*A Bibliography on Writing and Written Language* Konrad Ehlich,Florian Coulmas,Gabriele Graefen,2011-06-01 The bibliography offers information on research about writing and written language over the past 50 years. No comprehensive bibliography on this subject has been published since Sattler's (1935) handbook. With a selection of some 27,500 titles it covers the most important literature in all scientific fields relating to writing. Emphasis has been placed on the interdisciplinary organization of the bibliography, creating many points of common interest for literacy experts, educationalists, psychologists, sociologists, linguists, cultural anthropologists, and historians. The bibliography is organized in such a way as to provide the specialist as well as the researcher in neighboring disciplines with access to the relevant literature on writing in a given field. While necessarily selective, it also offers information on more specialized bibliographies. In addition, an overview of norms and standards concerning 'script and writing' will prove very useful for non-professional readers. It is, therefore, also of interest to the generally interested public as a reference work for the humanities.
