Hear & Beyond Shari Eberts,Gael Hannan,2022-05-03 Hearing loss doesn't come with an operating manual—until now. If you have hearing loss, you already know that the conventional approach to treatment is focused on hearing-aid technology. Without a handbook to help you figure out how to actually live with it, you've likely been getting by on information pieced together from various sources—and yet, communication often seems incomplete and unsatisfying. What's missing from this hearing care model is the big picture—a real-life illustration of how hearing loss, its emotions, and its barriers affect every corner of your life. Now, hearing-health advocates, consultants, and speakers Shari Eberts and Gael Hannan offer a new skills-based approach to hearing loss that is centered not on hearing better, but on communicating better. With honesty and humor, they share their own hearing loss journeys, and outline invaluable insights, strategies, and workarounds to help you engage with the world and be heard. You'll gain tips for navigating all areas impacted by hearing loss, including relationships, work, technology; strategies for adopting a new, empowering mindset towards your hearing loss; and communication behaviors that can make almost any listening situation manageable. Informed by the lived experiences of thousands of people living with hearing loss, and corroborated by hearing science, technological advances, and modern hearing-care principles, *Hear & Beyond* offers a new way forward to greater connection and engagement—whether you're new to hearing loss or have been living with it for a long time. Hearing loss is just one aspect of who you are, among many others. You may have hearing loss, but it doesn't have to have you.

A New Civil Right Karen Peltz Strauss,2006 Shift of telephone companies and others from a charitable or social services perspective to one that such access is a civil right to which deaf and hard-of-hearing people are entitled. Strauss covers the gamut of the legal movement toward access—from the initial use of modems with teleprinters of the 1960s to the current wireless world. As a hearing person with many deaf friends and contacts, she personally experienced the frustrations of using telecommunications access services—and these experiences provided a motivating force for her own involvement in the battles to implement laws. Chapters on the development and implementation of relay services outline comprehensively one of the greatest triumphs for deaf people in the United States. The chapter titled In Case of Emergency is particularly moving.

Shouting Won't Help Katherine Bouton,2013-02-19 For twenty-two years, Katherine Bouton had a secret that grew harder to keep every day. An editor at The New York Times, at daily editorial meetings she couldn't hear what her colleagues were saying. She had gone profoundly deaf in her left ear; her right was getting worse. As she once put it, she was the kind of person who might have used an ear trumpet in the nineteenth century. Audiologists agree that we're experiencing a national epidemic of hearing impairment. At present, 50 million Americans suffer some degree of hearing loss—17 percent of the population. And hearing loss is not exclusively a product of growing old. The usual onset is between the ages of nineteen and forty-four, and in many cases the cause is unknown. *Shouting Won't Help* is a deftly written, deeply felt look at a widespread and misunderstood phenomenon. In the style of Jerome Groopman and Atul Gawande, and using her experience as a guide, Bouton examines the problem personally, psychologically, and physiologically. She speaks with doctors, audiologists, and neurobiologists, and with a variety of people afflicted with midlife hearing loss, braiding their stories with her own to illuminate the startling effects of the condition. The result is a surprisingly engaging account of what it's like to live with an invisible disability—and a robust prescription for our nation's increasing problem with deafness. Hands of My Father Myron Uhlberg,2009-02-03 By turns heart-tugging and hilarious, Myron Uhlberg’s memoir tells the story of growing up as the hearing son of deaf parents—and his life in a world that he found unaccountably beautiful, even as he longed to escape it. “Does sound have rhythm?” my father asked. “Does it rise and fall like the ocean? Does it come and go like the wind?” Such were the kinds of questions that Myron Uhlberg’s deaf father asked him from earliest childhood, in his eternal quest to decipher, and to understand, the elusive nature of sound. Quite a challenge for a young boy, and one of many he would face. Uhlberg’s first language was American Sign Language, the first sign he learned: “I love you.” But his second language was spoken English—and no sooner did he learn it than he was called upon to act as his father’s ears and mouth in the stores and streets of the neighborhood beyond their silent apartment in Brooklyn. Resentful as he sometimes was of the heavy burdens heaped on his small shoulders, he nonetheless adored his parents, who passed on to him their own passionate engagement with life. These two remarkable people married and had children at the absolute bottom of the Great Depression—an expression of extraordinary optimism, and typical of the joy and resilience they were able to summon at even the darkest of times. From the beaches of Coney Island to Ebbets Field, where he watches his father’s hero Jackie Robinson play ball, from the branch library above the local Chinese restaurant where the odor of chow mein rose from the pages of the books he devoured to the hospital ward where he visits his polio-afflicted friend, this is a memoir filled with stories about growing up not just as the child of two deaf people but as a book-loving, mischief-making, tree-climbing kid during the remarkably eventful period that spanned the Depression, the War, and the early fifties.From the Hardcover edition.

A Phone of Our Own Harry G. Hear Again Arlene Romoff,1999 Arlene Romoff began losing her hearing during her college years. It continued to decline gradually until, almost thirty years later, she was left profoundly deaf. When hearing aids no longer worked for her, she elected to get a cochlear implant, a computerized device that stimulates the auditory nerve directly. For the next year, Arlene shared her experiences, via email, with family, friends and colleagues. These postings are brought together in this book, a fascinating chronicle of what life was like without hearing, and her return to the world of sound with this miraculous device.
