The Coffee Break Novelist Kevin McLaughlin,2017-07-18 Writing in the Time We HaveWe all have twenty four hours in a day, 365 days in a year. And in theory, how we spend that time is entirely up to us. In practice? Not so much! I bet you find that most of those hours are filled in for you. We have childcare, and work, and food prep, and bill paying, and housework, and yard work, and myriad other tasks that eat up bits and bites of that precious time, until there is very little left. And so most would-be novelists never write their books, because they "don't have time". They simply cannot figure out how to add anything else in. Many of us have trouble finding the time to brush our teeth more than once a day - fitting in a novel, too? It looks too big. Looms too large. It's a mountain of a task, and there seems to be no way to confront something that will chew up that many hours in the small bits of time we have available. In this book we'll address that lack of time, and we're also going to look at the novel as a set of smaller bites. By the time you are done, you will have all the tools you need to finish your novel - to fit that important work into your already busy life. Are you tired of not having the time to accomplish your dream of writing a novel? Have you written a book before, but it took forever, and you don't know how you'll ever finish the next one? This book is for you.

Innovative Internet Secrets Doug Knell,2018-01-11 There are so many secrets packed in here, I have to wonder if the Illuminati will have this author assassinated - Derrick Mennings, Marxist Internet Weekly Digest Written by an engineering expert with comprehensive knowledge of SEO marketing, computers, and the best Belgian beers to drink with them. Preview the book to enter enlightenment. Give Me A Couple Of Hours And I'll Turn You Into An Internet Wizard! There are other internet secrets books and they work as excellent paperweights and have some therapeutic benefits, too: you can use them to put you to sleep. This book is not to be equated with all those boring-as-all-hell books with dubious internet insights and SEO tips. Trust us: what you know about the internet isn't as much as you think you know. Beyond the basics, how clued in are you really about the internet? You probably know more about Bangladesh (which ain't much, right?) than you do about web development, link building, and search engine optimization. The internet may play an integral role in our lives, yet in informal testing, close to 92% of internet users scored no more than basic competence with it. Less than 16% had any legitimate knowledge of SEO marketing. I can hear you from here: Basic competence is good enough for me. Why would I want or need to do more than that? You can use the Google or Bing search engine (but lazily, not with any genuine optimization), get around the Gmail and Hotmail interfaces, buy an airline ticket at Expedia, order a book at Amazon, and post an update at Facebook. Is that mastery when anyone can do that? Complacency never does anyone any favors. If the complacent had won out, we'd still believe the world is flat and airplane flight is impossible. Do you really need to be told that the internet is one of those things you cannot afford to be complacent about? Your livelihood, your identity, your social networks, your ability to distinguish yourself from the competition will all one day be measured by the breadth and depth of your internet skills. Development of the web hasn't stood still. Should your skills? Every single one of these internet secrets will shoot your internet productivity into the stratosphere and leave you head and shoulders above your peers. We're not naive to think you don't know any of these secrets, but we're confident you don't know about most of them. Any of these 100+ internet insights will more than make up for the book's cost * Keep your computer and other devices protected: the best anti-virus & malware tools internet tools you should install to keep your computer, mobile phone, and tablet from being crippled. * Set up sharable internet networks wherever you happen to be, like standing in front of Buckingham Palace. * Start building your favorite link bookmarks across all internet browsers and platforms. * Avoid internet scams. * Download and view internet videos offline. Video streaming sucks bandwidth from your 4G plan. * Keep your identity safe. * Transfer

large files. * Set up online music libraries so you can listen to your music anywhere, anytime. * Shop on the internet for the absolute best prices. * View web sites optimally on any device. * Remember your passwords for any site and situation. * And much, much more. Some of these internet secrets you could discover if you knew where to look, but it would take you months to collect the same knowledge you'll find here. Other internet tools we've picked up from years of experience. You won't find those gems anywhere else. Dump your other SEO books and for-idiots web development guides. You will not find another internet book this practical or enjoyable for any price. The new internet isn't going anywhere, but you should. Let's get going, with us as your guide along this infinitely more diverse Information Superhighway.

  Insights Beyond Ir4.0 with Ioe Checksheets For Implementation - a Basic Reference Manual Sugumaran RS Ramachandran,2023-03-22 This book is a compilation from various resources presented to guide readers and expose tools needed to lead and implement successful Internet of Everything (IoE) projects in organizations. While most people probably picture computers and cell phones when the subject of technology comes up, technology is not merely a product of the modern era. ... Just as the availability of digital technology shapes how we live today, the creation of stone tools changed how pre-modern humans lived and how well they ate. Why technology is important in our daily life. This is because life without technology is pointless in today's dynamic world. Technology, which brings together tools to promote development, use and information exchange, has as its main objective of making tasks easier and the solving of many problems of mankind. We all know that Checksheets are a set of questions or list of statements that will help us keep track of all the actions that have to be performed in a work. The purpose of these checksheets is to reduce failures, increase consistency and completeness in performing a specific task. No matter what size, companies are constantly looking to increase productivity, efficiency, and performance. Naturally, the implementation of new technology can accomplish that. However, while introducing new technologies are essential in running a successful company, how we choose to introduce those technologies can make or break their success.
