Debt management Great Britain: Parliament: House of

Commons: Business, Innovation and Skills Committee,2012-03-07

This report highlights four main areas of ongoing concern relating to debt management: regulation of consumer debt, payday loans, debt management companies and the Money Advice Service. It makes a number of recommendations for future Government action including reforms for higher licensing fees to be charged for higher-risk credit businesses, for a fast track procedure be put in place to suspend credit licenses, and for the new regulator be given the power to ban harmful products. The Financial Services Bill did little to clarify the way in which the consumer credit market is to be regulated. The Committee also wants be certain that the payday loan industry adheres to the highest standards - either through the codes of practice that are currently being developed or, failing that, by the new regulator. Regulations also need to be introduced to ensure that debt management companies publish the cost of their debt advice and their outcomes, if an agreement cannot be reached during discussions with the industry. Furthermore, effective auditing of debt management companies' client accounts needs to be established. The Money Advice Service needs to provide details

of its business plan. Given that the legal aid budget for such services is being cut by 75% the Minister's assertion that there will be no diminution of face-to-face debt advice is confusing. The Money Advice Service will be up and running by April and yet its remit, and in particular its relationship with highly respected brands such as Citizens Advice, remains unclear

When Payday Loans Go Wrong Steve Perry, 2011-09-01 Learn how a catastrophic spiral of payday loan debt was conceived, endured and defeated. This is the story of Steve Perry's battle against the industry, a fight which has left its scars on both sides, it's a story to give strength to all of those who are in payday hell.

The Financial Crisis and White Collar Crime - Legislative and Policy Responses Nicholas Ryder, Umut Turksen, Jon Tucker, 2017-09-19 This book offers a commentary on the responses to white collar crime since the financial crisis. The book brings together experts from academia and practice to analyse the legal and policy responses that have been put in place following the 2008 financial crisis. The book looks at a range of topics including: the low priority and resources allocated to fraud; EU regulatory efforts to fight financial crime; protecting whistleblowers in the financial industry; the criminality of the rogue trader; the

evolution of financial crime in cryptocurrencies; and the levying of financial penalties against banks and corporations by the US Department of Justice and Securities and Exchange Commission.

Foundations of Intelligent Systems Troels Andreassen, Henning Christiansen, Juan-Carlos Cubero, Zbigniew W. Ras, 2014-06-03 This book constitutes the refereed proceedings of the 21st International Symposium on Methodologies for Intelligent Systems, ISMIS 2014, held in Roskilde, Denmark, in June 2014. The 61 revised full papers were carefully reviewed and selected from 111 submissions. The papers are organized in topical sections on complex networks and data stream mining; data mining methods; intelligent systems applications; knowledge representation in databases and systems; textual data analysis and mining; special session: challenges in text mining and semantic information retrieval; special session: warehousing and OLAPing complex, spatial and spatio-temporal data; ISMIS posters.

Vulnerable Consumers and the Law Christine Riefa, Severine Saintier, 2020-10-27 This book charts the difficulties encountered by vulnerable consumers in their access to justice, through the contributions of prominent authors (academic, practitioners and consultants) in the field of consumer law and access to justice. It

demonstrates that despite the development of ADR, access to justice is still severely lacking for the vulnerable consumer. The book highlights that a broad understanding of access to justice, which encompasses good regulation and its public enforcement, is an essential ingredient alongside access to the mechanisms of traditional private justice (courts and ADR) to protect the vulnerable consumer. Indeed, many of the difficulties are linked to normative obstacles and lack of access to justice is primarily a vulnerability in itself that can exacerbate existing ones. In addition, because it may contribute to ‘pushing’ already vulnerable consumers into social exclusion it is not simply about economic justice but also about social justice. The book shows that lack of access to justice is not irreversible nor is it necessarily linked to consumer apathy. New technologies could provide solutions. The book concludes with a plea for developing ‘inclusive’ justice systems with more emphasis on public enforcement alongside effective courts systems to offer the vulnerable with adequate means to defend themselves. This book will be suitable for both students and practitioners, and all those with an interest in the justice system.

The Sociology of Debt Featherstone, Mark, 2020-12-16 Over the course of the last ten years the issue of debt has become a serious problem that threatens to destroy the global socio-economic system and ruin the everyday lives of millions of people. This collection brings together a range of perspectives of key thinkers on debt to provide a sociological analysis focused upon the social, political, economic, and cultural meanings of indebtedness. The contributors to the book consider both the lived experience of debt and the more abstract processes of financialisation taking place globally. Showing how debt functions on the level of both macro- and microeconomics, the book also provides a more holistic perspective, with accounts that span

sociological, cultural, and economic forms of analysis.

The Future of High-Cost Credit Jodi Gardner, 2022-07-14 This book proposes a new way of thinking about the controversial and complex challenges associated with the regulation of high-cost credit, specifically payday lending. These products have received significant attention in both the media and political arena. The inadequacy of regulatory interventions has created ongoing problems with the provision of high-cost credit, particularly for consumers with lesser bargaining power and who are already financially vulnerable. The book tackles two specific gaps in the existing literature. The first involves inadequate analysis of the relevant philosophical concepts around high-cost credit, which can result in an over-simplification of what are particularly complex issues. The second is a lack of engagement in both the market and lived experience of borrowers, resulting in limited understanding of those who use these financial products. *The Future of High-Cost Credit* explores the theoretical grounding, policy initiatives and interdisciplinary perspectives associated with high-cost credit, making a novel and insightful contribution to the existing literature. The problems with debt extend far beyond the legal sphere, and the book will therefore be of interest to many other academic

disciplines, as well as for those working in public policy and 'the third sector'.

Negation, Expectation and Ideology in Written Texts Lisa

Nahajec, 2021-06-15 During an election campaign in 2008, Ken Livingstone said to a newspaper reporter “this election is not a joke”. By doing so, he introduced an expectation into the discourse that someone does, in fact, think it is a joke. This book explores how it is that saying what is not the case communicates something about what is. Bringing together a focus on text with cognitive and pragmatic approaches, a case is made for an application of linguistic negation as a tool of analysis. This tool is used to explore the ideological implications of projecting or reflecting readerly expectations. This book contributes to the growing field of Critical stylistics and aims to add to the range of stylistic insights which anchor the analysis of discourse to a consideration of the nuances of language choice.

Principles of Financial Regulation John Armour, Dan

Awrey, Paul Davies, Luca Enriques, Jeffrey N. Gordon, Colin Mayer, Jennifer Payne, 2016-08-04 The financial crisis of 2007-9 revealed serious failings in the regulation of financial institutions and markets, and prompted a fundamental reconsideration of the

design of financial regulation. As the financial system has become ever-more complex and interconnected, the pace of evolution continues to accelerate. It is now clear that regulation must focus on the financial system as a whole, but this poses significant challenges for regulators. Principles of Financial Regulation describes how to address those challenges. Examining the subject from a holistic and multidisciplinary perspective, Principles of Financial Regulation considers the underlying policies and the objectives of regulation by drawing on economics, finance, and law methodologies. The volume examines regulation in a purposive and dynamic way by framing the book in terms of what the financial system does, rather than what financial regulation is. By analysing specific regulatory measures, the book provides readers to the opportunity to assess regulatory choices on specific policy issues and encourages critical reflection on the design of regulation.

Redefining the Market-State Relationship Ioannis

Glinavos, 2013-10-01 This book offers an interdisciplinary overview of the role of law in modern capitalism in the context of financial crisis. In this work, the reader will find a discussion of key issues relevant to the crisis that have occupied the pages of the financial

press since 2007 including an assessment of the meltdown of the sub-prime mortgage market, the credit crunch, the European debt crisis and the turmoil in Greece, plus a series of theoretical contributions that are aimed to challenge perceptions of the market-state relationship and the place of law within it. The book includes a methodological defence of the state-market dichotomy, a critique of the tenets of neoclassical economics, and an evaluation of what the financial crisis heralds for the future of the political economy of western democracies. Ioannis Glinavos argues that it is a mistake to associate markets with freedom and states with oppression, and suggests that more choice for consumers can -and does- mean less choice for citizens. The book suggests that a new social contract is needed to ensure the survival of both capitalism and democracy. In contributing a unique, legal perspective to the underlying dynamics of the financial crisis, this book will be valuable to scholars and students of regulation, financial markets and economic development.

A Man of Yet a Few More Words Swan Morrison, 2014-11 This book is the third and final part of the Short Humour trilogy by Swan Morrison. The first book was called *A Man of Few Words* and that was followed by *A Man of a Few More Words*. In common with the

previous two books, this volume contains one hundred comedy stories, dialogues, poems, letters, spoof news reports, articles and songs with a connecting theme of life in the modern world.

Representations of Poverty and Place Laura L Paterson, Ian N Gregory, 2018-11-03 This book explores a novel methodological approach which combines analytical techniques from linguistics and geography to bring fresh insights to the study of poverty. Using Geographical Text Analysis, it maps the discursive construction of poverty in the UK and compares the results to what administrative data reveal. The analysis draws together qualitative and quantitative techniques from corpus linguistics, critical discourse analysis, Geographical Information Science, and the spatial humanities. By identifying the place-names that occur within close proximity to search terms associated with poverty it shows how different newspapers use place to foreground different aspects of poverty (including employment, housing, money, and benefits), and how the London-centric nature of newspaper reporting dominates the discursive construction of UK poverty. This book demonstrates how interdisciplinary research methods can illuminate complex social issues and will appeal to researchers in a number of disciplines from sociology, geography and the spatial humanities,

economics, linguistics, health, and public policy, in addition to policymakers and practitioners.

Researching Digital Life James Ash, Rob Kitchin, Agnieszka Leszczynski, 2024-03-15 We now live in a world where all aspects of everyday life are thoroughly mediated by digital technologies. Making sense of digital life is accordingly an essential undertaking for social science and humanities scholars. This multidisciplinary book provides an essential guide to researching digital life: Orienting readers with respect to methodologies, research design, and research ethics. Detailing key research methods, including interviews, surveys, ethnographies, walking methodologies, arts-based and participatory approaches, historical analysis, data visualisation, mapping and data analytics. Demonstrating these methods in action in real-world studies that have investigated apps and interfaces, social and locative media, mobilities, smart cities, and digital labour and work. The authors provide:

- Non-Eurocentric perspectives and case studies from diverse disciplines
- Annotated further reading to help you situate your research alongside existing research in your field
- An outline of future directions for researching digital life.

Accessible in style and richly illustrated, the chapters provide a wealth of key insights and

practical information to ensure research projects are successfully planned and implemented.

Financial Services Marketing Christine Ennew, Nigel

Waite, Roisin Waite, 2013-07-18 This new edition balances the theoretical and the practical for advanced undergraduates, those specialising in financial services at postgraduate level, individuals undertaking professional courses such as those offered by the IFS School of Finance, and employees working within the financial services sector. Ennew & Waite draw from global business cases in both B2B and B2C marketing, taking a unique approach in terms of structure by splitting discussion between marketing for acquisition and marketing for retention. This fully updated and revised second edition features: A revised approach to the industry in the light of the global financial crisis, including ethical considerations, consumer confidence issues, and new approaches

to regulation New sections on e-commerce and its impact on customer relationships New case studies and vignettes A new companion website to support teaching, including PowerPoint slides, test bank questions, additional cases and cameo video mini-lectures. Financial Services Marketing 2e will help the student and the practitioner to develop a firm grounding in the fundamentals of financial services strategy, customer acquisition and customer development. Reflecting the realities of financial services marketing in an increasingly complex sector, it provides the most up-to-date, international and practical guide to the subject available.

Marketing Communications John Egan, 2014-10-13 How many marketing messages do you think you see a day? Why do some stick with us more than others? Why do we all remember the Cadbury's gorilla drummer or the Budweiser Frogs? What do they say about the brand? How will you communicate your own marketing messages just as successfully? In this textbook, John Egan draws on years of both industry and academic experience to explain the why as well as the how of marketing communications. It covers all the essential topics that are relevant to your marketing communications course in a relatable and easy-to-read style. 'Insight' boxes provide insight into some of the latest industry

practices, and with engaging examples ranging from HSBC to James Bond, to the Arab Spring and One Direction, this textbook will not only provide you with a solid foundation for working in ‘marcoms’; it will make your study fun along the way. For those looking to get ahead of their classmates and other job candidates, the textbook includes coverage of topical issues such as new technologies, ethical marketing and the regulatory environment to help you consider some of the cutting edge debates for assignments and future employment. There is also a companion website with additional study materials to help you go one further and stay ahead of the pack: study.sagepub.com/egan This textbook is essential reading for all marketing communications courses at undergraduate and postgraduate levels as well as professional courses in Marketing.

The Social Power of Algorithms David Beer, 2019-10-23 The vast circulations of mobile devices, sensors and data mean that the social world is now defined by a complex interweaving of human and machine agency. Key to this is the growing power of algorithms – the decision-making parts of code – in our software dense and data rich environments. Algorithms can shape how we are retreated, what we know, who we connect with and what we

encounter, and they present us with some important questions about how society operates and how we understand it. This book offers a series of concepts, approaches and ideas for understanding the relations between algorithms and power. Each chapter provides a unique perspective on the integration of algorithms into the social world. As such, this book directly tackles some of the most important questions facing the social sciences today. This book was originally published as a special issue of Information, Communication & Society.
