A Grammar of Igala Ejeba, Salem Ochala, 2017-01-17 The book establishes 28 phonemic consonants and 7 vowels, as well as lexical and grammatical tones in Igala. It shows the canonical syllable types as V and CV with no complexity, and relates resyllabification to the retiming of segments as tone bearing units and the duration of their mora. The work discusses nine word classes, as well as ideophones and clitics in Igala. There are splitting verbs of various structures and fully-fledged pronouns with morphologically toneless clitic counterparts that are toned in their syntactic context, among other elements of the Igala morphology. The work establishes clitics as generally bearing the grammatical tones of various categories as a result of their morphological tonelessness and their availability for post-lexical tone assignment. It also accounts for the generally complex interaction of clitics and tones in the organisation of the morphosyntax and the tone-syntax interface. Igala has both verbal and nominal extensional affixes with various semantic features. Some interesting discussions in the Igala syntax include the structural and functional types of serial verb constructions, the detransitivizing process of verb movement in object demoting structures, coreferentiality in relativised constituents and the future/non-future temporal distinction. Complementary binominals are conjoined with a specified binominal morpheme, and their rigidly irreversible structures have implications in the Igala semantics. The binominals demonstrate a grammatically specified pattern defined over a conceptual space, showing the network among conceptual categories, such as kinship, marital, social, hunter-hunted, more-less and cause-effect relationships as reflected in the Igala grammar.

Protecting Powers Judith Masson, 2007-09-24 The book is based on two research projects on emergency intervention, which were carried out by the author and her colleagues. The studies

provide the basis for the three themes in the book: Inter-agency Working; Perceptions of Safety; and Placement and Resource Issues. The combination of quantitative and qualitative research allows a detailed picture of practice that goes beyond an account of what happens, to explore the perceptions, understandings and experiences of the practitioners who make these decisions, as social workers, police officers magistrates' legal advisers or magistrates, and of the lawyers who advise social workers and parents. The book provides a critical account of current practice in emergency child protection, it identifies good practice and make proposals for reform.

An Introduction to Child Language Development Susan H. Foster- Cohen, 2014-06-17 This volume introduces the field of child language development studies, and presents hypotheses in an accessible, largely non-technical language, aiming to demonstrate the relationship between these hypotheses and interpretations of data. It makes the assumption that having a theory of language development is as important as having reliable data about what children say and understand, and it

advocates a combination of both 'rationalist' and more 'empiricist' traditions. In fact, the author overtly argues that different traditions provide different pieces of the picture, and that taking any single approach is unlikely to lead to productive understanding. Susan Foster-Cohen explores a range of issues, including the nature of prelinguistic communication and its possible relationship to linguistic development; early stages of language development and how they can be viewed in the light of later developments; the nature and role of children's experience with the language(s) around them; variations in language development due to both pathological and non-pathological differences between children, and (in the latter case) between the languages they learn; later oral language development; and literacy. The approach is distinctly psycholinguistic and linguistic rather than sociolinguistic, although there is significant treatment of issues which intersect with more sociolinguistic concerns (e.g. literacy, language play, and bilingualism). There are exercises and discussion questions throughout, designed to reinforce the ideas being presented, as well as to offer the student the opportunity to think beyond the text to ideas at the cutting edge of research. The accessible presentation of key issues will appeal to the intended undergraduate readership, and will be of interest to those taking courses in language development, linguistics, developmental psychology, educational linguistics, and speech pathology. The book will also serve as a useful introduction to students wishing to pursue post-graduate courses which deal with child language development.

Family Group Conferencing Gale Burford, Joe Hudson, Family Group Conferencing indicates a large-scale shift in assumptions about the way child welfare services are planned and delivered—away from models that emphasize pathology, and toward those seeking an ecological understanding of the families and social networks involved. The contributors also present a wealth of information on related approaches, such as community conferences, circles, and wraparound services. The British Journal of Social Work noted that “there are issues relating to both process and outcome. This book offers some answers that are intelligent and passionate.”

Women and Poverty in 21st Century America Paula vW. Dáil, 2011-12-22 Despite an overhaul in the 1990s, the American welfare system remains with a business model focused on the bottom line. Crafted by male-dominated legislative bodies whose members most likely never had to choose between paying the rent or feeding their kids, established policies primarily protect the popular programs that ensure politicians' re-election. This book offers a feminist perspective on the 21st century attitude toward poverty, illustrated by the words of women forced to live every day with social policies they had no voice in developing. Topics include the struggles of daily life, crime, health care, education, employment, and a discussion of capitalism, inequality, greed, and moral obligation in a free society. In the unrestrained pursuit of wealth, this work shows that America has created a vast poverty problem, making the rich richer and forcing the poor into a forgotten class.

The State of the World's Children 2006 UNICEF., 2005 The 2006 edition of UNICEF's annual report focuses on the millions of children who are most in need of access to essential education,

health and protection services, but who are also the hardest to reach and often overlooked by current development programmes. These include children living in the poorest countries and most deprived communities within countries, children who face discrimination on the basis of gender, ethnicity or disability, children caught up in armed conflicts or affected by HIV/AIDS, children who lack a formal identity and who suffer from abuse and exploitation. The report examines the factors which result in their exclusion from current child development programmes and services, and highlights the policy options and actions required to address these challenges, in order to ensure all children benefit from the progress being made to achieve the Millennium Development Goals. Topics discussed include: income disparities and child survival, the marginalisation of Roma communities and their children, disability issues, children and HIV/AIDS, children living on the streets, early marriages, child labour, child protection and child rights.
