God's Playground A History of Poland Norman Davies,2005-02-24 This new edition of Norman Davies's classic study of the history of Poland has been revised and fully updated with two new chapters to bring the story to the end of the twentieth century. The writing of Polish history, like Poland itself, has frequently fallen prey to interested parties. Professor Norman Davies adopts a sceptical stance towards all existing interpretations and attempts to bring a strong dose of common sense to his theme. He presents the most comprehensive survey in English of this frequently maligned and usually misunderstood country.

Sustainability Indicators in Practice Agnieszka Latawiec, Dorice Agol, 2015-12-30 The goal of sustainable development is to meet the socio-economic and environmental objectives without comprising the needs of future generations. Since the Rio Summit of 1992, the concept of sustainability has captured our imaginations and aspirations and efforts to develop its indicators have increased. A range of sustainability indicators have been developed within various socio-economic, environmental and cultural contexts- including biodiversity, economy, energy, water, land use and transport. Sustainability indicators are widespread in international development arena. They have become popularized among governments, non-governmental organizations, private sector and the wider public. Based on multiple cases across the world, this book explores opportunities and challenges associated with the practical application of sustainability indicators. The book reflects diversity of professionals of inter-disciplinary backgrounds covering contemporary issues within different socio-economic and

environmental contexts. Each chapter presents practical examples of the merits and challenges of using sustainability indicators and draws conclusions and lessons learned. The book targets a range of audience from students, academics to development practitioners and policy-makers. The Olympic Winter Games at 100 Heather L. Dichter, Sarah Teetzel, 2023-12-11
2024 marks the 100-year anniversary of the winter sports week festival celebrated in Chamonix in 1924, which is now recognized as the first Olympic Winter Games. As a globally watched quadrennial mega-event, the Winter Olympics is unique from both summer sport festivals and other winter festivals, such as the Winter X Games. This book explores the impacts, issues, and legacies of the past century of the Olympic Winter Games. Grounded in sport history, the chapters in this volume draw on the disciplines of cultural history, diplomatic history, global history, environmental history, and media history to analyze the continued allure of the Winter Olympics, a century after its origin, and in light of the sustained and significant problems facing the Olympic movement. Host cities' efforts to create positive and lasting legacies are analyzed to highlight the challenges and complexities that have plagued the Olympic movement throughout the last century. The Olympic Winter Games at 100 is essential reading for any researcher, advanced student or scholar with an interest in Olympic Studies, sports development, sport policy and history. The chapters in this book were published as two special issues in The International Journal of the

Climate Change in Poland Małgorzata Falarz, 2021-06-01 This edited book provides a comprehensive overview of the past, present and future climate development in Poland. The book consists of three main parts. The first part presents the results of the study of climate change before instrumental measurements in Poland in the last millennium. The second part analyses the long-term changes and variability of 36 climate characteristics for 14 climate elements, indices, meteorological phenomena and weather types using data from 79 weather stations in the base period 1951-2018 and for long series up to 239 years (1780-2018). The particular attention is paid to climate extremes. The third part of the book deals with projected changes in temperature, precipitation and thermal indices related to the agriculture and energy sectors. Two future time horizons are carried out: 1) near future: 2021-2050 and 2) far future: 2071-2100. The results for Poland are compared to those from Europe and other parts of the world. The book is addressed to scientists (climatologists, geographers, etc.), academic teachers, students, journalists and all those interested in Poland and climate change in Poland.
