The Smart Money Michael Konik, 2006-11-14 A riveting inside look at the lucrative world of professional high-stakes sports betting by a journalist who lived a secret life as a key operative in the world's most successful sports gambling ring. When journalist Michael Konik landed an interview with Rick Big Daddy Matthews, the largest bet he'd placed on a sporting event was \$200. Konik, an expert blackjack and poker player, was no stranger to Vegas. But Matthews was in a different league: the man was rumored to be the world's smartest sports bettor, the mastermind behind the Brain Trust, a shadowy group of gamblers known for their expertise in beating the Vegas line. Konik had heard the word on the street -- that Matthews was a snake, a conniver who would do anything to gain an edge. But he was also brilliant, cunning, and charming. And when he asked Konik if he'd like to make a little money during the football season, the writer found himself seduced . . . So began Michael

Konik's wild ride as an operative of the elite Brain Trust. In *The Smart Money*, Konik takes readers behind the veil of secrecy shrouding the most successful sports betting operation in America, bypassing the myths and the rumors, going all the way to its innermost sanctum. He reveals how they -- and he -- got rich by beating the Vegas lines and, ultimately, the multimillion-dollar offshore betting circuit. He details the excesses and the betrayals, the horse-trading and the paranoia, that are the perks and perils of a lifestyle in which staking inordinate sums of money on the outcome of a single event -- sometimes as much as \$1 million on a football game -- is a normal part of doing business.

Any Given Day Charles Ruffin, 2009-11 The object of this book, *Any Given Day*, is to take the gamble out of sports gambling. The statistical probability system explained in this book is an objective system based on simple math and statistics. This along with the types of wagers, money management and the who, why and how to bet will make you a winner. You would have been a 71% winner or better in NFL Football over the past seven years. Over the last four years in NBA Basketball, you would have been an 86% winner. There will no longer be any need to pay for tips since you will be a great handicapper. Remember this system has been checked over thousands of games played over many years. Hey, by the way, the system picked the St. Louis Rams to beat the Tennessee Titans in the Super Bowl in 1999 by seven points. And they did! After reading this book, you will have a better

knowledge of coaching and of football and basketball.

Banker, a veteran of over 40 years in sports betting, focuses on betting football, basketball, baseball and boxing. He discusses what it was like in the pre-computer days and how information was gathered, evaluated and bet on. He gives his insights on why it's important to know how to watch a game on television, his views on handicapping services, his reasoning for when to be early or late and his insight into fixed games. Both a how-to bet and a history lesson, this book covers how to survive, how to manage your money and how tough it is to sustain a winning percentage and make a living over the long run.

We Own This Game Robert Andrew Powell,2007-12-01 A Sports Illustrated Best Book of the Year: "Vivid portraits of the kids, parents and coaches of the Greater Miami Pop Warner league" (Linda Robertson, The Miami Herald). Although its participants are still in grade school, Pop Warner football is

serious business in Miami, where local teams routinely advance to the national championships. Games draw thousands of fans; recruiters vie for nascent talent; drug dealers and rap stars bankroll teams; and the stakes are so high that games sometimes end in gunshots. In America's poorest neighborhood, troubled parents dream of NFL stardom for children who long only for a week in Disney World at the Pop Warner Super Bowl. In 2001, journalist Robert Andrew Powell spent a year following two teams through roller-coaster seasons. The Liberty City Warriors, former national champs, will suffer the team's first-ever losing season. The Palmetto Raiders, undefeated for two straight years, will be rewarded for good play with limo rides and steak dinners. But their flamboyant coach (the "Darth Vader of Pop Warner coaches") will face defeat in a down-to-the-wire playoff game. *We Own This Game* is an inside-the-huddle look into a world of innocence and corruption, where every kickoff bares political, social, and racial implications; an unforgettable drama that shows us just what it is to win and to lose in America. "Powell elevates *We Own This Game* well above the average sports book to a significant sociological study." —San Francisco Chronicle

Larceny Games Brian Tuohy, 2013-08-16 Major League Baseball claims it hasn't had a game fixed by gamblers since 1919. No points have been shaved in the NBA since 1954. And the NFL states no game of theirs has come under outside influence – ever. These, however, are lies. The proof resides in FBI files only recently uncovered and discussed in *Larceny Games*.

Sports Betting: Law and Policy Paul M. Anderson, Ian S. Blackshaw, Robert C.R. Siekmann, Janwillem Soek, 2011-10-28 Gambling is a significant global industry, which is worth around 0.6% of world trade, that is, around US\$ 384 billion; and gambling on the outcome of sports events is a very popular pastime for millions of people around the world, who combine a bet with watching and enjoying their favourite sports. But, like any other human activity, sports betting is open to corruption and improper influence from unscrupulous sports persons, bookmakers and others. Sports betting in the last ten years or so has developed and changed quite fundamentally with the

advent of modern technology – not least the omnipresence of the Internet and the rise of on-line sports betting. This book covers the law and policy on sports betting in more than forty countries around the world whose economic and social development, history and culture are quite different. Several chapters deal with the United States of America. This book also includes a review of sports betting under European Union (EU) Law. The book appears in the ASSER International Sports Law Series, under the editorship of Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

The Ultimate Sports Betting Secrets A. B. Lawal, 2019-08-30 About the Book Imagine if you had an Almanac with tomorrow's sports results and events. Imagine what you could do if you knew the outcome before it actually happened. Impossible? This book teaches you how sports investing works and

how you can win consistently from sports betting. Sports has been my life since childhood. I was trying to crunch the code to predict tomorrow's games. In fact, this may sound a little bit like a back to the future fairytale, but I've come as close as I can to the results of Tomorrow's Almanac. During the last 13 years, I've been gathering sports data for Major League sports like Major League Baseball, Nhl Hockey, the NFL football and NBA basketball. I'm crunching the numbers and I'm comparing the stats. I'm analyzing and back testing everything for years and years to crack the sports code and to find those repeating patterns and trends. This makes me understand what makes teams win and what makes teams lose. And you know what I found? I found that history always repeats itself. This is true, especially in sports where the rules are strictly defined. The outcomes in these situations are very predictable. Of course there are lucky strikes and conditions that are impossible to put into perspective. However, those are very small percentages. If you know the past outcome of an event, you can predict the results for the game in similar circumstances with a high degree of probability. As I said before, the past is never a full indication of what will happen in the future and there is always room for surprises, but again, this is what makes sports fun to watch. Am I right? However, what is the chance that a team with similar power and player statistics will produce a similar outcome in a similar game in similar circumstances? What's that percentage? 86.5% that's right. An 86.5% of the cases there will be no

surprises and the prediction will come absolutely. The Zcode investing software is the best system in the market because it keeps making investors consistent gains each and every month. Truth is we love sports, but we hate to gamble and that's why we call this sports investing, which is similar to any other trading like stocks, stock options, and forex trades. This is just way more predictable than today's flawed economic models with crisis's and bankruptcy events. Every day the software is gathering thousands and thousands of sports data and results: every single event, every single detail, every single player and every single team. I start the simulation with over 80 parameters in the zcode formula to come up with a precise and easy to use prediction and not only tell you who is going to win, but also and most importantly, where the value is, which means more money can be made guessing. To learn more about how you can create a consistent \$1500 monthly from sports betting following our guide, just order this book right now!
