**Self Portrait in Green** Marie NDiaye,2021-02-25 'NDiaye is a hypnotic storyteller with an unflinching understanding of the rock-bottom reality of most people's life.' New York Times ' One of France's most exciting prose stylists.' The Guardian. Obsessed by her encounters with the mysterious green women, and haunted by the Garonne River, a nameless narrator seeks them out in La Roele, Paris, Marseille, and Ouagadougou. Each encounter reveals different aspects of the women; real or imagined, dead or alive, seductive or suicidal, driving the narrator deeper into her obsession, in this unsettling exploration of identity, memory and paranoia. Self Portrait in Green is the multi-prize winning, Marie NDiaye's brilliant subversion of the memoir. Written in diary entries, with lyrical prose and dreamlike imagery, we start with and return to the river, which mirrors the narrative by posing more questions than it answers.

**The Cuckoo's Calling** Robert Galbraith,2013-04-30 Published under a pseudonym, J. K. Rowling's brilliant debut mystery introduces Detective Cormoran Strike as he investigates a supermodel's suicide in one of the best books of the year (USA Today), the first novel in the brilliant series that inspired the acclaimed HBO Max series C.B. Strike. After losing his leg to a land mine in Afghanistan, Cormoran Strike is barely scraping by as a private investigator. Strike is down to one client, creditors are calling, and after a breakup with his longtime girlfriend, he's living in his office. Then John Bristow walks through his door with a shocking story: His sister, the legendary supermodel Lula Landry -- known to her friends as the Cuckoo -- famously fell to her death a few months earlier. The police ruled it a suicide, but John refuses to believe that. The case plunges Strike into the world of multimillionaire beauties, rock-star boyfriends, and desperate designers, and it introduces him to every variety of pleasure, enticement, seduction, and delusion known to man. You may think you know detectives, but you've never met one quite like Strike. You may think you know about the wealthy and famous, but you've never seen them under an investigation like this.

A Historical Review and Analysis of Army Physical Readiness Training and Assessment Whitfield East,2013-12 The Drillmaster of Valley Forge-Baron Von Steuben-correctly noted in his Blue Book how physical conditioning and health (which he found woefully missing when he joined Washington's camp) would always be directly linked to individual and unit discipline, courage in the fight, and victory on the battlefield. That remains true today. Even an amateur historian, choosing any study on the performance of units in combat, quickly discovers how the levels of conditioning and physical performance of Soldiers is directly proportional to success or failure in the field. In this monograph, Dr. Whitfield Chip East provides a pragmatic history of physical readiness training in our Army. He tells us we initially mirrored the professional Armies of Europe as they prepared their forces for war on the continent. Then he introduces us to some master trainers, and shows us how they initiated an American brand of physical conditioning when our forces were found lacking in the early wars of the last century. Finally, he shows us how we have and must incorporate science (even when there exists considerable debate!) to contribute to what we do-and how we do it-in shaping today's Army. Dr. East provides the history, the analysis, and the pragmatism, and all of it is geared to understanding how our Army has and must train Soldiers for the physical demands of combat. Our culture is becoming increasingly "unfit, due to poor nutrition, a lack of adequate and formal exercise, and too much technology. Still, the Soldiers who come to our Army from our society will be asked to fight in increasingly complex and demanding conflicts, and they must be prepared through new, unique, and scientifically based techniques. So while Dr. East's monograph is a fascinating history, it is also a required call for all leaders to better understand the science and the art of physical preparation for the battlefield. It was and is important for us to get this area of training right, because getting it right means a better chance for success in combat.

Minor Detail Adania Shibli,2020-05-26 A searing, beautiful novel meditating on war, violence, memory, and the sufferings of the Palestinian people Finalist for the National Book Award Longlisted for the International Booker Prize Minor Detail begins during the summer of 1949, one year after the war that the Palestinians mourn as the Nakba—the catastrophe that led to the displacement and exile of some 700,000 people—and the Israelis celebrate as the War of Independence. Israeli soldiers murder an encampment of Bedouin in the Negev desert, and among their victims they capture a Palestinian teenager and they rape her, kill her, and bury her in the sand. Many years later, in the near-present day, a young woman in Ramallah tries to uncover some of the details surrounding this particular rape and murder, and becomes fascinated to the point of obsession, not only because of the nature of the crime, but because it was committed exactly twenty-five years to the day before she was born. Adania Shibli masterfully overlays these two translucent narratives of exactly the same length to evoke a present forever haunted by the past.

The Animal Days Keila Vall de la Ville,2021-07-30 A woman's story of movement as a both a lifestyle and a rite of passage, The Animal Days follows Julia's journey of love and rock-climbing across three continents. In this fast-paced novel, joy is linked to self-destruction, love is inseparable from death, freedom is twinned with unbearable solitude, and life is worth only as much as a given moment. The taste for risk and vertigo never stop: they feed each other as the abyss approaches. Julia, determined to never look back, lives perpetually on the brink, even if it means shedding her own skin in the process.

**Dermatoglyphics in Medical Disorders** B. Schaumann,M. Alter,2012-12-06 The skin on the fingertips and palmar and plantar surfaces of man is not smooth. It is grooved by curious ridges, which form a variety of configurations. These ridge configurations have attracted the attention of laymen for millenia. They have also evoked the serious interest of scientists for more than three centuries. The anatomist Bidloo provided a description of ridge detail in the seventeenth century. Since then, additional information has been added by anthropologists, biologists, and geneticists. For the last century, the fact that each individual's ridge configurations are unique has been utilized as a means of personal identification especially by law enforcement officials. Widespread medical interest in epidermal ridges developed only in the last several decades when it became apparent that many patients with chromosomal aberrations had unusual ridge formations. Inspection of skin ridges, therefore, promised to provide a simple, inexpensive means for determining whether a given patient had a particular chromosomal defect. However, the promise was only partially fulfilled because of the inherent variability of skin ridge configurations. It was possible to draw conclusions about ridge abnormalities in groups of patients but not always in a given individual. Patients and clinicians became somewhat disenchanted with the clinical value of studying ridges.

*New Quests in Stellar Astrophysics II* Miguel Chavez Dagostino, Emanuele Bertone, Daniel Rosa Gonzalez, Lino Hector Rodriguez-Merino, 2009-02-27 This book presents an up-to-date collection of reviews and contributed articles in the field of ultraviolet astronomy. Its content has been mainly motivated by the recent access to the rest frame UV light of distant red galaxies, gained through large optical facilities. This driveway has derived in a renewed interest on the stars that presumably dominate or have important effects on the integrated UV properties of evolved systems of the nearby and faraway Universe. The topics included in this volume extend from the fresh spectroscopic analyses of high redshift early-type galaxies observed with the 8-10m class telescopes to the fundamental outcomes from various satellites, from the long-lived International Ultraviolet Explorer to current facilities, such as the Galaxy Evolution Explorer. This is one of the few volumes published in recent years devoted to UV astronomical research and the only one dedicated to the properties of evolved stellar populations at these wavelengths. This contemporary panorama will be an invaluable resource in the preparation of the next planned space missions, such as the World Space Observatory and the Ultraviolet Imaging Telescope.

**After Theory** Terry Eagleton, 2004-08-26 The golden age of cultural theory (the product of a decade and a half, from 1965 to 1980) is long past. We are living now in its aftermath, in an age which, having grown rich in the insights of thinkers like Althusser, Barthes and Derrida, has also moved beyond them. What kind of new, fresh thinking does this new era demand? Eagleton concludes that cultural theory must start thinking ambitiously again - not so that it can hand the West its legitimation, but so that it can seek to make sense of the grand narratives in which it is now embroiled.

**Adrenalin** Ghiyāth Rāsim Mad'hūn, 2017 Poetry. Middle Eastern Studies. Translated from the Arabic by Catherine Cobham. Here is ADRENALIN, Syrian-born, Stockholm-based Palestinian poet Ghayath Almadhoun's first collection to be published in English. This sinuous translation comprises poems that span years and continents, that circulate between cities, ideas, lovers, places of refuge, war zones, time zones, histories. Here is a vital, relentless, intertextual voice that refuses arrest by sentimentality, that pursues the poetry coursing underneath the poetry.

**Abel and Cain** Gregor von Rezzori,2019-06-04 Appearing together in English for the first time, two masterpieces that take on the jazz age, the Nuremburg trials, postwar commercialism, and the feat of writing a book, presented in one brilliant volume The Death of My Brother Abel and its delirious sequel, Cain, constitute the magnum opus of Gregor von Rezzori’s prodigious career, the most ambitious, extravagant, outrageous, and deeply considered achievement of this wildly original and never less than provocative master of the novel. In Abel and Cain, the original book, long out of print, is reissued in a fully revised translation; Cain appears for the first time in English. The Death of My Brother Abel zigzags across the middle of the twentieth century, from the 1918 to 1968, taking in the Jazz Age, the Anschluss, the Nuremberg trials, and postwar commercialism. At the center of the book is the unnamed narrator, holed up in a Paris hotel and writing a kind of novel, a collage of sardonic and passionate set pieces about love and work, sex and writing, families and nations, and human treachery and cruelty. In Cain, that narrator is revealed as Aristide Subics, or so at least it appears, since Subics’ identity is as unstable as the fictional apparatus that contains him and the times he lived through. Questions abound: How can a man who lived in a time of lies know himself? And is it even possible to tell the story of an era of lies truthfully? Primarily set in the bombed-out, rubble- strewn Hamburg of the years just after the war, the dark confusion and deadly confrontation and of Cain and Abel, inseparable brothers, goes on.
