Sports Endocrinology Michelle P. Warren,Naama W. Constantini,2000-05-01 Since the observation in the 19th century that an extract of the suprarenal bodies injected into the circulation caused a rise in blood pressure, the endocrine system has become a major component in our understanding of human physiology. The introduction of radioimmunoassay techniques and the ability to measure minimal amounts of hormones (a term derived from the Greek to excite) have shown that acute exercise causes a release of a large number of hormones and that chronic exercise may further lead to long-term alterations in endocrine homeostasis. Actually, almost every organ and system in the body is affected by physical activity and exercise, much of it through the endocrine and neuroendocrine system. Investigation of the effect of acute or chronic physical activity on the endocrine system is a complex matter since the stimulus called exercise has many components, such as mode, intensity, duration, and others. In addition, several other factors, such as age, gender, training status, body temperature, circadian rhythm, metabolic state, menstrual cycle, and various external conditions as well as psychological factors, can modify the effect of physical activity on hormonal secretion. Moreover, the physiological stimulus of exercise often provokes several and parallel cascades of biochemical and endocrine changes. It is therefore often extremely difficult to distinguish between primary and secondary events and between cause and effect. These limitations will be discussed in Chapter 1.

Mobile e-Health Hannah R. Marston,Shannon Freeman,Charles Musselwhite,2018-09-05 This multi-disciplinary collection of essays captures discussion, thinking and research surrounding the recent surge of interest in how technology can help us as we age. A wide range of topics are covered, from investigations in the use of technology to improve health and well-being, to examinations of digital gaming, mobile health apps and the quantified self in relation to an ageing population. From multi-disciplinary perspectives, this collection highlights the role of a more social approach to technology. As such, a variety of social research methods are used throughout the chapters. The benefits and issues with different approaches are highlighted both in terms of further research, but also so the reader can judge the value of the research for themselves. This collection brings together the latest thinking and cutting edge contemporary research from leading thinkers and academics in the field of human computer interaction, health and gerontology. In taking a social approach, it highlights how technological practices fit within wider gerontological, political and cultural perspectives. It therefore has potential to influence those working in human computer interaction, digital humanities, sociology, psychology and gerontology. It can help change the practice of people working in the health and social care field, in computer and product design, and in the digital and creative industries.

Becoming the One Sheleana Aiyana,2022-06-14 Spiritual writer and founder of Rising Woman, Sheleana Aiyana takes you on a transformational

inner-work journey to heal life-long relationship patterns and reclaim power over your life. Romantic relationships have the ability to infuse our lives with the magic of intimacy and connection. But for many of us, that magic is fleeting—over and over, our relationships don't last, or if they do, they fail to make us happy. We find ourselves chasing unavailable love, sublimating our needs in service to others, or trying to save our partners from themselves, all the while abandoning the one who needs us most—ourselves. If you find yourself struggling to let go after a relationship ends, or you keep hitting the same wall in dating and relationships with emotionally unavailable people, this is not a sign that you are broken. It is a sign that somewhere along the way, you learned to sacrifice yourself in order to be loved. In *Becoming the One*, spiritual leader and visionary founder of the Rising Woman community Sheleana Aiyana offers a roadmap for transforming your relationship patterns to end the cycle of self-abandonment and move into the light of self-discovery. You'll learn to:

- build a secure, loving relationship with yourself.
- connect with your inner child.
- challenge your core beliefs about love.
- set self-affirming boundaries.
- discover and celebrate your true desires.
- recognize red and green flags.

Sheleana's revolutionary lessons, based on wisdom from the traumas of her past and years of guiding thousands of women around the world in her internationally acclaimed *Becoming the One* program of spiritual and therapeutic healing practices, teach you to embody the qualities you are seeking in others so that you can become the one for yourself. You'll learn how to trust your body, make peace with your past, and clear the path for healthy, conscious love—one that returns the authority to you to choose how to live and whom to love. The desire for love is wired into the very fibers of our being, but before you can create rewarding bonds with others, first you must stand wholeheartedly in self-acceptance. *Becoming the One* is an invitation to find your way home to yourself.

WomanCode Alisa Vitti, 2013 Alisa Vitti found herself suffering through the symptoms of polycystic ovarian syndrome (PCOS), and was able to heal herself through food and lifestyle changes. Relieved and reborn, she made it her mission to empower other women to be able to do the same. As she says, 'Hormones affect everything. Have you ever struggled with acne, oily hair, dandruff, dry skin, cramps, headaches, irritability, exhaustion, constipation, irregular cycles, heavy bleeding, clotting, shedding hair, weight gain, anxiety, insomnia, infertility, lowered sex drive, or bizarre food cravings and felt like your body was just irrational?' With this breadth of symptoms, improving hormonal health is a goal for women at every stage of their lives. Alisa Vitti says that medication and anti-depressants aren't the only solutions. The thousands of women she has treated in her Manhattan clinic know the power of her process that focuses on uncovering your unique biological make up. Groundbreaking and informative, *WomanCode* educates women about hormone health in a way that's relevant and easy to understand. Bestselling author and women's health expert Christiane Northrup, who has called *WomanCode* the 'Our Bodies, Ourselves of this generation', provides an insightful foreword.

Winkler, Breanne Fahs, Katie Ann Hasson, Elizabeth Arveda Kissling, Tomi-Ann Roberts, 2020-07-24 This open access handbook, the first of its kind, provides a comprehensive and carefully curated multidisciplinary and genre-spanning view of the state of the field of Critical Menstruation Studies, opening up new directions in research and advocacy. It is animated by the central question: “what new lines of inquiry are possible when we center our attention on menstrual health and politics across the life course?” The chapters—diverse in content, form and perspective—establish Critical Menstruation Studies as a potent lens that reveals, complicates and unpacks inequalities across biological, social, cultural and historical dimensions. This handbook is an unmatched resource for researchers, policy makers, practitioners, and activists new to and already familiar with the field as it rapidly develops and expands.

Handbook of Research on Holistic Perspectives in Gamification for Clinical Practice Novák, Daniel, 2015-09-14 Over the past decade, the healthcare industry has adopted games as a powerful tool for promoting personal health and wellness. Utilizing principles of gamification to engage patients with positive reinforcement, these games promote stronger attention to clinical and self-care guidelines, and offer exciting possibilities for primary prevention. Targeting an audience of academics, researchers, practitioners, healthcare professionals, and even patients, the *Handbook of Research on Holistic Perspectives in Gamification for Clinical Practices* reviews current studies and empirical evidence, highlights critical principles of gamification, and fosters the increasing application of games at the practical, clinical level.

Feminism, Labour and Digital Media Kylie Jarrett, 2015-11-19 There is a contradiction at the heart of digital media. We use commercial platforms to express our identity, to build community and to engage politically. At the same time, our status updates, tweets, videos, photographs and music files are free content for these sites. We are also generating an almost endless supply of user data that can be mined, re-purposed and sold to advertisers. As users of the commercial web, we are socially and creatively engaged, but also labourers, exploited by the companies that provide our communication platforms. How do we reconcile these contradictions? *Feminism, Labour and Digital Media* argues for using the work of Marxist feminist theorists about the role of domestic work in capitalism to explore these competing dynamics of consumer labour. It uses the concept of the Digital Housewife to outline the relationship between the work we do online and the unpaid sphere of social reproduction. It demonstrates how feminist perspectives expand our critique of consumer labour in digital media. In doing so, the *Digital Housewife* returns feminist inquiry from the margins and places it at the heart of critical digital media analysis.

On The Economics Of Marriage Shoshana Grossbard-schechtman, Shoshana Grossbard-Shechtman, 2019-07-11 Marriage is an institution that plays a central role in most societies. As it affects decisions regarding labor supply, consumption, reproduction, and other important decisions, marriage receives considerable attention in academic circles. Much research has been done about marriage, principally by sociologists, psychologists, and anthropologists.

The Quantified Self Deborah Lupton, 2016-09-07 With the advent of digital devices and software, self-tracking practices have gained new adherents and have spread into a wide array of social domains. The Quantified Self movement has emerged to promote 'self-knowledge through numbers'. In this groundbreaking book Deborah Lupton critically analyses the social, cultural and political dimensions of contemporary self-tracking and identifies the concepts of selfhood and human embodiment and the value of the data that underpin them. The book incorporates discussion of the consolations and frustrations of self-tracking, as well as about the proliferating ways in which people's personal data are now used beyond their private rationales. Lupton outlines how the information that is generated through self-tracking is taken up and repurposed for commercial, governmental, managerial and research purposes. In the relationship between personal data practices and big data politics, the implications of self-tracking are becoming ever more crucial.

Heteromation, and Other Stories of Computing and Capitalism Hamid R. Ekbia, Bonnie A. Nardi, 2017-05-04 An exploration of a new division of labor between machines and humans, in which people provide value to the economy with little or no compensation. The computerization of the economy—and everyday life—has transformed the division of labor between humans and machines, shifting many people into work that is hidden, poorly compensated, or accepted as part of being a “user” of digital technology. Through our clicks and swipes, logins and profiles, emails and posts, we are, more or less willingly, participating in digital activities that yield economic value to others but little or no return to us. Hamid Ekbia and Bonnie Nardi call this kind of participation—the extraction of economic value from low-cost or free labor in computer-mediated networks—“heteromation.” In this book, they explore the social and technological processes through which economic value is extracted from digitally mediated work, the nature of the value created, and what prompts people to participate in the process. Arguing that heteromation is a new logic of capital accumulation, Ekbia and Nardi consider different kinds of heteromated labor: communicative labor, seen in user-generated content on social media; cognitive labor, including microwork and self-service; creative labor, from gaming environments to literary productions; emotional labor,

often hidden within paid jobs; and organizing labor, made up of collaborative groups such as citizen scientists. Ekbia and Nardi then offer a utopian vision: heteromation refigured to bring end users more fully into the prosperity of capitalism.

The Body and Shame Luna Dolezal,2015-03-31 The Body and Shame: Phenomenology, Feminism, and the Socially Shaped Body investigates the concept of body shame and explores its significance when considering philosophical accounts of embodied subjectivity. Body shame only finds its full articulation in the presence (actual or imagined) of others within a rule and norm governed milieu. As such, it bridges our personal, individual and embodied experience with the social, cultural and political world that contains us. Luna Dolezal argues that understanding body shame can shed light on how the social is embodied, that is, how the body—experienced in its phenomenological primacy by the subject—becomes a social and cultural artifact, shaped by external forces and demands. The Body and Shame introduces leading twentieth-century phenomenological and sociological accounts of embodied subjectivity through the work of Edmund Husserl, Maurice Merleau-Ponty, Jean-Paul Sartre, Michel Foucault and Norbert Elias. Dolezal examines the embodied, social and political features of body shame. contending that body shame is both a necessary and constitutive part of embodied subjectivity while simultaneously a potential site of oppression and marginalization. Exploring the cultural politics of shame, the final chapters of this work explore the phenomenology of self-presentation and a feminist analysis of shame and gender, with a critical focus on the practice of cosmetic surgery, a site where the body is literally shaped by shame. The Body and Shame will be of great interest to scholars and students in a wide variety of fields, including philosophy, phenomenology, feminist theory, women’s studies, social theory, cultural studies, psychology, sociology, and medical humanities.
