Stephanie Clair Price

UNESCO World Heritage Atlas Unesco,2012 The understanding and preservation of natural and cultural heritage is not only a task for experts but the daily contribution of the general public who visit and have an effect on World Heritage sites. To celebrate the 40th anniversary of the World Heritage Convention, UNESCO and DeAgostini Libri will present a first-time atlas featuring all World Heritage sites, including those inscribed in 2012. This atlas will present color maps for each region of the world; beautiful fold-out maps with enlarged areas featuring detailed information and color images of the sites located in them; and an index of site names and descriptions.

From Space to Place Roger Sayre,Unesco,2011-01-01 Textual, photographic and satellite image information is provided for each site depicted in the atlas. The details of a site's inscription into the World Heritage's list are given, along with a brief description by the cultural or natural values for which the site was inscribed. The threats of the site are then described, followed by a brief explanation what is discernible in the satellite imagery that was selected for each site. The 'stories' told in the satellite imagery provide numerous examples of the utility of satellite imagery analysis for World Heritage site management. In certain cases, the main threats that place a World Heritage site in danger are not identifiable in the satellite imagery. In these cases, we have selected imagery which provides an improvement in the general understanding of that site.

They include natural sites such as the Grand Canyon and the Great Barrier and cultural ones such as the Pyramids at Giza, the Walled City of Baku in Azerbaijan and the Historic Centre of Riga in Latvia. World Heritage Conservation in the Pacific Stephanie Clair Price, 2018-07-20
 □ This book explores the opportunities and challenges associated with the legal protection of World Heritage sites in the Pacific Islands. It argues that the small Pacific representation on the World Heritage List is in part due to a lack of strong legal frameworks for heritage conservation, putting such sites under threat. Providing a comprehensive analysis of the nomination, listing and protection of the Solomon Island World Heritage Site, it examines the implementation of the World Heritage Convention in the Pacific context. It explores how the international community's broadening interpretation of the notion of 'outstanding universal value' has increased the potential for Pacific heritage to be classified as 'World Heritage'. This book also analyses the protection regime established by the Convention, and the World Heritage Committee's approach to heritage conservation, identifying challenges associated with the protection of Pacific Island heritage.
