Contactless Vital Signs Monitoring Wenjin Wang, Xuyu Wang, 2021-09-20 Vital signs, such as heart rate and respiration rate, are useful to health monitoring because they can provide important

physiological insights for medical diagnosis and well-being management. Most traditional methods for measuring vital signs require a person to wear biomedical devices, such as a capnometer, a pulse oximeter, or an electrocardiogram sensor. These contact-based technologies are inconvenient, cumbersome, and uncomfortable to use. There is a compelling need for technologies that enable contact-free, easily deployable, and long-term monitoring of vital signs for healthcare. Contactless Vital Signs Monitoring presents a systematic and in-depth review on the principles, methodologies, and opportunities of using different wavelengths of an electromagnetic spectrum to measure vital signs from the human face and body contactlessly. The volume brings together pioneering researchers active in the field to report the latest progress made, in an intensive and structured way. It also presents various healthcare applications using camera and radio frequency-based monitoring, from clinical care to home care, to sport training and automotive, such as patient/neonatal monitoring in intensive care units, general wards, emergency department triage, MR/CT cardiac and respiratory gating, sleep centers, baby/elderly care, fitness cardio training, driver monitoring in automotive settings, and more. This book will be an important educational source for biomedical researchers, AI healthcare researchers, computer vision researchers, wireless-sensing researchers, doctors/clinicians, physicians/psychologists, and medical equipment manufacturers. Includes various contactless vital signs monitoring techniques, such as optical-based, radar-based, WiFi-based, RFID-based, and acoustic-based methods. Presents a thorough introduction to the measurement principles, methodologies, healthcare applications, hardware set-ups, and systems for contactless measurement of vital signs using camera or RF sensors. Presents the opportunities for the fusion of camera and RF sensors for contactless vital signs monitoring and healthcare.

Low Tox Life Alexx Stuart, 2018-06-27 Ever stopped to read the list of ingredients in the products you use every day? In *Low Tox Life*, activist and educator Alexx Stuart gently clears a path through the maze of mass-market ingredient cocktails, focusing on four key areas: Body, Home, Food and Mind. Sharing the latest science and advice from experts in each area, Alexx tackles everything from endocrine-disruptors in beauty products to the challenge of going low plastic in a high-plastic world, and how to clean without a hit of harmful toxins. You don't need to be a fulltime homesteader with a cupboard full of organic linens to go low tox. Start small, switching or ditching one nasty at a time, and enjoy the process as a positive one for you and the planet.

Baby, Unplugged Sophie Brickman,2021-09-07 A charming, meticulously researched, and illuminating look at how technology infiltrates every aspect of raising children today, filled with helpful advice parents can use to best navigate the digital landscape, and ultimately learn to trust their own judgment. There's an app or device for nearly every aspect of parenting today: monitoring your baby; entertaining or educating your toddler; connecting with other new parents for tips, tricks, and community—virtually every aspect of daily life. But it isn't a parenting paradise; the truth is much more complicated. The mother of two young daughters, journalist Sophie Brickman wondered what living in a tech-saturated world was doing to her and her children. She turned to experts, academics, doctors, and innovators for advice and insight. *Baby, Unplugged* brings together Brickman's in-depth research with her own candid (sometimes hilarious) personal experience to help parents sort through the wide and often confusing tech offerings available today and to sort out what's helpful and what's not. Filled with relatable and entertaining stories as well as practical takeaways, *Baby, Unplugged* is destined to become a touchstone for parents today, giving them the permission to forge their own path through the morass of technological options, to restore their faith in themselves, and to help them raise good, social, and engaged people in the modern world.

Green and Social Economy Finance Karen Wendt,2021-07-21 *Green and Social Economy Finance* is a compilation of chapters by experts, linking research and practice. This anthology provides a new thinking on social economy green finance, showing emerging themes and trends. It spans from stock markets, green finance, innovations, digitalization to social finance, governance and theories of change. It concentrates on impact, opportunity recognition and development of financial products designed to finance the green and social economy. Without the attraction of capital, social entrepreneurship, and innovations, green finance can face difficulty in addressing business solutions. Green and social economy is a nascent field. The authors address the conceptualization of green and social solutions and identify new trends in the finance industry products and approaches. The book demonstrates that aligning finance and investment with the Paris Agreement, sustainable development goals and needs and interests of society are feasible.

The Third Industrial Revolution Jeremy Rifkin,2011-10-04 The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful Third Industrial Revolution. He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an energy internet, just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The

European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

Building a Better Delivery System Institute of Medicine, National Academy of Engineering, 2005-10-20 In a joint effort between the National Academy of Engineering and the Institute of Medicine, this book attempts to bridge the knowledge/awareness divide separating health care professionals from their potential partners in systems engineering and related disciplines. The goal of this partnership is to transform the U.S. health care sector from an underperforming conglomerate of independent entities (individual practitioners, small group practices, clinics, hospitals, pharmacies, community health centers et. al.) into a high performance system in which every participating unit recognizes its dependence and influence on every other unit. By providing both a framework and action plan for a systems approach to health care delivery based on a partnership between engineers and health care professionals, *Building a Better Delivery System* describes opportunities and challenges to harness the power of systems-engineering tools, information technologies and complementary knowledge in social sciences, cognitive sciences and business/management to advance the U.S. health care system.

The Wonder Weeks Frans X. Plooij, Hetty van de Rijt, Xaviera Plas, 2017-09-05 This is not a book about how to make your child into a genius, however. We firmly believe that every child is unique and intelligent in his own way. It is a book on how to understand and cope with your baby when he is difficult and how to enjoy him most as he grows. It is about the joys and sorrows of growing with your baby.--Publisher's website.
