Sustainable Tourism Futures Stefan Gössling, C. Michael Hall, David Weaver, 2009-01-13 A global industry and an important tool for economic development, international tourism is facing an increasingly uncertain future. Global environmental change, including climate change; increasing fuel prices; and growing criticism from environmental and social interest groups are posing

substantial challenges to the belief that international tourism can be sustainable at current rates and patterns of growth. This book therefore aims to answer the questions of if and how tourism can be a sustainable industry. The book concludes that sustainable tourism is possible but that it requires fundamental shifts in operations, systems and philosophies. The various contributions identify a number of means by which this can be accomplished but stress that sustainable tourism still has a long way to travel before it can reach its destination.

Winter Tourism Ulrike Pröbstl-Haider, Harold Richens, Stefan Türk, 2019-10-03 Winter tourism has seen increased levels of investment in recent times, in an effort to reduce economic risk, address environmental concerns and adapt to the effects of global warming. New ski destinations are developing and merging with traditional ones to increase spatial distribution, while many established leading resorts are adapting their management models. Climate change adaptation processes are supported by the reduction of CO2 emissions and energy consumption in ski resorts. Current planning challenges include the increasing importance of scenic beauty, nature and sustainable development, as well as snow reliability, snow management and safety issues.

Urbanizing the Alps Fiona Pia, 2019-01-14 For plenty years, many popular mountain resorts have seen largely uncontrolled development consisting of the multiplication of archetypal chalet-style houses. This is usually accompanied by roadbuilding for private cars. In order to protect these tourist destinations and their natural environs from further uncontrolled development, the author investigates different settlement structures such as Andermatt, Avoriaz, Verbier, Zermatt, and Whistler-Blackcomb. On the basis of detailed graphical analyses, she develops groundbreaking strategies for urban densification and suitable mobility management, which can also be transferred to other tourist areas.
