These sixteen extreme stories reveal a government ninja routed by a bicycle repairman, the inventor of digitized paper hijacked by his college crush, a dead boy trapped in a warped storybook paradise, and the queen of England attacked with the deadliest of forbidden technology: a working modem. You'll meet Manfred Macx, renegade meme-broker, Red Sonja, virtual reality sex-goddess, and Felix, humble sys-admin and post-apocalyptic hero. Editors James Patrick Kelly and John Kessel (Feeling Very Strange: The Slipstream Anthology) have united cyberpunk visionaries William Gibson, Bruce Sterling, and Pat Cadigan with the new post-cyberpunk vanguard, including Cory Doctorow, Charles Stross, and Jonathan Lethem. Including a canon-establishing introduction and excerpts from a hotly contested online debate, Rewired is the first anthology to define and capture the

crackling excitement of the post-cyberpunks. From the grittiness of Mirrorshades to the Singularity and beyond, it's time to revive the revolution.

Overclocked Cory Doctorow, 2016-10-25 Cory Doctorow straps on his miner's helmet and takes you deep into the caverns and underground rivers of pop culture, here filtered through SF-colored glasses. Enjoy.-Neil Gaiman New York Times bestselling author Cory Doctorow has been hailed as one of the freshest voices in science fiction, and this collection of intriguing novellas is yet another reason why. Have you ever wondered what it's like to live through a bioweapon attack or to have every aspect of your life governed by invisible ants? In Cory Doctorow's collection of novellas, he wields his formidable experience in technology and computing to give us mind-bending sci-fi tales that explore the possibilities of information technology-and its various uses-run amok. Anda's Game is a spin on the bizarre new phenomenon of cyber sweatshops, in which people are paid very low wages to play online games all day in order to generate in-game wealth, which can be converted into actual money. Another tale tells of the heroic exploits of sysadmins-systems administrators-as they defend the cyberworld, and hence the world at large, from worms and bioweapons. And yes, there's a story about zombies, too. He sparkles! He fizzles! He does backflips and breaks the furniture! Science fiction needs Cory Doctorow. -Bruce Sterling, award-winning author of Schismatrix Plus and The Difference Engine

In the Days of the Comet Herbert George

Wells,1906 A fantastic tale of the world's beauty and unity after the Great Change occurs.

The Purple Cloud M. P. Shiel, 2014-06-22 If now a swell from the Deep has swept over this planetary ship of earth, and I, who alone chanced to find myself in the furthest stern, as the sole survivor of her crew... What then, my God, shall I do?. The Purple Cloud is widely hailed as a masterpiece of science fiction and one of the best last man novels ever written. A deadly purple vapor passes over the world and annihilates all living creatures except one man, Adam Jeffson. He embarks on an epic journey across a silent and devastated planet, an apocalyptic Robinson Crusoe putting together the semblance of a normal life from the flotsam and jetsam of his former existence. As he descends into madness over the years, he becomes increasingly aware that his survival was no accident and that his destiny - and the fate of the human race - are part of a profound, cosmological plan.

The Hacker Crackdown Bruce Sterling, 2020-08-11 The bestselling cyberpunk author "has produced by far the most stylish report from the computer outlaw culture since Steven Levy's Hackers" (Publishers Weekly). Bruce Sterling delves into the world of high-tech crime and punishment in one of the first books to explore the cyberspace breaches that threaten national security. From the crash of AT&T's long-distance switching system to corporate cyberattacks, he investigates government and law enforcement efforts to break the back of

America's electronic underground in the 1990s. In this modern classic, "Sterling makes the hackers—who live in the ether between terminals under noms de net such as VaxCat—as vivid as Wyatt Earp and Doc Holliday. His book goes a long way towards explaining the emerging digital world and its ethos" (Publishers Weekly). This edition features a new preface by the author that analyzes the sobering increase in computer crime over the twenty-five years since *The Hacker Crackdown* was first published. "Offbeat and brilliant."

—Booklist "Thoroughly researched, this account of the government's crackdown on the nebulous but growing computer-underground provides a thoughtful report on the laws and rights being defined on the virtual frontier of cyberspace. . . . An enjoyable, informative, and (as the first mainstream treatment of the subject) potentially important book . . . Sterling is a fine and knowledgeable guide to this strange new world."

—Kirkus Reviews "A well-balanced look at this new group of civil libertarians. Written with humor and intelligence, this book is highly recommended." —Library Journal

Accelerando Charles Stross, 2005-07-05 The Singularity. It is the era of the posthuman. Artificial intelligences have surpassed the limits of human intellect. Biotechnological beings have rendered people all but extinct. Molecular nanotechnology runs rampant, replicating and reprogramming at will. Contact with extraterrestrial life grows more imminent with each new day. Struggling to survive and thrive in this accelerated world are three generations of

the Macx clan: Manfred, an entrepreneur dealing in intelligence amplification technology whose mind is divided between his physical environment and the Internet; his daughter, Amber, on the run from her domineering mother, seeking her fortune in the outer system as an indentured astronaut; and Sirhan, Amber's son, who finds his destiny linked to the fate of all of humanity. For something is systematically dismantling the nine planets of the solar system. Something beyond human comprehension. Something that has no use for biological life in any form...

The Mammoth Book of Extreme Science Fiction Mike Ashley, 2010-07-31 Here are 25 stories of science fiction that push the envelope, by the biggest names in an emerging new crop of high-tech futuristic SF - including Charles Stross, Robert Reed, Alastair Reynolds, Peter Hamilton and Neal Asher. High-tech SF has made a significant comeback in the last decade, as bestselling authors successfully blend the super-science of 'hard science fiction' with real characters in an understandable scenario. It is perhaps a reflection of how technologically controlled our world is that readers increasingly look for science fiction that considers the fates of mankind as a result of increasing scientific domination. This anthology brings together the most extreme examples of the new high-tech, far-future science fiction, pushing the limits way beyond normal boundaries. The stories include: A Perpetual War Fought Within a Cosmic String, A Weapon That Could Destroy the Universe, A Machine That Detects Alternate Worlds and Creates a Choice

of Christs, An Immortal Dead Man Sent To The End of the Universe, Murder in Virtual Reality, A Spaceship So Large That There is An Entire Planetary System Within It, and An Analytical Engine At The End of Time, and Encountering the Untouchable.

The Poison Belt Arthur Conan Doyle, 2018-01-26
Nothing could be done. The thing was universal and beyond our human knowledge or control. It was death for young and old, for weak and strong, for rich and poor, without hope or possibility of escape. Must Professor George Challenger and friends, barricaded in a room, see Earth die? As globe passes through a belt of poisonous ether, terror sweeps mankind; cities riot; communications cease.

Cyberpunk Victoria, 2013-03-12 Cyberpunk has brought us films like *Blade Runner*, *Tron*, and *The Matrix*, and it has brought us now-classic novels like *Snow Crash* and *Neuromancer*. It continues to be a powerful theme in contemporary literature as writers imagine a gritty, dark, wild, and wicked future where body modification, seedy elements, omniscient corporations, and a few down-luck anti-heroes are always having it out. Inside the covers of this book, readers find stories by the best and the finest cyberpunk writers – from foundational authors like Bruce Sterling and William Gibson to new voices like Cory Doctorow – all of whom write with the fire and zeal that powers the best

cyberpunk writing. Here are stories about society gone wrong and society saved, about soulless humans and soulful machines, about futures worth fighting for and futures that do nothing but kill. Welcome to your cyberpunk world. Welcome to your cyberpunk world.

Makers Cory Doctorow, 2009-10-27 Perry and Lester invent things: seashell robots that make toast, Boogie Woogie Elmo dolls that drive cars. They also invent entirely new economic systems. When Kodak and Duracell are broken up for parts by sharp venture capitalists, Perry and Lester help to invent the New Work, a New Deal for the technological era. Barefoot bankers cross the nation, microinvesting in high-tech communal mini-startups. Together, they transform the nation and blogger Andrea Fleeks is there to document it. Then it slides into collapse. The New Work bust puts the dot-bomb to shame. Perry and Lester build a network of interactive rides in abandoned Walmarts across the land. As their rides gain in popularity, a rogue Disney executive engineers a savage attack on the rides by convincing the police that their 3D printers are being used to make AK-47s. Lawsuits multiply as venture capitalists take on a new investment strategy: backing litigation against companies like Disney. Lester and Perry's friendship falls to pieces when Lester gets the fatkins treatment, which turns him into a sybaritic gigolo. Then things get really interesting. With a Little Help Cory Doctorow, 2015-07-16 With

a Little Help is my first serious experiment in self-publishing. I've published many novels, short story collections, books of essays and so on with publishers, and it's all been very good and satisfying and educational and so on, but it seems like it's time to try something new. With a Little Help consists of 12 stories, all reprints except for Epoch (commissioned by Mark Shuttleworth).

Homeland Cory Doctorow, 2013-02-05 In Cory Doctorow's wildly successful Little Brother, young Marcus Yallow was arbitrarily detained and brutalized by the government in the wake of a terrorist attack on San Francisco—an experience that led him to become a leader of the whole movement of technologically clued-in teenagers, fighting back against the tyrannical security state. A few years later, California's economy collapses, but Marcus's hacktivist past lands him a job as webmaster for a crusading politician who promises reform. Soon his former nemesis Masha emerges from the political underground to gift him with a thumbdrive containing a Wikileaks-style cable-dump of hard evidence of corporate and governmental perfidy. It's incendiary stuff—and if Masha goes missing, Marcus is supposed to release it to the world. Then Marcus sees Masha being kidnapped by the same government agents who detained and tortured Marcus years earlier. Marcus can leak the archive Masha gave him—but he can't admit to being the leaker, because that will cost his employer the election. He's surrounded by friends who remember what he did a few years ago and regard him as a hacker hero. He can't even attend a demonstration without being dragged

onstage and handed a mike. He's not at all sure that just dumping the archive onto the Internet, before he's gone through its millions of words, is the right thing to do. Meanwhile, people are beginning to shadow him, people who look like they're used to inflicting pain until they get the answers they want. Fast-moving, passionate, and as current as next week, *Homeland* is every bit the equal of *Little Brother*—a paean to activism, to courage, to the drive to make the world a better place. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Barrelhouse Words Stephen Calt, 2010-10-01 This fascinating compendium explains the most unusual, obscure, and curious words and expressions from vintage blues music. Utilizing both documentary evidence and invaluable interviews with a number of now-deceased musicians from the 1920s and '30s, blues scholar Stephen Calt unravels the nuances of more than twelve hundred idioms and proper or place names found on oft-overlooked race records recorded between 1923 and 1949. From aggravatin' papa to yas-yas-yas and everything in between, this truly unique, racy, and compelling resource decodes a neglected speech for general readers and researchers alike, offering invaluable information about black language and American slang.
