Understanding Extreme Sports: A Psychological Perspective

Eric Brymer, Francesco Feletti, Erik Monasterio, Robert D.

Schweitzer, 2020-03-30 Extreme sports, those activities that lie on the outermost edges of independent adventurous leisure activities, where a mismanaged mistake or accident would most likely result in death, have developed into a significant worldwide phenomenon (Brymer & Schweitzer, 2017a). Extreme sport activities are continually evolving, typical examples include BASE (an acronym for Buildings, Antennae, Span, Earth) jumping and related activities such as proximity flying, extreme skiing, big wave surfing, waterfall kayaking, rope free solo climbing and high-level mountaineering. While participant numbers in many traditional team and individual sports such as golf, basketball and racket sports have declined over the last decade or so, participant numbers in so called extreme sports have surged. Although extreme sports are still assumed to be a Western pastime, there has been considerable Global uptake. Equally, the idea that adventure sports are only for the young is also changing as participation rates across the generations are growing. For example, baby boomers are enthusiastic participants of adventure sports more generally (Brymer & Schweitzer, 2017b; Patterson, 2002) and Generation Z turn to extreme sports because they are popular and linked to escapism (Giannoulakis & Pursglove, 2017). Arguably, extreme sports now support a multi-billion dollar industry and the momentum seems to be intensifying. Traditional explanations for why extreme sports have become so popular are varied. For some, the popularity is explained as the desire to rebel against a society that is becoming too risk averse, for others it is about the spectacle and the merchandise that is associated with organised activities and athletes. For others it is just that there are a lot of people attracted by risk and danger or just want to show off. For others still it is about the desire to belong to sub-cultures and the glamour that goes with extreme sports. Some seek

mastery in their chosen activity and in situations of significant challenges. This confusion is unfortunate as despite their popularity there is still a negative perception about extreme sports participation. There is a pressing need for clarity. The dominant research perspective has focused on positivist theory-driven perspectives that attempt to match extreme sports against predetermined characteristics. For the most part empirical research has conformed to predetermined societal perspectives. Other ways of knowing might reveal more nuanced perspectives of the human dimension of extreme sport participation. This special edition brings together cutting-edge research and thought examining psychology and extreme sports, with particular attention payed to the examination of motivations for initial participation, continued participation, effective performance, and outcomes from participation.

Bird Dream Matt Higgins, 2015-07-07 A heart-stopping narrative of risk and courage, Bird Dream tells the story of the remarkable men and women who pioneered the latest advances in aerial exploration--from skydiving to BASE jumping to wingsuit flying--and made history with their daring.

Memoirs From the Edge: Exploring the Line Between Life and Death Jeb Corliss, 2022-04-28 Jeb Corliss is one of the most iconic BASE jumpers and wingsuit pilots of our time, and his autobiography is an odyssey into madness. Corliss breaks and

rebuilds himself time and again, learning what only pain and daring can teach. The tales he brings back offer insight into the darkness that exists within the mind as well as his own unique way of coping. Many grapple with mental illness in one way or another, and Corliss gives a glaringly honest view of his struggle while traversing the world's most dangerous sports.

BASE Jumping Jason Laurendeau, 2012-08-03 This in-depth exploration of the history and culture of the sometimes illegal activity of BASE jumping provides historical and current information as well as a glimpse into the incredible adrenaline rush of the sport. BASE jumping is an extreme sport that has gained significant popularity. To date, there are over 1,400 jumpers who have earned their BASE number, which means that they have jumped from a building, an antenna, a span, and a terrestrial point. And at least one BASE jumper is planning to attempt landing from a BASE jump without a parachute. *BASE Jumping: The Ultimate Guide* examines the history, subculture, and technologies associated with BASE jumping. Additionally, it considers what the relatively new expansion of this activity means within the context of how our society considers danger and risk. After an introduction, its chapters cover BASE culture and ethics, the sport's origins and current developments, techniques and equipment, sites and events, pioneering jumpers and icons of the sport, and future directions. The author—a former skydiver and BASE jumper himself—draws from careful research as well as interviews with current BASE jumpers to both provide historical context and represent the voices of those participating in the activity.

Media Management and Digital Transformation Arne L. Bygdås, Stewart Clegg, Aina Landsverk Hagen, 2019-05-01 Media Management and Digital Transformation provides novel and empirically rich insights into the tensions, struggles and innovations of news making and managing in media organizations. From an empirically grounded perspective this book investigates how the 'buzz' of new technology tends to prevent management from seeing which changes are needed and indeed possible to make in the newsroom. It presents ground-breaking research showing that fostering ingenious, innovative solutions can be created from within organizations by engaging and allowing employees to recognize problems, reflect and experiment with new ways of working, using technology as support for change. The research presented arises from a four-year action research project in collaboration with three small and medium-sized Norwegian newspapers, in addition to ethnographic research in newsrooms and on media organizations and phenomena in the USA and Europe. It includes among other empirical examples of newsrooms transitioning from a deadline-controlled workflow to an open-ended flowline production, and provides new tools and methods for fostering collaborative creativity and co-creative innovation practices. It also looks into newsrooms' attempts to strengthen their audience engagement, metrics performance and external collaborations with technology providers, journalism education and action researchers. With theoretical chapters, methodological insights and qualitative case studies of contemporary practices, this book is essential reading for students and practitioners involved with media management globally.

Bird Dream Matt Higgins, 2014-07-31 PEN / ESPN Award for

Literary Sports Writing (2015 LONGLIST) “[P]erversely entertaining... In a truly intoxicating read that was hard to put down, Matt Higgins has managed to make real a world about as far removed from daily life as it gets.” --Daily Beast Matt Higgins cracks open this astonishingly dangerous sport and captures the spectacular adrenaline surges it delivers.--The Wall Street Journal [R]iveting... a must-read. A highflying, electrifying story. --Kirkus (STARRED) A heart-stopping narrative of risk and courage, *Bird Dream* tells the story of the remarkable men and women who pioneered the latest advances in aerial exploration—from skydiving to BASE jumping to wingsuit flying—and made history with their daring. By the end of the twentieth century BASE jumping was the most dangerous of all the extreme sports, with thrill-seeking jumpers parachuting from bridges, mountains, radio towers, and even skyscrapers. Despite numerous fatalities and legal skirmishes, BASE jumpers like Jeb Corliss of California thought they had discovered the ultimate rush. But all this changed for Corliss in 1999, when, high in the mountains of northern Italy, he and other jumpers watched in wonder as a stranger—wearing a cunning new jumpsuit featuring “wings” between the arms and legs—leaped from a ledge and then actually flew from the vertiginous cliffs. Drawing on intimate access to Corliss and other top pilots from around the globe, *Bird Dream* tracks the evolution of the wingsuit movement through the larger than life characters who, in an age of viral video, forced the sport onto the world stage. Their exploits—which entranced millions of fans along the way—defied imagination. They were flying; not like the Wright brothers, but the way we do in our dreams. Some dared to dream of going further yet, to a day when a wingsuit pilot might fly, and land, all without a parachute. A growing number of wingsuit pilots began plotting ways in which a human being might leap from the sky and land. A half dozen groups around the world were dedicated to this quest for a “wingsuit landing,” conjuring the pursuit of nations that once

inspired the race to first summit Everest. Given his fame as a stuntman, the brash, publicity-hungry Corliss remained the popular favorite to claim the first landing. Yet *Bird Dream* also tracks the path of another man, Gary Connery—a forty-two-year-old Englishman—who was quietly plotting to beat Corliss at his own game. Accompanied by an international cast of wingsuit devotees—including a Finnish magician, a parachute tester from Brazil, an Australian computer programmer, a gruff hang-gliding champion-turned-aeronautical engineer, a French skydiving champion, and a South African costume designer—Corliss and Connery raced to leap into the unknown, a contest that would lead to triumph for one and nearly cost the other his life. Based on five years of firsthand reporting and original interviews, *Bird Dream* is the work of journalist Matt Higgins, who traveled the world alongside these extraordinary men and women as they jumped and flew in Europe, Africa, Asia, and the Americas. Offering a behind-the-scenes take on some of the most spectacular and disastrous events of the wingsuit movement, Higgins's *Bird Dream* is a riveting, adrenaline-fueled adventure at the very edge of human experience.

Base 66 Jevto Dedijer, 2004-11 BASE 66 is the true, nerve-wracking account of three young skydivers and their quest for membership in the most select extreme sports club on earth: The BASE club. In order to become a full-fledged member, Jevto Dedijer, Bernard Poirier, and Scott Elder had to parachute from the top of a building, an antenna tower, a bridge and a cliff, and survive to tell the story--a feat only some 800 adrenaline addicted people have succeeded in doing. In BASE 66, Jevto Dedijer tells the tale of his hunger for the ultimate adrenaline rush. He and his companions shared several near death experiences while traveling across Europe with their parachutes and beer in Bernard's dented Renault 4. They were pioneers in a sport so dangerous that several of their fellow BASE jumpers died in action. BASE 66 is a fascinating story about life and death, terror and joy, and intimate

friendship. It is an account of extraordinary people taking a step beyond the edge. Yuri Kuznetsov--BASE 416 Everyone will enjoy reading Jevto's thrilling and humorous tale of his fascinating BASE odyssey and his discovery of a way of life that surpasses artificial boundaries and provides lifelong inspiration. SAS Tracking Handbook Barry Davies,2014-08-05 Tracking originated with man's need for food; he needed to understand what he was following and what the rewards would be if he was successful. Little has changed over time about the terms of tracking. We still track game for sport and food, but we have also found other uses for tracking. Border police patrol to stop illegal immigrants from entering their country; the military tracks down wanted terrorists or enemy forces. Tracking has become a military skill. In the SAS Tracking Handbook, former SAS soldier and British Empire Medal (BEM) award-winner Barry Davies teaches not only how to survive in the outdoors with the skills of tracking, but how to use these skills from a military standpoint. Included in this book are many helpful tips on topics including: The types of dogs used for tracking. Traps for catching wild animals. Modern military tracking. Using your surroundings to your advantage. And much more. The success or failure of the modern tracker is dependent on the personal skills of the individual tracker. Training is vital in learning tracking skills, and continuous exercise the best way to interpret signs. These skills are rarely found, but they remain hidden deep within all of us. So whether you're already a skilled tracker or a novice in the field, the SAS Tracking Handbook will be your guide to mastering this old and respected art.

Existential and Spiritual Issues in Death Attitudes Adrian Tomer, Grafton T. Eliason, Paul T. P. Wong, 2013-05-13 In this new volume, death is treated both as a threat to meaning and as an opportunity to create meaning.

21st Century Sports Sascha L. Schmidt, 2020-09-12 This book outlines the effects that technology-induced change will have on sport within the next five to ten years, and provides food for thought concerning what lies further ahead. Presented as a collection of essays, the authors are leading academics from renowned institutions such as Massachusetts Institute of Technology, Queensland University of Technology, and the University of Cambridge, and practitioners with extensive technological expertise. In their essays, the authors examine the impacts of emerging technologies like artificial intelligence, the Internet of Things, and robotics on sports and assess how they will change sport itself, consumer behavior, and existing business models. The book will help athletes, entrepreneurs, and innovators working in the sports industry to spot trendsetting technologies, gain deeper insights into how they will affect their activities, and identify the most effective responses to stay ahead of the competition both on and off the pitch.

Phenomenology and the Extreme Sport Experience Eric Brymer, Robert Schweitzer, 2017-03-27 Understanding the motivations behind those who partake in extreme sports can be difficult for some. If the popular conception holds that the incentive behind extreme sports participation is entirely to do with risking one's life, then this confusion will continue to exist. However, an in-depth examination of the phenomenology of the extreme sport experience yields a much more complex picture. This book revisits the definition of extreme sports as those activities where a mismanaged mistake or accident would most likely result in death. Extreme sports are not necessarily synonymous with risk and participation may not be about risk-taking. Participants report deep inner transformations that

influence world views and meaningfulness, feelings of coming home and authentic integration as well as a freedom beyond the everyday. Phenomenologically, these experiences have been interpreted as transcendent of time, other, space and body. Extreme sport participation therefore points to a more potent, life-enhancing endeavour worthy of further investigation. This book adopts a broad hermeneutic phenomenological approach to critique the assumed relationship to risk-taking, the death wish and the concept of No Fear in extreme sports, and repositions the experience in a previously unexplored manner. This is valuable reading for students and academics interested in Sports Psychology, Social Psychology, Health Psychology, Tourism, Leisure Studies and the practical applications of phenomenology.

The Adult Attachment Projective Picture System Carol George, Malcolm L. West, 2012-03-12 This book presents cutting-edge research on adult attachment together with a complete overview of the Adult Attachment Projective Picture System (AAP), the authors' validated developmental assessment. In addition to research applications, the AAP can be of great use for clinicians seeking to understand the attachment strengths and challenges that clients bring to therapy. The book describes how the AAP identifies attachment classification groups and yields important information about dimensions--including defensive processes--not evaluated by other available measures. Part I examines the theoretical underpinnings of the AAP and compares it to other adult attachment assessments. The authors explain how autobiographical narrative, as elicited and analyzed by the AAP, can offer strong insights into essential features of attachment. Part II reviews the nuts and bolts of the AAP: its development and validation, how it is administered, and how the coding and classification system works. Chapters in Part III contain detailed case illustrations that show what the AAP looks like in action and what it reveals about individuals' early experiences, sense of self, and capacity to engage in close, protective relationships. Cases,

which include childhood history and verbatim AAP transcripts, represent the four major adult attachment classification groups: secure, dismissing, preoccupied, and unresolved. The concluding chapter discusses promising uses of the AAP in neurobiological research. A unique and timely contribution to the field, this authoritative book belongs on the desks of all developmental and clinical researchers interested in attachment, as well as clinical psychologists, social workers, psychiatrists, and other clinicians who want to integrate attachment into their practices.

Zero History William Gibson, 2010-09-07 Hollis Henry never intended to work for global marketing magnate Hubertus Bigend again. But now she's broke, and Bigend has just the thing to get her back in the game... Milgrim can disappear in almost any setting, and his Russian is perfectly idiomatic—so much so that he spoke it with his therapist in the secret Swiss clinic where Bigend paid for him to be cured of his addiction... Garreth doesn't owe Bigend a thing. But he does have friends from whom he can call in the kinds of favors powerful people need when things go sideways... They all have something Bigend wants as he finds himself outmaneuvered and adrift, after a Department of Defense contract for combat-wear turns out to be the gateway drug for arms dealers so shadowy they can out-Bigend Bigend himself. "Zero History is [Gibson's] best yet, a triumph of science fiction as social criticism and adventure."—BoingBoing.net

Life Story Research in Sport Kitrina Douglas, David Carless, 2014-12-17 What is life really like for the elite athlete? How does the experience of being a professional sports person differ from the popular perceptions of fans, journalists or academics? Why might elite sports people experience mental health difficulties away from the public gaze? In the first book-length study of its kind, Kitrina Douglas and David Carless present the life stories of real elite athletes alongside careful analysis and interpretation of those stories in order to better understand the experience of living in sport. Drawing on psychology, sociology,

counselling, psychotherapy and narrative theory, and on narrative research in sports as diverse as golf, track and field athletics, judo and hockey, they explore the ways in which the culture of sport interacts with the mental health, development, identity and life trajectories of elite and professional sports people in highly pressurised and sometimes unhealthy environments. By casting light on a previously under-researched aspect of sport, the book makes a call for strategies to be put in place to minimise difficulties or distress for athletes, for support to be tailored across the different life phases, and highlights the potential benefits in terms of athlete well-being and improved performance. The book also considers how these important issues relate to broader cultural and social factors, and therefore represents important reading for any student or professional with an interest in sport psychology, coaching, sport sociology, youth sport, counselling, or exercise and mental health.
