Principles and Practice of Gynecologic Oncology Richard Barakat,Andrew Berchuck,Maurie Markman,Marcus E. Randall,2013-05-08 Today, multidisciplinary approaches to treatment are at the heart of cancer care. They offer improved clinical outcomes, new possibilities in patient quality of life, and enable the development of true innovation in individualized treatment. To accurately reflect this modern day approach to cancer care, the content of the 6th edition of Principles and Practice of Gynecologic Oncology was written entirely by surgeons, medical oncologists, radiation oncologists, and pathologists. New to the editorial team, Dr. Andrew Berchuck has made significant contributions to the understanding of the molecular pathogenesis of ovarian and endometrial cancer in the book's content. Every chapter of this book has been either completely rewritten or extensively updated to ensure that everyone involved in treating women with gynecologic cancer will have the most comprehensive and up-to-date information on the subject.

A Constrained Space Exploration Technology Program National Research Council,Division on Engineering and Physical Sciences,Aeronautics and Space Engineering Board,Committee to Review NASA's Exploration Technology Development Program,2008-12-29 In January 2004, President George W. Bush announced the Vision for Space Exploration (VSE), which instructed NASA to Extend human presence across the solar system, starting with a

human return to the Moon by the year 2020, in preparation for human exploration of Mars and other destinations, among other objectives. As acknowledged in the VSE, significant technology development will be necessary to accomplish the goals it articulates. NASA's Exploration Technology Development Program (ETDP) is designed to support, develop, and ultimately provide the necessary technologies to meet the goals of the VSE. This book, a review of the ETDP, is broadly supportive of the intent and goals of the VSE, and finds the ETDP is making progress towards the stated goals of technology development. However, the ETDP is operating within significant constraints which limit its ability to successfully accomplish those goals-the still dynamic nature of the Constellation Program requirements, the constraints imposed by a limited budget, the aggressive time scale of early technology deliverables, and the desire to fully employ the NASA workforce.

Longevity Diet Valter Longo,2018-01-31 The internationally renowned, clinically tested, revolutionary diet program to lose weight, fight disease, and live a longer, healthier life. Can what you eat determine how long, and how well, you live? The clinically proven answer is yes, and The Longevity Diet is easier to follow than you'd think. The culmination of 25 years of research on ageing, nutrition, and disease across the globe, this unique combination of an everyday diet and fasting-mimicking diet (FMD) to be done only 3-4 times per year lays out a simple solution to living to a healthy old age through

nutrition. FMD does away with the misery and starvation most of us experience while fasting and helps you reap all the beneficial health effects of a restrictive diet while avoiding the negative stressors, like low energy and sleeplessness. Valter Longo, Director of the Longevity Institute at USC and the Program on Longevity and Cancer at IFOM in Milan, developed THE FMD after making a series of remarkable discoveries in mice and humans indicating that specific diets can activate stem cells and promote regeneration and rejuvenation in multiple organs to reduce the risk for diabetes, cancer, Alzheimer's and heart disease. Longo's simple pescatarian daily eating plan and the periodic, fasting-mimicking techniques can both yield impressive results. Low in proteins and sugars and rich in healthy fats and plant-based foods, The Longevity Diet is clinically proven to help you: Lose weight and reduce abdominal fat Make simple changes which can extend the healthy lifespan Prevent age-related muscle and bone loss Build your resistance to diabetes, cardiovascular disease, Alzheimer's and cancer Longo's healthy, life span-extending plan is based on an easy-to-adopt pescatarian plan along with the fasting-mimicking diet 4 times a year, and just 5 days at a time. The Longevity Diet is the key to living a longer, healthier, and more fulfilled life.
