Endocrine Problems in Cancer Roland T. Jung,Karol Sikora,2013-10-22 Endocrine Problems in Cancer: Molecular Basis and Clinical Management reviews endocrine and metabolic problems that can be attributed to the production of hormones by neoplastic cells, or by the interference of normal physiological systems by malignant cells. The book emphasizes the clinical aspects of the diagnosis and management of the endocrine problems in cancer. The text starts by studying the biological basis of cancer, its secreted products, and its relationship to the genetics of the cell and the individual. Cell metabolism and the individual clinical endocrine syndromes that occur are then discussed in the chapters that follow. Several chapters describe the physiological basis and the diagnostic approach to cancer. Finally, the clinical management of cancer is outlined in detail. Oncologists, endocrinologists, physicians, researchers, and medical students will find this text useful.

Recent Advances in Environmental Science from the Euro-Mediterranean and Surrounding Regions Amjad Kallel,Mohamed Ksibi,Hamed Ben Dhia,Nabil Khélifi,2017-12-12 This volume includes the papers presented during the 1st Euro-Mediterranean Conference for Environmental Integration (EMCEI) which was held in Sousse, Tunisia in November 2017. This conference was jointly organized by the editorial office of the Euro-Mediterranean Journal for Environmental Integration in Sfax, Tunisia and Springer (MENA Publishing Program) in Germany. It aimed to give a more concrete expression to the Euro-Mediterranean integration process by supplementing existing North-South programs and agreements with a new multilateral scientific forum that emphasizes in particular the vulnerability and proactive remediation of the Euro-Mediterranean region from an environmental point of view. This volume gives a general and brief overview on current research focusing on emerging environmental issues and challenges and its applications to a variety of problems in the Euro-Mediterranean zone and surrounding regions. It contains over five hundred and eighty carefully refereed short contributions to the conference. Topics covered include (1) innovative approaches and methods for environmental sustainability, (2) environmental risk assessment, bioremediation, ecotoxicology, and environmental safety, (3) water resources assessment, planning, protection, and management, (4) environmental engineering and management, (5) natural resources: characterization, assessment, management, and valorization, (6) intelligent techniques in renewable energy (biomass, wind, waste, solar), (7) sustainable management of marine environment and coastal areas, (8) remote sensing and GIS for geo-environmental investigations, (9) environmental impacts of geo/natural hazards (earthquakes, landslides, volcanic, and marine hazards), and (10) the environmental health science (natural and social impacts on Human health). Presenting a wide range of topics and new results, this edited volume will appeal to anyone working in the subject area, including researchers and students interested to learn more about new advances in environmental research initiatives in view of the ever growing environmental degradation in the Euro-Mediterranean region, which has turned environmental and resource protection into an increasingly important issue hampering sustainable development and social welfare.
