My First 1,000 Jumps Norm Heaton, 2019-06-10 You are holding the only comprehensive history of the early days of the sport of skydiving yet published. It is the story of not just one skydiver but the story of many, the true pioneers of the sport. Just as important this book includes a complete history of the national organization established for the express purpose of promoting sport parachuting. While this history is restricted to a short fifteen years (1961-1975), those years were the most productive, most far-reaching, and the most exciting for the fledgling idea of jumping out of perfectly good airplanes for the sheer joy of it all, eventually establishing the sport of skydiving as an integral part of the world of aviation sports. This book tells the story of those formative years with details of battles fought to maintain freedom of the skies for all parachutists when government and corporate interests made numerous attempts to severely restrict the right of skydivers to use our nation's airspace. This story is told by a man who dedicated his life to the advancement of the sport, serving for twelve years as the chief executive officer of the national organization for skydivers, the Parachute Club of America / US Parachute Association. The reader will embark on a most exciting journey, a journey not told before, continually laced with personal stories that will touch your heart, make you smile, and occasionally make you laugh. This book contains over 400 photographs and 1,500 names of people from around the world who participated in that wonderful and

exhilarating sport called skydiving.

*Political Economy and Instruments of Environmental Politics* Friedrich Schneider, Andrea Kollmann, Johannes Reichl, 2015-08-21 Conceptual, empirical, and theoretical analyses of the effectiveness of market-based policy instruments in achieving environmental goals. Economists argue that such market-based policy instruments as environmental taxes and emission trading systems are the best way to target the negative effects of pollution. Yet there is no agreement about whether the use of these instruments is sufficient, whether they are deployed efficiently, and which factors influence their effectiveness. Nor is it clear if such policies have had any significant effect on the urgent matter of climate change mitigation. This volume offers conceptual, empirical, and theoretical analyses of the effectiveness of these policy instruments in achieving environmental goals. Taken together, the chapters not only identify shortcomings of existing policy making, but also point to ways in which more effective policy design can help solve one of the most pressing problems of our time. The contributors consider such topics as theoretical approaches to address the failure of the free market to protect the environment, the influence of people's trust in their government on their willingness to accept higher environmental taxes, political determinants of fossil fuel pricing, a game theoretic approach to understanding domestic political constraints on international environmental agreements, and intergenerational equity and carbon taxation. **The Oxford Handbook of Non-Synoptic Wind Storms** Horia Hangan,Ahsan Kareem,2021-08-16 In different areas of the world, much of the damage due to wind is caused by non-synoptic, local wind storm events, such as tornadoes and downbursts. In North America the damage due to these winds is more than 65% of total wind damage, and there are no guidelines or code implementations to deal with such catastrophic events. As we enter the third decade of the twenty-first century, current research is in its first phase of addressing these types of events, from their characterization, simulation, and loading, to collapse-mode effects on buildings and structures, as well as socioeconomic implications. The need is clear to

better understand non-synoptic local winds; properly simulate them; assess the difference in loading between these events and synoptic large-scale winds that have been part of the wind engineering practice for more than five decades; determine their statistics and associated risks; and apply this through guidelines, codes, risk mitigation, and adaptation responses to socioeconomic impact. The Oxford Handbook of Non-Synoptic Wind Storms, led by Dr. Horia Hangan and Dr. Ahsan Kareem, features nearly 30 chapters, contributed by an international panel of leading scientists, scholars, and engineers, that address these issues and stimulate thought, research, and responses to non-synoptic wind storm hazards in North America and worldwide. Together, these articles provide clear definitions of the problems to be tackled, offer a strategic framework for forward-looking research, identify the best-suited tools and methodologies to address the problems at hand, and suggest ways to maximize collaborative planning between the disciplines that will tackle these challenges.

**The Papuan Languages of Timor, Alor and Pantar. Volume 3** Antoinette Schapper, 2020-10-12 These volumes present sketches of the Papuan languages scattered over the islands of Timor, Alor and Pantar. Together they give an authoritative and comprehensive overview of the unique and diverse grammars of the Timor-Alor-Pantar languages, a family of 'Papuan outliers' located at the western perimeter of Melanesia. While largely undescribed until recently, the Timor-Alor-Pantar languages are now among the most intensively studied Papuan

families. In this third volume, five new sketches of members of the family are presented, all written by specialist linguists on the basis of original field work.

*Marine Rifleman* Wesley L. Fox, 2011 Intrigued by the mystique and challenge of the Marine Corps, eighteen-year-old Wesley Fox enlisted in the summer of 1950, shortly after the outbreak of the Korean War. He saw action with the First Marine Division in Korea and was wounded in 1951. After Korea, Fox advanced steadily in the enlisted ranks, reaching the rank of first sergeant, and, early in the Vietnam War, he received an appointment as second lieutenant. While serving as a rifle company commander with the Third Marine Division in 1969, he was twice wounded in a vicious battle during Operation Dewey Canyon. Early in this battle, every member of the company's command staff was either wounded or killed. In an all-or-nothing effort led by First Lieutenant Fox, his company repulsed the attack of a much larger enemy force and then counterattacked with devastating results. For conspicuous gallantry and intrepidity at the risk of his life above and beyond the call of duty, Fox received the Medal of Honor, which President Richard Nixon presented to him at the White House. Despite the personal sacrifice and frequent danger, Fox resolutely embraced the ethos of the Marine Corps, risking his life on numerous occasions and emerging as a leader in one of the most respected and feared fighting organizations in the world. Readers interested in U.S. military history from the second half of the twentieth century, in the

Marine Corps, and in inspiring tales of personal achievement will find plenty of each in Fox's extraordinary memoir.

**Handbook of Practical Program Evaluation** Joseph S. Wholey, Harry P. Hatry, Kathryn E.

Newcomer, 2010-11-08 The book is designed to enable students of public policy, policymakers and managers to obtain useful information and conduct successful systematic evaluations, even under tight resource constraints. This text presents a wide variety of approaches to evaluation through brief, authoritative articles by top academics and practitioners. Thoroughly revised and updated this third edition is filled with the most current information, up-to-date examples, and puts

increased emphasis on practical applicability. The third edition also features a new and up-dated instructor's manual.

Handbook of Practical Program Evaluation Kathryn E. Newcomer, Harry P. Hatry, Joseph S.

Wholey, 2015-08-10 The leading program evaluation reference, updated with the latest tools and techniques The Handbook of Practical Program Evaluation provides tools for managers and evaluators to address questions about the performance of public and nonprofit programs. Neatly integrating authoritative, high-level information with practicality and readability, this guide gives you the tools and processes you need to analyze your program's operations and outcomes more accurately. This new fourth edition has been thoroughly updated and revised, with new coverage of the latest evaluation methods, including: Culturally responsive evaluation Adopting designs and tools to evaluate multi-service community change programs Using role playing to collect data Using cognitive interviewing to pre-test surveys Coding qualitative data You'll discover robust analysis methods that produce a more accurate picture of program results, and learn how to trace causality back to the source to see how much of the outcome can be directly attributed to the program. Written by award-winning experts at the top of the field, this book also contains contributions from the leading evaluation authorities among academics and practitioners to provide the most comprehensive, up-to-date reference on the topic. Valid and reliable data constitute the bedrock of accurate

analysis, and since funding relies more heavily on program analysis than ever before, you cannot afford to rely on weak or outdated methods. This book gives you expert insight and leading edge tools that help you paint a more accurate picture of your program's processes and results, including: Obtaining valid, reliable, and credible performance data Engaging and working with stakeholders to design valuable evaluations and performance monitoring systems Assessing program outcomes and tracing desired outcomes to program activities Providing robust analyses of both quantitative and qualitative data Governmental bodies, foundations, individual donors, and other funding bodies are increasingly demanding information on the use of program funds and program results. The Handbook of Practical Program Evaluation shows you how to collect and present valid and reliable data about programs.
