Marketing and Mobile Financial Services Aijaz A. Shaikh, Heikki Karjalainen, 2018-12-21 Mobile financial services (MFS) are of major interest and importance to both researchers and practitioners. The role played by nonbanking actors including telecoms and FinTech firms as well as other participants, such as PayPal and Amazon, in developing and deploying innovative financial and payment services is undeniable. Peer2peer (P2P) payments from nonbank services are becoming increasingly commonplace and will shortly be codified by EC (EU?) regulations requiring banks to provide access to consumer data for third-party app developers and service providers. Three major mobile financial systems—mobile banking, mobile payments, and branchless banking—currently dominate the electronic retail banking sector. Although interconnected and interrelated, their business models, regulatory frameworks, and target markets are distinct. This book provides a unified perspective on MFS and discusses its evolution, growth, and future, as well as identifying the frameworks, stakeholders, and technologies used in financial information systems in general and MFS in particular. Academics and researchers in digital and financial marketing will find this book an invaluable resource, as will bank executives, regulators, policy makers, FinTech professionals, and anyone interested in how mobile technology, social media and financial services will increasingly intersect.

Bank 3.0 Brett King, 2012-11-19 The first edition of BANK 2.0—#1 on Amazon's bestseller list for banking and finance in the US, UK, Germany, France, and Japan for over 18 months—took the financial world by storm and became synonymous with disruptive customer behaviour, technology shift, and new banking models. In BANK 3.0, Brett King brings the story up to date with the latest trends redefining financial services and payments—from the global scramble for dominance of the mobile wallet and the expectations created by tablet computing to the operationalising of the cloud, the explosion of social media, and the rise of the de-banked consumer, who doesn't need a bank at all. BANK 3.0 shows that the gap between customers and financial services players is rapidly widening, leaving massive opportunities for new, non-bank competitors to totally disrupt the industry. On the Web and on Mobile, the customer isn't king—he's dictator. Highly impatient, skeptical, cynical. Brett King understands deeply what drives this new hard-nosed customer. Banking professionals would do well to heed his advice. —Gerry McGovern, author of Killer Web Content
