Human Rights and the Digital Divide Anne Peacock,2019-06-03 The Internet's importance for freedom of expression and other rights comes in part from the ability it bestows on users to create and share information, rather than just receive it. Within the context of existing freedom of expression guarantees, this book critically evaluates the goal of bridging the 'digital divide' - the gap between those who have access to the Internet and those who do not. Central to this analysis is the examination of two questions: first, is there a right to access the Internet, and if so, what does that right look like and how far does it extend? Second, if there is a right to access the Internet, is there a legal obligation on States to overcome the digital divide? Through examination of this debate's history, analysis of case law in the European Court of Human Rights and Inter-American Court of Human Rights, and a case study of one digital inclusion programme in Jalisco, Mexico, this book concludes that there is indeed currently a legal right to Internet access, but one that it is very limited in scope. The 2012 Joint Declaration on Freedom of Expression and the Internet is aspirational in nature, rather than a representative summary of current protections afforded by the international human rights legal framework. This book establishes a critical foundation from which some of these aspirations could be advanced in the future. The digital divide is not just a human rights challenge nor will it be overcome through human rights law alone. Nevertheless, human rights law could and should do more than it has thus far.

Bad Wolf Nele Neuhaus,2014-01-21 She looked at herself in the mirror, touched her fingertips to the little red hood on her head, and laughed. The dress was a real dirndl, with a short skirt and apron. Papa had plaited her hair into two braids, and she really looked exactly like Little Red Riding Hood in her fairy-tale book. He always brought presents—it was a secret that she and Papa shared, because he never brought anything for the others. Only for her. She was his favorite. The door opened, and she uttered a frightened cry when she saw the wolf. But then she had to laugh. It wasn't a real wolf after all; it was only Papa, who had put on a costume. How lovely it was that she was the only one to share this secret with Papa. Too bad she could never remember anything afterward. On a hot June day, the body of a sixteen-year-old girl washes up on a riverbank outside of Frankfurt. She has been brutally murdered and shows signs of long-term abuse, but no one comes forward with any information as to her identity.

Even weeks later, the local police have not been able to find out who she is. Then a new case comes in: A popular television host is attacked, raped, and locked in the trunk of her own car. She survives, barely, and is able to supply only vague hints to the police, having to do with her recent investigations into an organization whose members are from the highest echelons of society, and the potential uncovering of a shocking history they'd prefer to keep from the public eye. As the two cases collide, Inspectors Pia Kirchhoff and Oliver von Bodenstein dig deep into the past and underneath the veneer of bourgeois society to come up against a terrible secret that is about to impact their personal lives as well. It is almost too late for a person very close to Pia before she and Oliver finally track down the big bad wolf. . . . In Nele Neuhaus's second U.S. publication of her enormously popular series, tensions run high both inside and outside police headquarters, and a complex and unpredictable plot propels her characters forward at breakneck speed.

A Corpus of Roman Engraved Gemstones from British Sites Martin Henig, 1978 'The primary purpose of an engraved gem or ring-bezel, cut in intaglio, was to make an impression upon some fictile material., which would be understood by the owner of the device, and by his associates, as a personal signature.' So began Martin Henig's original BAR Number 7 from 1978, in the British Series of British Archaeological Reports, a catalogue and study of over 1000 Roman engraved gemstones from the British Isles. Nearly 30 years later comes the third edition of this study, the new Preface to which concludes: 'Over the years I have thought more about gems in relation to other arts and have integrated glyptics into my book on The Art of Roman Britain (1995). Several papers I have written recently have attempted to use gems, like sculpture, painting and bronzes to elucidate general artistic problems. This should be obvious but how many art-historians seem to have the inclination to take gems seriously? At least interest in provincial glyptics seems greater today and that gives me grounds for hope Important studies are being conducted across the Empire ranging from Belgium . and Portugal ., to Turkey . and Israel. It is for each new generation to reassess the evidence, in the case of our subject with the aid of new techniques, of computing on the one hand and scientific analysis of materials and cutting techniques on the other. In addition the fresh eye of youth is always invaluable. Someone else can often see what should have been obvious to one all the time. (Wolfson College, Oxford. Feast of St Frideswide, 2005)'
