Wikis Jane Klobas,2006-06-30 Wikis as information sources, as a form of publishing, and as tools for collaboration, are discussed in this book. The applications of wikis in library and information services, education and business are explored, with examples. Provides an overview of wikis, in the context of the increasing use of 'social software' and the trend towards a more interactive World Wide Web. The different kinds of wikis are identified and described. The advantages and problems associated with using wikis in information work and collaboration are discussed. One of the problems is simply that of finding wikis that deal with a particular topic or activity, and this is addressed through a discussion of directories, search engines and other finding tools. Later chapters cover the options for creating wikis and the management of a wiki. The book concludes with lists of resources related to wikis. No other book currently available, addresses this highly topical subject Wikis are becoming important sources of information on the web yet they are little understood by librarians or the general public Although wikis can be useful sources of information, Internet users need to know how wikis operate if they are to be able to evaluate the information in a wiki

Wikipedia @ 20 Joseph Reagle,Jackie Koerner,2020-10-13 Wikipedia's first twenty years: how what began as an experiment in collaboration became the world's most popular reference work. We have been looking things up in Wikipedia for twenty years. What began almost by accident--a wiki attached to an nascent online encyclopedia--has become the world's most popular reference work. Regarded at first as the scholarly equivalent of a Big Mac, Wikipedia is now known for its reliable sourcing and as a bastion of (mostly) reasoned interaction. How has Wikipedia, built on a model of radical collaboration, remained true to its original mission of free access to the sum of all human knowledge when other tech phenomena have devolved into advertising

platforms? In this book, scholars, activists, and volunteers reflect on Wikipedia's first twenty years, revealing connections across disciplines and borders, languages and data, the professional and personal.

The Wikipedia Revolution Andrew Lih,2009-03-17 Imagine a world in which every single person on the planet is given free access to the sum of all human knowledge. That's what we're doing. --Jimmy Wales With more than 2,000,000 individual articles on everything from Aa! (a Japanese pop group) to Zzyzx, California, written by an army of volunteer contributors, Wikipedia is the #8 site on the World Wide Web. Created (and corrected) by anyone with access to a computer, this impressive assemblage of knowledge is growing at an astonishing rate of more than 30,000,000 words a month. Now for the first time, a Wikipedia insider tells the story of how it all happened--from the first glimmer of an idea to the global phenomenon it's become. Andrew Lih has been an administrator (a trusted user who is granted access to technical features) at Wikipedia for more than four years, as well as a regular host of the weekly Wikipedia podcast. In The Wikipedia Revolution, he details the site's inception in 2001, its evolution, and its remarkable growth, while also explaining its larger cultural repercussions. Wikipedia is not just a website; it's a global community of contributors who have banded together out of a shared passion for making knowledge free. Featuring a Foreword by Wikipedia founder Jimmy Wales and an Afterword that is itself a Wikipedia creation.

Leveraging Wikipedia Merrilee Proffitt,2018-11-29 The vision statement of the Wikimedia Foundation states, "Imagine a world in which every single human being can freely share in the sum of all knowledge." Libraries need not see Wikipedia as competition; rather, failing to leverage its omnipresence in the online world constitutes a missed opportunity. As a senior program officer at OCLC, Proffitt has encouraged collaboration between Wikipedia and cultural heritage institutions, leading to

increased visibility and user engagement at participating organizations. Here, she brings onboard a raft of contributors from the worlds of academia, archives, libraries, and members of the volunteer Wikipedia community who together point towards connecting these various communities of knowledge. This book will inspire libraries to get involved in the Wikipedia community through programs and activities such as hosting editathons;contributing content and helping to bridge important gaps in Wikipedia;ensuring that library content is connected through the world's biggest encyclopedia;working with the Wikipedia education community; andengaging with Wikipedians as allies in a quest to expand access to knowledge. Speaking directly to librarians, this book shows how libraries can partner with Wikipedia to improve content quality while simultaneously ensuring that library services and collections are more visible on the open web.

Genre Analysis of Online Encyclopedias Anna Tereszkiewicz,2013-05 The book is the first complete discussion of the genre of online encyclopedias. The first part of the book, preceded by a theoretical introduction into the concept of webgenres, gives a detailed overview of the types of encyclopedic websites, presenting the characteristics of their content, form and functionality. The second part of the publication concerns Wikipedia -- the most popular online encyclopedia. The presentation of the structure of the portal is followed by an in-depth discussion of Wikipedia discourse features, describing the most conspicuous properties of the stylistic layer of this encyclopedia. The value of the book is additionally enhanced by many illustrations reproducing the analyzed websites.

Extracting Structured Information from Wikipedia Articles to Populate Infoboxes Dustin Lange,Christoph Böhm,Felix Naumann,2010 Roughly every third Wikipedia article contains an infobox - a table that displays important facts about the subject in attribute-value form. The schema of an infobox, i.e., the attributes that can be expressed for a concept, is defined by an infobox template. Often, authors do not specify all template attributes, resulting in incomplete infoboxes. With iPopulator, we introduce a system that automatically populates infoboxes of Wikipedia articles by extracting attribute values from the article's text. In contrast to prior work, iPopulator detects and exploits the structure of attribute values for independently extracting value parts. We have tested iPopulator on the entire set of infobox templates and provide a detailed analysis of its effectiveness. For instance, we achieve an average extraction precision of 91% for 1,727 distinct infobox template attributes.
