The Footprints of a Wisconsin Lumber Executive Jan M. Long,2001-02-05 When one studies the history of Wisconsin, it is

impossible to ignore the significant role played by the lumber industry during the Nineteenth Century. Down through the years, many authors have discussed the history of the lumber industry in Wisconsin during this era. No discussion of this subject is complete without reference to the dynamic impact of The Knapp, Stout & Co. Company and its founder, William Wilson...due to its dominating role in the industry. Consequently, many authors have referenced this company and its founder. However, up to this point, no book has been exclusively devoted to this famed company, and its founder. This volume tells the compelling story of William Wilson, who built a world class lumber empire in the woods of Wisconsin. It collects this secondary information, that is, the relevant published accounts of this company and its founder, weaving it together with primary sources. In the end, we have a volume which brings into sharper focus, the history of Northwestern Wisconsin's Red Cedar Valley, and the forces which forever modified the geographical character of the region.

Foxconned Lawrence Tabak, 2022-11-18 Powerful and resonant, *Foxconned* is both the definitive autopsy of the Foxconn fiasco and a dire warning to communities and states nationwide. When Wisconsin governor Scott Walker stood shoulder to shoulder with President Trump and Speaker of the House Paul Ryan at the White House in July 2017, they painted a glorious picture of his state's future. Foxconn, the enormous China-based electronics firm, was promising to bring TV manufacturing back to the United States with a \$10 billion investment and 13,000 well-paying jobs. They actually were making America great again, they crowed. Two years later, the project was in shambles. Ten thousand construction workers were supposed to have been building what Trump had promised would be "the eighth wonder of the world." Instead, land had been seized, homes had been destroyed, and hundreds of millions of municipal dollars had been committed for just a few hundred jobs—nowhere near enough for Foxconn to earn the incentives Walker had shoveled at them. In *Foxconned*, journalist Lawrence Tabak details the full story of this utter collapse, which was disturbingly inevitable. As Tabak shows,

everything about Foxconn was a disaster. But worse, he reveals how the economic incentive infrastructure across the country is broken, leading to waste, cronyism, and the steady transfer of tax revenue to corporations. Tabak details every kind of financial chicanery, from eminent domain abuse to good old-fashioned looting—all to benefit a coterie of consultants, politicians, and contractors. With compassion and care, he also reports the distressing stories of the many individuals whose lives were upended by Foxconn.

The WPA Guide to Wisconsin Federal Writers'

Project, 2013-10-31 During the 1930s in the United States, the Works Progress Administration developed the Federal Writers' Project to support writers and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of individual guides to each of the states. Little-known authors—many of whom would later become celebrated literary figures—were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor. America's Dairyland is well represented in the WPA Guide to Wisconsin. Essays on the Badger State's vital industries—including agriculture, lumber, and dairy—are included as

well as an important look at the labor movement of the 1930s. From the Northern Highland and Lake Superior to the Driftless Area and the Eastern Ridges and Lowlands, the states unique geography is also photographically documented.
