### Cyborgs, Santa Claus and Satan Fraser A.

Sherman,2015-09-03 In the three decades since the first SF film produced for television—1968's *Shadow on the Land*—nearly 600 films initially released to television have had science fiction, fantasy, or horror themes. Featuring superheroes, monsters, time travel, and magic, these films range from the phenomenal to the forgettable, from low-budget to blockbuster. Information on all such American releases from 1968 through 1998 is collected here. Each entry includes cast and credits, a plot synopsis, qualitative commentary, and notes of interest on aspects of the film. Appendices provide a list of other films that include some science fiction, horror, or fantasy elements; a film chronology; and a guide to alternate titles.

### A Prehistory of South America Jerry D. Moore,2014-07-09 A

Prehistory of South America is an overview of the ancient and

historic native cultures of the entire continent of South America based on the most recent archaeological investigations. This accessible, clearly written text is designed to engage undergraduate and beginning graduate students in anthropology. For more than 12,000 years, South American cultures ranged from mobile hunters and gatherers to rulers and residents of colossal cities. In the process, native South American societies made advancements in agriculture and economic systems and created great works of art—in pottery, textiles, precious metals, and stone—that still awe the modern eye. Organized in broad chronological periods, *A Prehistory of South America* explores these diverse human achievements, emphasizing the many adaptations of peoples from a continent-wide perspective. Moore examines the archaeologies of societies across South America, from the arid deserts of the Pacific coast and the frigid Andean highlands to the humid lowlands of the Amazon Basin and the fjords of Patagonia and beyond. Illustrated in full color and suitable for an educated general reader interested in the Precolumbian peoples of South America, *A Prehistory of South America* is a long overdue addition to the literature on South American archaeology.

**Yes, There Is a Santa Claus** Erik Raichle, 2012-11-21

Revolutionary, new holiday book identifies Santa Claus Mr. Erik Raichle's new book will change the way we think of Santa Claus because he knows who Santa is and why every living thing on this good earth loves and needs him. In the spirit of Frank Church and Henry Livingston, Mr. Raichle unwraps, page by page, the secrets behind the Santa Claus myth and reveals a personage more powerful than the myth. Never, in the history of holiday literature, has there been a book of this caliber. It will revolutionize the season.

*Earth Beings* Marisol de la Cadena, 2015-09-21 *Earth Beings* is the fruit of Marisol de la Cadena's decade-long conversations with Mariano and Nazario Turpo, father and son, runakuna or Quechua people. Concerned with the mutual entanglements of indigenous and nonindigenous worlds, and the partial connections between them, de la Cadena presents how the Turpos' indigenous ways of knowing and being include and exceed modern and nonmodern practices. Her discussion of indigenous political strategies—a realm that need not abide by binary logics—reconfigures how to think about and question modern politics, while pushing her readers to think beyond hybridity and toward translation, communication that accepts incommensurability, and mutual difference as conditions

for ethnography to work.

**Global Environment Outlook – GEO-6: Healthy Planet, Healthy People** UN Environment, 2019-06-06 Published to coincide with the Fourth United Nations Environmental Assembly, UN Environment's sixth Global Environment Outlook calls on decision makers to take bold and urgent action to address pressing environmental issues in order to protect the planet and human health. By bringing together hundreds of scientists, peer reviewers and collaborating institutions and partners, the GEO reports build on sound scientific knowledge to provide governments, local authorities, businesses and individual citizens with the information needed to guide societies to a truly sustainable world by 2050. GEO-6 outlines the current state of the environment, illustrates possible future environmental trends and analyses the effectiveness of policies. This flagship report shows how governments can put us on the path to a truly sustainable future - emphasising that urgent and inclusive action is needed to

achieve a healthy planet with healthy people. This title is also available as Open Access on Cambridge Core.

*How Santa Became EcoSanta* Ann Palmer, 2020-10-19 A lovely Christmas gift for the ecologically minded child. Mythologically, Santa Claus has been giving gifts to children every Christmas for many many years. We all like to say 'thank-you' in some way for gifts. It's not just about being polite. It opens our hearts and is part of the feel-good package. A drink and a mince pie left by the chimney is kind. But how much kinder it is to reciprocate by giving something tangible. This is why Ecologists, the Young People's International Anti-litter Charity, came up with the idea of promoting, publicising and popularising the idea of EcoSanta. 'Once his sack is empty, EcoSanta is asking children, worldwide to help him fill it with rubbish the rest of the year as a

Gift to the Earth.' When I first 'floated' this idea to young mums I know, a slow smile spread across their faces, accompanied by the words 'That's a lovely idea'. Ecologists have many different projects, all of which are headed up by EcoSanta, and his philosophy of life. Which is very simple. Anyone can litter-pick. It needs no qualifications or special skills. In a Humorously Captioned Photography Competition Ecologists ran locally for two years, one of the winning photographs was of a year old baby with a piece of litter. It's very easy to stay in a positive state of mind while litter-picking. Either make up humorous captions for the items you pick up. Or, better still, let the task be accompanied by the intention that what you are doing is saving an animal's life, or preventing its suffering. It is in the small acts of caring that great change can be achieved. How Santa became EcoSanta is a simple story in the classic tradition of having an animal helper to assist the Key character in his quest. Rudolf fills this role naturally. Like many animals, Rudolf is sensitive to the environment in a way that humans rarely are. So it becomes Rudolf's task to persuade Santa to embrace a new identity as EcoSanta. Historically, this is no big deal. Since his first incarnation as St Francis of Assisi, Father Christmas has morphed and shape-shifted his identity many times.

He was definitely 'green' to start with. Coca-cola dressed him in his red outfit, and that's the one most of us know and instantly recognise today. His character-change to EcoSanta is rather like coming full circle. Yet with an intention it will develop into a spiral where EcoSanta will be the new persona of the most famous gift-giver of the Western world in our secular age. Consumerism is a fact of our era, and it takes time to change perceptions and ideas to fit a new ecological reality. This is why a children's story in the classic style offers a good vehicle to introduce the very young to the 'facts of the world they are entering' in the nicest way possible. We all like to help if we can. To give young people responsibility has been proven, many times, to be the right thing to do. To help the child grow, feel important, feel he or she is contributing meaningfully, and on a par with adults. They are ready and willing to do this long before they leave secondary school or university. Our world oceans are a very precious resource. My hope, in writing this book, is that the phrase 'We're all in this together' can be extended to include the natural world. So that we all feel, quite naturally, the need to look after and protect the whole planet. In some countries, there is no litter. Equally, one day we could have a litter-free planet. It is those little acts of caring by thousands of

individuals, and individual children, who will make the difference. This way of thinking is already well-seeded in the world today. The children's book, 'How Santa became EcoSanta' with its gorgeous illustrations, offers the young child instant access to a new zeitgeist, the upcoming way to see our place on the fragile planet we all share.

Peace on Earth Kenneth Rex Larsen, 2011-11-02 It is

Christmas Eve and the Vanity Fair Mall Santa Claus is nearly

finished being jolly old Saint Nicholas for another year. But there is something different about this Santa. He is renting a body from mortal Ken Larsen. Santa listens carefully to Christmas wishes and speaks words of wisdom to each child, but when ten-year-old Billy Mitchell sits on his lap and asks for world peace, Santa suddenly realizes it is the one wish he is unable to grant. After Ken's shift as Santa ends, he heads to his girlfriend Sandy's home with his red bag on his shoulder. They exchange gifts, and it seems like a peaceful Christmas Eve until the doorbell rings. Suddenly Ken finds himself precariously perched on a dilapidated fire escape outside Sandy's window-with her jealous husband inside. Things go from bad to worse when Ken slips on the icy platform and plunges to his death. But all is not lost when Ken meets Jesus and learns he must return to his body and travel to Israel and help the world make peace. Limited only by Santa's rules, Ken must do everything within his newfound spiritual powers to grant Billy's wish. In this fictional parable, one man holds the weight of the world on his shoulders as he makes an unprecedented attempt to achieve worldwide peace.
