A. J. Brown

How to Whistle Like a Pro David Harp,Jason Serinus,1989 Discusses breath control, pitch, tone, and musicianship, and includes recordings by professional whistlers.

Whistleblowing in the Australian Public Sector A. J. Brown,2008-09-01 The product of one of the world's most comprehensive research projects on whistleblowing, evidence from over 8,000 public servants in over 100 federal, state and local government agencies shows that whistleblowers can and do survive, and that often their role is highly valued. Public sector managers face significant challenges in better managing and protecting whistleblowers. There is great variation between the many public agencies making the effort, and the many agencies where the outcomes - for managers and whistleblowers alike - are still likely to be grim. This book is compulsory reading for all public sector managers who wish to turn this negative trend around, and for anyone interested in public accountability generally.

Goal-based Decision Making Stephen Slade,2013-06-17 This work presents a goal-based model of decision making in which the relative priorities of goals drive the decision process -- a psychological alternative to traditional decision analysis. Building on the work of Schank and Abelson, the author uses goals as the basis for a model of interpersonal relations which permits decisions to incorporate personal and adopted goals in a uniform manner. The theory is modelled on the VOTE computer program which simulates Congressional roll-call voting decisions. The VOTE program expands traditional decision making and simulation models by providing not only a choice, but also a natural language explanation, in either English or French. It simulates real members of Congress voting on real bills, and producing reasonable explanations. The program is consistent with much of the descriptive political science literature on Congressional decision making and provides an explicit model of political issues, relationships, and strategies that converge in voting behavior. In developing the VOTE program, the author draws on his own practical experience in politics from four presidential campaigns and the White House. Given the underlying psychological basis of the program, VOTE can be extended to other decision making domains different from politics. Another use for the program is to simulate business decisions such as securities analysis, as well as mundane decision making such as choosing a college or deciding whether to get a Mohawk haircut.
