Global Perspectives on Sports and Christianity Afe Adogame, Nick J. Watson, Andrew Parker, 2017-11-09 While the relationship between sport and religion is deeply rooted in history, it continues to play a profound role in shaping modern-day societies. This edited collection provides an inter-disciplinary exploration of this relationship from a global perspective, making a major contribution to the religious, social scientific and theological study of sport. It discusses the dialectical interplay between sport and Christianity across diverse cultures, extending beyond a Western perspective to include studies from Africa, South America and Asia, as well as Europe, the UK and the US. Containing contributions from leading experts within the field, it reflects on key topics including race, gender, spirituality, morality, interfaith sport clubs, and the significance of sport in public rituals of celebration and mourning. Its chapters also examine violent sports such as boxing and mixed martial arts, as well as reflecting on the cult of sporting celebrity and the theology of disability sport. Truly international in scope, *Global Perspectives on Sports and Christianity* is fascinating reading for all those interested in the study of sport, sociology and religion.

Music and Ethics Marcel Cobussen, Nanette Nielsen, 2016-04-22 It seems self-evident that music plays more than just an aesthetic role in contemporary society. In addition, music's social, political, emancipatory, and economical functions have been the subject of much recent research. Given this, it is surprising that the subject of ethics has often been neglected in discussions about music. The various forms of engagement between music and ethics are more relevant than ever, and require sustained attention. *Music and Ethics* examines different ways in which music can 'in itself' - in a uniquely musical way - contribute to theoretical discussions about ethics as well as concrete moral

behaviour. We consider music as process, and music-making as interaction. Fundamental to our understanding is music's association with engagement, including contact with music through the act of listening, music as an immanent critical process that possesses profound cultural and historical significance, and as an art form that can be world-disclosive, formative of subjectivity, and contributive to intersubjective relations. *Music and Ethics* does not offer a general musico-ethical theory, but explores ethics as a practical concept, and demonstrates through concrete examples that the relation between music and ethics has never been absent.

Moments, Metaphors, Memories Kausik Bandyopadhyay, Souvik Naha, 2021-05-13 As the most popular mass spectator sport across the world, soccer generates key moments of significance on and off the field, encapsulated in events that create metaphors and memories, with wider social, cultural, psychological, political, commercial and aesthetic implications. Since its inception as a modern game, the history of soccer has been replete with events that have changed the organization, meanings and impact of the sport. The passage from the club to the nation or from the local to the global often opens up transnational spaces that provide a context for studying the events that have 'defined' the sport and its followers. Such defining events can include sporting performances, decisions taken by various stakeholders of the game, accidents and violence among players and fans, and invention of supporter cultures, among other things. The present volume attempts to document, identify and analyse some of the defining events in the history of soccer from interdisciplinary and comparative perspectives. It revisits the discourses of signification and memorialization of such events that have influenced society, culture, politics, religion, and commerce. This book was originally published as a special issue of the journal *Soccer & Society*.

SamulNori: Korean Percussion for a Contemporary World Keith Howard, 2016-03-09 SamulNori is a percussion quartet which has given rise to a genre, of the same name, that is arguably Korea's most successful 'traditional' music of recent times. Today, there are dozens of amateur and professional samulnori groups. There is a canon of samulnori pieces, closely associated with the first founding quartet but played by all, and many creative evolutions on the basic themes, made by the rapidly growing number of virtuosic percussionists. And the genre is the focus of an abundance of workshops, festivals and contests. Samulnori is taught in primary and middle schools; it is part of Korea's national education curriculum. It has dedicated institutes, and there are a number of workbooks devoted to helping wannabe 'samulnorians'. It is a familiar part of Korean performance culture, at home and abroad, in concerts but also in films and theatre productions. SamulNori uses four instruments: kkwaenggwari and ching small and large gongs, and changgo and puk drums. These are the instruments of local percussion bands and itinerant troupes that trace back many centuries, but samulnori is a recent development of these older traditions: it was first performed in February 1978. This volume explores this vibrant percussion genre, charting its origins and development, the formation of the canon of pieces, teaching and learning strategies, new evolutions and current questions relating to maintaining, developing, and sustaining samulnori in the future.
