*Teaching School Jazz* Chad West, Mike Titlebaum, 2019  
Written by an experienced and diverse lineup of veteran jazz educators, *Teaching School Jazz* presents a comprehensive approach to teaching beginning through high school-level jazz. Thoroughly grounded in the latest research, chapters are supported by case studies woven into the narrative. The book therefore provides not only a wealth of school jazz teaching strategies but also the perspectives and principles from which they are derived. The book opens with a philosophical foundation to describe the current landscape of school jazz education. Readers are introduced to two expert school jazz educators who offer differing perspectives on the subject. The book concludes with an appendix of recommended audio, visual, digital, and written resources for teaching jazz. Accompanied by a website of playing exercises and audio examples, the book is invaluable resource for pre- and in-service music educators with no prior jazz experience, as well as those who wish to expand their knowledge of jazz performance practice and pedagogy.

**The Trumpets** Braxton DeGarmo,2023-08-08 For Aric Afton,

the campus culture becomes increasingly hostile, and an incident threatens his future. But have his accusers gone too far? Adam Afton wants to feel right at home . . . in more ways than one. Although reunited with his family, he realizes that his life is missing an "old friend." As the world spins into increasing craziness, the old saying, "Be careful what you pray for" has never been truer. From record drought to record rains and snow, southern California now faces its ultimate challenge. And they say that as California goes, so goes the nation. Yet, as Los Angeles goes dark and a new threat arises, a miracle proves that God is still in control.

**Technical Studies for the Cornet** Herbert L. Clarke, There are many books written for the Piano, Violin, etc., entirely devoted to Technic. This Work is especially written to enable the Student, by practice and application, to overcome any obstacle which may occur in musical passages written for the Cornet. By controlling the Wind Power to play these Exercises as written, in one breath, the Student will acquire ENDURANCE without strain or injury. Train the Muscles which control the Lips, to make them elastic and strong, as only a slight pressure is necessary, and not brute force. The highest as well as the lowest notes can be played with equal tone quality if practiced according to the instructions that precede each Study. Every Cornet Player should have reached a degree of excellence before attempting to play these Exercises. To become an Expert on the Cornet, one should be familiar with as many Cornet Methods as possible, and so gain the experience of each. Every Exercise in this Book is possible, and not so very difficult if practiced slowly at first, and not too long at a time. I have used them for my daily practice for years, and they have been the means of my reaching the highest notes

after playing a two-hour Concert, also of preserving my lips so that they never tire, and what has been a help to me is surely good for other Cornet Players. You cannot expect to attain the highest point of excellence without hard work and perseverance. Never be perfectly satisfied with yourself. Try to make some improvement each day, feeling that it is a pleasure to have conquered that which seemed an impossibility at first. Do not neglect to correct immediately the least fault you make. Bad habits are easily formed, but are difficult to remedy. There are few Celebrated Cornet Soloists, although thousands play the instrument. Most players abuse their practicing by not knowing the proper way, and neglecting to pay more attention to the elementary work. These Studies have been found to be excellent for Clarinet Players as well as Cornet Players. The Clarinet being a Wind Instrument also, all these Exercises will appeal to the Player of that Instrument by following the same instructions.
