**Space in Language and Linguistics** Peter Auer,Martin Hilpert,Anja Stukenbrock,Benedikt Szmrecsanyi,2013-11-27 This book brings together three perspectives on language and space that are quite well-researched within themselves, but which so far are lacking productive interconnections. Specifically, the book aims to interconnect the following research areas: Language, space, and geography Grammar, space, and cognition Language and interactional spaces The contributions in this book cover geographical language variation within and across languages, language use in stationary and mobile interactional spaces, computer-mediated communication, and spatial reasoning across languages. This range of issues showcases the thematic and methodological breadth of research on language and space. In order to identify interconnections, the respective contributions are accompanied by commentaries that highlight common threads.

**Language Hacking German** Benny Lewis, 2017-03-28 It's true that some people spend years studying German before they finally get around to speaking the language. But here's a better idea. Skip the years of study and jump right to the speaking part. Sound crazy? No, it's language hacking. Unlike most traditional language courses that try to teach you the rules of German, #LanguageHacking shows you how to learn and speak German through proven memory techniques, unconventional shortcuts and conversation strategies perfected by one of the world's greatest language learners, Benny Lewis, aka the Irish Polyglot. Using the language hacks -shortcuts that make learning simple - that Benny mastered while learning his 11 languages and his 'speak from the start' method, you will crack the language code and exponentially increase your language abilities so that you can get fluent faster. It's not magic. It's not a language gene. It's not something only other people can do. It's about being smart with how you learn, learning what's indispensable, skipping what's not, and using what you've learned to have real conversations in German from day one. The Method #LanguageHacking takes a modern approach to language learning, blending the power of online social collaboration with traditional methods. It focuses on the conversations that learners need to master right away, rather than presenting language in order of difficulty like most courses. This means that you can have conversations immediately,

not after years of study. Each of the 10 units culminates with a speaking 'mission' that prepares you to use the language you've learned to talk about yourself. Through the language hacker online learner community, you can share your personalized speaking 'missions' with other learners - getting and giving feedback and extending your learning beyond the pages of the book . You don't need to go abroad to learn a language any more.

Webcam Daniel Miller,Jolynna Sinanan,2014-03-12 The use of webcam, especially through Skype, has recently become established as one more standard media technology, but so far there has been no attempt to assess its fundamental nature and consequences. Yet webcam has profound implications for many facets of human life, from self-consciousness and intimacy to the sustaining of long-distance relationships and the place of the visual within social communications. Based on research in London and Trinidad, this book shows how 'always-on' webcam is becoming an entirely different phenomenon from the initial use of webcam as a videophone. Webcam is examined within the framework of 'polymedia' - that is, the new environments created by the simultaneous presence of a multiplicity of communication technologies - and

used to exemplify a theory of attainment that accepts media technologies as aspects of, rather than detracting from, our basic humanity.

**Die Dynamik sozialer und sprachlicher Netzwerke** Barbara Frank-Job, Alexander Mehler, Tilmann Sutter, 2013-08-04 In diesem Band präsentieren Medien- und Informationswissenschaftler, Netzwerkforscher aus Informatik, Texttechnologie und Physik, Soziologen und Linguisten interdisziplinär Aspekte der Erforschung komplexer Mehrebenen-Netzwerke. Im Zentrum ihres Interesses stehen Untersuchungen zum Zusammenhang zwischen sozialen und sprachlichen Netzwerken und ihrer Dynamiken, aufgezeigt an empirischen Beispielen aus dem Bereich des Web 2.0, aber auch an historischen Dokumentenkorpora sowie an Rezeptions-Netzwerken aus Kunst- und Literaturwissenschaft.

**Moving Images** John Fullerton, Astrid Söderbergh Widding, 2000-06-22 Seventeen essays examining the impact of new media on the history of cinema. In 1888, Thomas Edison announced that he was experimenting on "an instrument which does for the eye what the phonograph does for the ear, which is the recording and reproduction of things in motion." Just as Edison's investigations were framed in terms of the known technologies of the phonograph and the microscope, the essays in this collection address the contexts of innovation

and reception that have framed the development of moving images in the last one hundred years. Three concerns are of particular interest: the contexts of innovation and reception for moving image technologies; the role of the observer, whose vision and cognitive processes define some of the limits of inquiry and epistemological insight; and the role of new media, which, engaging with the domestic sphere as cultural interface, are transforming our understanding of public and private spheres. The seventeen previously unpublished essays in *Moving Images* represent the best of current research in the history of this field. They make a timely and stimulating contribution to debates concerning the impact of new media on the history of cinema. Contributors include: William Boddy, Carlos Bustamante, Warren Buckland, Valeria Camporesi, Bent Fausing, Oliver Gaycken, Alison Griffiths, Christopher Hales, Jan Holmberg, Solveig Jülich, Frank Kessler, Jay Moman, Sheila C. Murphy, Pelle Snickars, Paul C. Spehr, Björn Thuresson, and Åke Walldius.

The Webcam as an Emerging Cinematic Medium Paula Albuquerque, 2018 All the world's a stage - literally so, given the ubiquitous presence of webcams recording daily life in cities. This footage, allegedly documentary, recreates cities as cinematic environments as people interact with the multitudes of cameras and screens around them. Paula Albuquerque's original research and experimental films, presented in this groundbreaking book, expose fictionalising elements in archival webcams and explore video

surveillance as an urban condition that influences both perceptions of the past and visions of the future.

Webcam Savvy Clarence Jones, 2017-02-04 If you want to succeed in that next webcam job audition or news interview, you'd better learn how to do it. To get the job - or to get your point across in a news story - you need a lot of webcam savvy. Otherwise, you wind up at the unemployment office; or on the cutting room floor at the network or local TV station. Looking self-confident, relaxed, sincere, and unrehearsed takes a lot of practice. Very few of us are born with it. You also need the right webcam, and know how to set it up. We have become so accustomed to slickly produced video, you scream AMATEUR-BEGINNER using the built-in camera in a laptop, shot at a strange

angle, with the clutter of your bedroom and a barking dog in the background. This book will help you choose the right webcam and microphone (they're very inexpensive); teach you how to build a simple set and place everyday lights; and how to maintain eye contact. There's another secret in this book: successful interviews need to include -- a magic formula that will impress an employer, or guarantee you'll be included in tonight's TV news story. Author Clarence Jones knows what he's writing about. He was a prize-winning TV reporter for 14 years, than an on-camera coach for government and corporate executives for 30 years. He has five other books currently in print -- one of them reviewers call the bible for news media relations.
