Who's Got Your Back Keith Ferrazzi, 2009-05-19 Disregard the myth of the lone professional "superman" and the rest of our culture's go-it alone mentality. The real path to success in your work and in your life is through creating an inner circle of "lifeline relationships" - deep, close relationships with a few key trusted individuals who will offer the encouragement, feedback, and generous mutual support every one of us needs to reach our full potential. Whether your dream is to lead a company, be a top producer in your field, overcome the self-destructive habits that hold you back, lose weight or make a difference in the larger world, *Who's Got Your Back* will give you the roadmap you've been looking for to achieve the success you deserve. Keith Ferrazzi, the internationally renowned thought leader, consultant, and bestselling author of *Never Eat Alone*, shows us that becoming a winner in any field of endeavor requires a trusted team of advisors who can offer guidance and help to hold us accountable to achieving our goals. It is the reason PH.D candidates have advisor teams, top executives have boards, world class athletes have fitness coaches, and presidents have cabinets. In this step-by-step guide to the powerful principles behind personal growth and change, you'll learn how to: · Master the mindsets that will help you to build deeper, more trusting "lifeline relationships" · Overcome the career-crippling habits that hold you back, once and for all · Get further, faster by setting goals in a dramatically more powerful way · Use "sparring" as a productive tool to make the decisions that will fuel personal success · Replace the yes men in your life with those who get it and care - and will hold you accountable to achieving your goals · Lower your guard and let others help! None of us can do it alone. We need the perspective and advice of a trusted team. And in *Who's Got Your Back*, Keith Ferrazzi shows us how to put our own "dream team" together.

Popular Mechanics Who's Spying On You? Erik Sofge, Davin Coburn, 2013-01-02 Its not paranoia; we ARE being watched. Today, thanks to technology and new media--cell phone GPS, backscatter scanners, online financial transactions, cloud-stored medical records, Facebook and Twitter--our every activity can be quietly monitored. And now that inexpensive gene sequencing seems imminent, even our bodies secrets may be up for grabs. This groundbreaking investigation shows how Americas privacy is under assault--and what we can do to protect ourselves. Covering everything from the News of the World hacking scandal to identity and credit theft, *Popular Mechanics Whos Spying On You?* features stories of real people whose privacy has been violated. It looks at the technology powering those intrusions, reveals the advances in security that may eventually protect us, and thoroughly explores the social and legal ramifications of our increasingly complex and high-tech society. A final chapter offers direct, service-oriented tips to safeguard privacy, along with an exploration of how a new, post-private generation willingly surrenders personal information--and the potential pitfalls and benefits of broadcasting your life on your own terms.

Who's Raising the Kids? Susan Linn, 2022-09-13 From a world-renowned expert on creative play and the impact of commercial marketing on children, a timely investigation into how big tech is hijacking childhood--and what we can do about it "Engrossing and insightful . . . rich with details that paint a full portrait of contemporary child-corporate relations." --Zephyr Teachout, *The New York Times Book Review* Even before COVID-19, digital technologies had become deeply embedded in children's lives, despite a growing body of research detailing the harms of excessive immersion in the unregulated, powerfully seductive world of the "kid-tech" industry. In the "must read" (*Library Journal*, starred review) *Who's Raising the Kids?*, Susan Linn--one of the world's leading experts on the impact of Big Tech and big business on children--weaves an "eye-opening and disturbing exploration of how marketing tech to children is creating a passive, dysfunctional generation" (*Kirkus Reviews*, starred review). From birth,

kids have become lucrative fodder for tech, media, and toy companies, from producers of exploitative games and social media platforms to “educational” technology and branded school curricula of dubious efficacy. Written with humor and compassion, *Who’s Raising the Kids?* is a unique and highly readable social critique and guide to protecting kids from exploitation by the tech, toy, and entertainment industries. Two hopeful chapters—“Resistance Parenting” and “Making a Difference for Everybody’s Kids”—chart a path to allowing kids to be the children they need to be.

Digital Business Models Sébastien Ronteau,Laurent Muzellec,Deepak Saxena,Daniel Trabucchi,2022-12-19 A business model basically describes the way a company makes money. Yet, often we use digital services for free (e.g. Facebook, Google or WhatsApp) or for what seems to be a relatively minor price (e.g. Blablacar, Airbnb, and Amazon). Digital business models are different to traditional business models. *Digital Business Models* explains the key challenges and characteristics of the various business models that are used by digital businesses. These companies can be a source of inspiration for traditional bricks-and-mortar companies that aim to go digital and/or revamp their traditional business model. Most businesses rely on some form of digital technology for their marketing communication, customer relationship management, supply chain or distribution, yet digital transformation entails a complete reassessment of the way value is created and captured. *Digital Business Models* details the successful customer acquisition tactics and the development of business ecosystems by digital players. Using the relevant academic and managerial body of knowledge, the authors define the concepts, describe the various ways digital businesses create and capture value and propose some useful tools for managers to analyse a situation, formulate or implement a strategy. Different digital business types are evaluated, such as multisided platforms, digital merchants, subscription-based model, freemium, social media and sharing economy. Each chapter is illustrated with several examples and the appendix comprises four full-length case studies.

Who's in Charge? Ownership and Conditionality in IMF-Supported Programs Mr.James M. Boughton,2003-09-01 IMF lending is conditional on a country's commitment to carry out an agreed program of economic policies. Unless that commitment is genuine and broadly held, the likelihood of implementation will be poor. Is there a conflict between national commitment and conditional finance? Are national authorities or other agents in the country less likely to own a reform program simply because it is conditionally financed? This paper argues that potential conflicts are reduced when program design takes the country's interests and circumstances into account and when conditionality results from a genuine process of interaction between the IMF and the borrower.

Sonic Sovereignty Liz Przybylski,2023-07-25 What does sovereignty sound like? *Sonic Sovereignty* considers how contemporary Indigenous musicians champion self-determination through musical expression in Canada and the United States. The framework of “sonic sovereignty” connects self-definition, collective determination, and Indigenous land repatriation to the immediate and long-lasting effects of expressive culture. Liz Przybylski covers online

and offline media spaces, following musicians and producers as they, and their music, circulate across broadcast and online networks. Przybylski documents and reflects on shifts in both the music industry and political landscape over the course of a decade: as the ways in which people listen to, consume, and interact with popular music have radically changed, extensive public conversations have flourished around contemporary Indigenous culture, settler responsibility, Indigenous leadership, and decolonial futures. Sonic Sovereignty encourages us to experiment with temporal possibilities of listening by detailing moments when a sample, lyric, or musical reference moves a listener out of normative time. Nonlinear storytelling practices from hip hop music and other North American Indigenous sonic practices inform these generative listenings. The musical readings presented in this book thus explore how musicians use tools to help listeners embrace rupture, and how out-of-time listening creates decolonial possibilities.

The Attention Merchants Tim Wu,2017-09-19 From the author of the award-winning *The Master Switch*, who coined the term "net neutrality"—a revelatory, ambitious and urgent account of how the capture and re-sale of human attention became the defining industry of our time. Dazzling. —Financial Times Ours is often called an information economy, but at a moment when access to information is virtually unlimited, our attention has become the ultimate commodity. In nearly every moment of our waking lives, we face a barrage of efforts to harvest our attention. This condition is not simply the byproduct of recent technological innovations but the result of more than a century's growth and expansion in the industries that feed on human attention. Wu's narrative begins in the nineteenth century, when Benjamin Day discovered he could get rich selling newspapers for a penny. Since then, every new medium—from radio to television to Internet companies such as Google and Facebook—has attained commercial viability and immense riches by turning itself into an advertising platform. Since the early days, the basic business model of "attention merchants" has never changed: free diversion in exchange for a moment of your time, sold in turn to the highest-bidding advertiser. Full of lively, unexpected storytelling and piercing insight, *The Attention Merchants* lays bare the true nature of a ubiquitous reality we can no longer afford to accept at face value.

Pain Management in the Postpartum Period, An Issue of Clinics in Perinatology Randall Flick,James R. Hebl,2013-09-25 This issue of *Clinics in Perinatology* will carry the reader through the perinatal period and examine pain management throughout that continuum. Beginning with the genetics of obstetrical pain and opioid use

in pregnancy, the discussion moves to the provision of anesthesia to the mother and fetus during fetal surgery - an area of intense concern and interest in many centers. There is an extensive discussion of both pharmacologic and non-pharmacologic management of pain during delivery. A discussion of regional anesthetic techniques is increasingly relevant in light of increasing evidence of adverse neurodevelopmental consequences of fetal exposure to general anesthetics and sedatives. Pain, its implications and management, are extensively covered including discussions of how to assess neonatal pain and how best to provide sedation and non-pharmacologic pain management, systemic pharmacologic, or regional techniques. Of particular interest are the reviews of the potential neurodevelopmental impact of both the treatment and the failure to adequately treat pain in the newborn. This topic is receiving an enormous amount of attention from all those who care for children as well as government and the media.
