Word Chains EBook Joan Westley,2009-02

Making the Most of Small Groups Debbie Diller,2007 In her previous books, Literacy Work Stations and Practice with Purpose, Debbie Diller showed teachers how to productively occupy the rest of the class while meeting with small groups. Now Debbie turns her attention to the groups themselves and the teacher's role in small-group instruction. Making the Most of Small Groups grapples with difficult questions regarding small-group instruction in elementary classrooms such as: How do I find the time? How can I be more organized?How do I form groups? How can I differentiate to meet the needs of all of my students? Structured around the five essential reading elements--comprehension, fluency, phonemic awareness, phonics, and vocabulary--the book provides practical tips, sample lessons, lesson plans and templates, suggestions for related literacy work stations, and connections to whole-group instruction. In addition to ideas to use immediately in the classroom, Debbie provides an overview of relevant research and reflection questions for professional conversations.

Dyslexia: From Theory to Intervention Torleiv Høien,I. Lundberg,2013-03-14 Dyslexia research has been proceeding by quantum leaps. Great advances have been made in the past few years, and while many unanswered questions remain, we nonetheless do know a great deal about the causes and nature of the condition, and how teachers should treat it. This book, by two of Europe's leading experts, gathers together a vast amount of recent international research on the causes and remediation of dyslexia, and presents a cognitive model of the normal reading process and a process-analytic diagnostic model. Much of this material appears in English for the first time.

Applied Algebra, Algebraic Algorithms and Error-Correcting Codes Teo Mora,1997-06-11 This book constitutes the strictly refereed proceedings of the 12th International Symposium on Applied Algebra, Algebraic Algorithms and Error-Correcting Codes, AAECC-12, held in Toulouse, France, June 1997. The 27 revised full papers presented were carefully selected by the program committee for inclusion in the volume. The papers address a broad range of current issues in coding theory and computer algebra spanning polynomials, factorization, commutative algebra, real geometry, group theory, etc. on the mathematical side as well as software systems, telecommunication, complexity theory, compression, signal processing, etc. on the computer science and engineering side.

Becoming a Reading Teacher Jane Spiro,Amos Paran,2023-04-10 This book encourages readers to think about reading not only as an encounter with written language, but as a lifelong habit of engagement with ideas. We look at reading in four different ways: as linguistic process, personal experience, collective experience, and as classroom practice. We think about how reading influences a life, how it changes over time, how we might return at different stages of life to the same reading, how we might respond differently to ideas read in an L1 and L2. There are 44 teaching activities, all founded on research that explores the nature, value and impact of reading as an authentic activity rather than for language or study purposes alone. We consider what this means for schools and classrooms, and for different kinds of learners. The final part of the book provides practical stepping stones for the teacher to become a researcher of their own classes and learners. The four parts of the book offer a virtuous join between reading, teaching and researching. It will be useful for any teacher or reader who wishes to refresh their view of how reading fits in to the development of language and the development of a reading life.

An Appeal from the Absurdities and Contradictions which Prevade, and Deform the Old Theory of English Grammar, to the True Constructive Principles of the English Language James Brown (Grammarians),1850

Focusing on EFL Reading Rahma Al-Mahrooqi,Adrian Roscoe,2014-06-02 Reading, a complex and multi-faceted skill, is essential for life and academic success. While its mysteries still baffle first-language research, the nature of reading in a foreign language presents an even greater puzzle. However, given reading's importance for EFL students who study their specializations in English, and whose future employment may depend on their competence in it, researchers must continue to investigate foreign language reading and devise ways of improving students' capacity for it. Hence, this book, with its thorough coverage of up-to-date theory, practice and research, will be of great value in today's educational context. As they strive to understand reading and help EFL students to acquire it, researchers and language teachers will find much of value here.

Towards a History of Linguistics in Poland E. F. K. Koerner,A. J. Szwedek,2001 Apart from the names of Jan Baudouin de Courtenay (1845 1929), Miko?aj Kruszewski (1851 1887), and, later, Jerzy Kury?owicz (1895 1978), Polish linguists and Polish linguistics generally have been little known in the West. The first two were mentioned with approval by Saussure in an unpublished paper, and this reference was picked up by Roman Jakobson and others many years later. Kury?owicz, for his part, made himself well known in the West through his important work as Indo-Europeanist, even Semiticist, and as a general linguist.The present volume is a first attempt to broaden the perspectives on the Polish contribution to linguistics both inside and outside of Poland during the past centuries. Specialists in their respective fields contributed chapters on the origins and development of general linguistics (Z. W?sik), applied linguistics (F. Grucza), lexicology (T. Piotrowski), dialectology (St. Gogolewski), and onomastics (S. Gala), followed by five chapters presenting the theories of the arguably most remarkable Polish linguistic thinkers, from Baudouin de Courtenay (A. Adamska-Sa?aciak), Kruszewski (F. M. Berezin), and Kury?owicz (W. Smoczy?ski) to Miko?aj Rudnicki (1881 1978) and Ludwik Zabrocki (1907 1977) (both written by J. Ba?czerowski).Detailed individual bibliographies, a full index of names (with life dates of Polish linguists from the Renaissance to the present day), and a thorough index of subjects and terms make this volume an important reference tool for anyone wishing to acquaint himself with the rich heritage of Polish linguistic thought.

Neural Information Processing Tom Gedeon,Kok Wai Wong,Minho Lee,2019-12-10 The three-volume set of LNCS 11953, 11954, and 11955 constitutes the proceedings of the 26th International Conference on Neural Information Processing, ICONIP 2019, held in Sydney, Australia, in December 2019. The 173 full papers presented were carefully reviewed and selected from 645 submissions. The papers address the emerging topics of theoretical research, empirical studies, and applications of neural information processing techniques across different domains. The third volume, LNCS 11955, is organized in topical sections on semantic and graph based approaches; spiking neuron and related models; text computing using neural techniques; time-series and related models; and unsupervised neural models.
