Word Myths David Wilton, 2008-11-06 Do you know that posh comes from an acronym meaning port out, starboard home? That the whole nine yards comes from (pick one) the length of a WWII gunner's belt; the amount of fabric needed to make a kilt; a sarcastic football expression? That Chicago is called The Windy City because of the bloviating habits of its politicians, and not the breeze off the lake? If so, you need this book. David Wilton debunks the most persistently wrong word histories, and gives, to the best of our actual knowledge, the real stories behind these perennially mis-etymologized words. In addition, he explains why these wrong stories are created, disseminated, and persist, even after being corrected time and time again. What makes us cling to these stories, when the truth behind these words and phrases is available, for the most part, at any library or on the Internet? Arranged by chapters, this book avoids a dry A-Z format. Chapters separate misetymologies by kind, including The Perils of Political Correctness (picnics have nothing to do with lynchings), Posh, Phat Pommies (the problems of backronyming--the desire to make every word into an acronym), and CANOE (which stands for the Conspiracy to Attribute Nautical Origins to Everything). Word Myths corrects long-held and far-flung examples of wrong etymologies, without taking the fun out of etymology itself. It's the best of both worlds: not only do you learn the many wrong stories behind these words, you also learn why and how they are created--and what the real story is.

The Word on the Street Stanley P. Saunders, Charles L. Campbell, 2006-09-01 WHAT HAPPENS WHEN TWO SEMINARY PROFESSORS LEAVE their classrooms and spend time among the homeless people and teach on city streets? In this unique collection of essays and sermons, Stanley P. Saunders and Charles L. Campbell reflect on their encounters with the homeless folks in Atlanta and seek to discern the way of Jesus on the streets of the city. These passionate, often moving writings demonstrate the power of Scripture to shape the way we see the world, and they explore the significance of social location for exegesis, ethics, worship, and preaching. From the perspective of the street, central Christian practices such as baptism, Eucharist, and preaching come to life in new ways. Scripture takes on fresh meaning too, while ancient insights into the principalities and powers, the practice of scapegoating, and the organization of households become contemporary and immediate. Even theological themes--grace and discipleship, sin and forgiveness, crucifixion and resurrection--look different when taken to the street. Accented by six powerful artworks from Christina Bray's exhibit Street Prayers/Spiritual Journeys, this book also sheds light on the problem of homelessness in America and calls the church to action. Through their reflection on personal experiences and their interpretation of biblical texts, Saunders and Campbell provide meaningful theological categories for addressing pressing social issues in the urban context, making *The Word on the Street* a helpful resource on the realities of poverty, race, and injustice.

Suburban Planet Roger Keil, 2017-12-01 The urban century manifests itself at the peripheries. While the massive wave of present urbanization is often referred to as an 'urban revolution', most of this startling urban growth worldwide is happening at the margins of cities. This book is about the process that creates the global urban periphery - suburbanization - and the ways of life - suburbanisms - we encounter there. Richly detailed with examples from around the world, the book argues that suburbanization is a global process and part of the extended urbanization of the planet. This includes the gated communities of elites, the squatter settlements of the poor, and many built forms and ways of life in-between. The reality of life in the urban century is suburban: most of the

earth's future 10 billion inhabitants will not live in conventional cities but in suburban constellations of one kind or another. Inspired by Henri Lefebvre's demand not to give up urban theory when the city in its classical form disappears, this book is a challenge to urban thought more generally as it invites the reader to reconsider the city from the outside in.

Better slow down, the po-po are cruiser spooning in the parking lot ahead.

Placing Words William J. Mitchell, 2005-08-26 Reflections on architecture and the exchange of information in the spaces and places of the city, from the necessity of skyscrapers in an age of Web sites to cities as talent magnets, from architectural bling to the neo-minimalism of the new MoMA. The meaning of a message, says William Mitchell, depends on the context of its reception. Shouting 'fire' in a crowded theater produces a dramatically different effect from barking the same word to a squad of soldiers with guns, he observes. In *Placing Words*, Mitchell looks at the ways in which urban spaces and places provide settings for communication and at how they conduct complex flows of information through the twenty-first century city. Cities participate in the production of meaning by providing places populated with objects for words to refer to. Inscriptions on these objects (labels, billboards, newspapers, graffiti) provide another layer of meaning. And today, the flow of digital information—from one device to another in the urban scene—creates a digital network that also exists in physical space. *Placing Words* examines this emerging system of spaces, flows, and practices in a series of short essays—snapshots of the city in the twenty-first century. Mitchell questions the necessity of flashy downtown office towers in an age of corporate Web sites. He casts the shocked-and-awed Baghdad as a contemporary Guernica. He describes architectural makeovers throughout history, listing Le Corbusier's Fab Five Points of difference between new and old architecture, and he discusses the architecture of Manolo Blahniks. He pens an open letter to the Secretary of Defense recommending architectural features to include in torture chambers. He compares Baudelaire, the Parisian flaneur, to Spiderman, the Manhattan traceur. He describes the iPod-like galleries of the renovated MoMA and he recognizes the camera phone as the latest step in a process of image mobilization that began when artists stopped painting on walls and began making pictures on small pieces of wood, canvas, or paper. The endless flow of information, he makes clear, is not only more pervasive and efficient than ever, it is also generating new cultural complexities.

What a Waste 2.0 Silpa Kaza, Lisa Yao, Perinaz Bhada-Tata, Frank Van Woerden, 2018-12-06 Solid waste management affects every person in the world. By 2050, the world is expected to increase waste generation by 70 percent, from 2.01 billion tonnes of waste in 2016 to 3.40 billion

tonnes of waste annually. Individuals and governments make decisions about consumption and waste management that affect the daily health, productivity, and cleanliness of communities. Poorly managed waste is contaminating the world's oceans, clogging drains and causing flooding, transmitting diseases, increasing respiratory problems, harming animals that consume waste unknowingly, and affecting economic development. Unmanaged and improperly managed waste from decades of economic growth requires urgent action at all levels of society. What a Waste 2.0: A Global Snapshot of Solid Waste Management to 2050 aggregates extensive solid waste data at the national and urban levels. It estimates and projects waste generation to 2030 and 2050. Beyond the core data metrics from waste generation to disposal, the report provides information on waste management costs, revenues, and tariffs; special wastes; regulations; public communication; administrative and operational models; and the informal sector. Solid waste management accounts for approximately 20 percent of municipal budgets in low-income countries and 10 percent of municipal budgets in middle-income countries, on average. Waste management is often under the jurisdiction of local authorities facing competing priorities and limited resources and capacities in planning, contract management, and operational monitoring. These factors make sustainable waste management a complicated proposition; most low- and middle-income countries, and their respective cities, are struggling to address these challenges. Waste management data are critical to creating policy and planning for local contexts. Understanding how much waste is generated—especially with rapid urbanization and population growth—as well as the types of waste generated helps local governments to select appropriate management methods and plan for future demand. It allows governments to design a system with a suitable number of vehicles, establish efficient routes, set targets for diversion of waste, track progress, and adapt as consumption patterns change. With accurate data, governments can realistically allocate resources, assess relevant technologies, and consider strategic partners for service provision, such as the private sector or nongovernmental organizations. What a Waste 2.0: A Global Snapshot of Solid Waste Management to 2050 provides the most up-to-date information available to empower citizens and governments around the world to effectively address the pressing global crisis of waste. In The Post-Urban World Tigran Haas, Hans Westlund, 2017-10-16 Winner of the Regional Studies Association's Best Book Award 2018. In the last few decades, many global cities and towns have experienced unprecedented economic, social, and spatial structural change. Today, we find ourselves at the juncture between entering a post-urban and a post-political world, both presenting new challenges to our metropolitan regions, municipalities, and cities. Many megacities, declining regions and towns are experiencing an increase in the number of complex problems regarding internal relationships, governance, and external connections. In particular, a growing disparity exists between citizens that are socially excluded within declining physical and economic realms and those situated in thriving geographic areas. This book conveys how forces of structural change shape the urban landscape. *In The Post-Urban World* is divided into three main sections: Spatial Transformations and the New Geography of Cities and Regions; Urbanization, Knowledge Economies, and Social Structuration; and New Cultures in a Post-Political and Post-Resilient World. One important subject covered in this book, in addition to the spatial and economic forces that shape our regions, cities, and neighbourhoods, is the social, cultural, ecological, and psychological aspects which are also critically involved. Additionally, the urban transformation occurring throughout cities is thoroughly discussed. Written by today's leading experts in urban studies, this book discusses subjects from different theoretical standpoints, as well as various methodological approaches and perspectives; this is alongside the challenges and new solutions for cities and regions in an interconnected world of global economies. This book is aimed at both academic researchers

interested in regional development, economic geography and urban studies, as well as practitioners and policy makers in urban development.

Cities of the World Stanley D. Brunn, Maureen Hays-Mitchell, Donald J. Zeigler, 2012

Remarkably, more than half of the world's population now lives in cities, and the numbers grow daily as people abandon rural areas. This fully updated and revised fifth edition of the classic text offers readers a comprehensive set of tools for understanding the urban landscape, and, by extension, the world's politics, cultures, and economies. Providing a sweeping overview of world urban geography, a group of noted experts explores the eleven major global regions. Each author presents the region's urban history, economy, culture, and society, as well as urban spatial models and problems and prospects. Environmental, human security, globalization, and cyberspace topics are fully developed as well. Vignettes of seventy-eight key cities give the reader a vivid understanding of daily life and the spirit of place. An introductory chapter presents an overview of key terms and concepts, and a concluding chapter projects the world's urban future. Liberally illustrated with a new selection of photographs, maps, and diagrams, the text also includes a rich array of textboxes to highlight key topics ranging from gender and the city to Islamic fashion and global warming. Bibliographic sources, websites, and an appendix of UN data provide additional resources for helping students understand more about the urban world. Clearly written and timely, *Cities of the World* will be invaluable for those teaching introductory or advanced classes on global cities, regional geography, and urban studies. The City James A. Clapp, 2017-07-12 The City is the best, funniest, saddest, and most thought-provoking compilation ever assembled on the urban scene. James A. Clapp has arranged more than three thousand quotations—epigrams, epithets, verses, proverbs, scriptural references, witticisms, lyrics, literary references, and historical observations—on urban life from antiquity until the present. These quotes are drawn from the written and spoken words of more than one thousand writers throughout history. This volume, with contributions from speakers, poets, song writers, politicians, philosophers, scientists, religious leaders, historians, social scientists, humorists, architects, journalists, and travelers from and to many lands is designed to be used by writers, speechmakers, students, and scholars on cities and urban life. Clapp's text is striking for its sharp contrasts of urban and rural life and the urbanization process in different historical times and geographical areas. This second edition includes four hundred new entries, updated birth dates and occupations of quoted authors, and an expanded and updated introduction and preface. Clapp also added new introduction pages for each section containing pictures and unique quotations. The indexes have also been expanded to include more subjects and cities. The scope of this book is international, including entries on most major and many minor cities of the world. It is noteworthy for its pleasures as well as its insights.

The Urban World J. John Palen, 1987 This text presents a cross-cultural look at cities and suburbs around the world. It offers an overview of the changing urban scene, covering evolving patterns and the changing nature of urban life. It provides coverage of women in metropolitan areas.

Writing in Rhythm Maisha T. Fisher, 2007 "In this book, Maisha Fisher invites us to pull up a chair and listen in as young people insert their own rhythms into school life. . . . But this book is not a simple celebration of student voice. It is an ethnographic account of the teaching and learning processes through which lived (or longed-for) experience was disciplined into verbal rhythms." —From the Foreword by Anne Haas Dyson, University of Illinois-Urbana/Champaign, author of *The Brothers and Sisters Learn to Write* "Prepare to rethink the role of popular youth culture in the classroom. This work demonstrates some of the most respected theories of learning put into action through the roles and rules of young people's poetry. We leave this work alive and alert to ways that

youth culture can transcend generations, everyday identities, and life disruptions.” —Shirley Brice Heath, Professor at Large, Brown University This dynamic book examines how literacy learning can be expanded and redefined using the medium of spoken word poetry. The author tells the story of a passionate Language Arts teacher and his work with The Power Writers, an after-school writing community of Latino and African-American students. Featuring rich portraits of literacy in action, this book introduces teaching practices for fostering peer support, generating new vocabulary, discussing issues of Standard American English, and using personal experiences as literary inspiration. Drawing from literature in both literacy research and cultural studies, this book: Provides a model for incorporating “open mic” formats and the public sharing of reading and writing in literacy classes with urban youth. Shows how teachers can approach teaching with profound respect for student cultures, languages, and life experiences. Offers a new way of talking about literacy with urban high school students, including new terminology generated by the teachers and students. Explores what it means for Language Arts teachers to be “practitioners of the craft.”
