1001 Inventions That Changed the World Jack Challoner, 2022-04-12 The history of the world through 1,001 inventions—from prehistoric times to the present day. 1001 Inventions That Changed the World is an enthralling guide to the world's most important scientific and technological advances. Authoritatively written by a team of historians, scientists, and anthropologists, this book tells the stories behind these innovations, presenting a comprehensive history of the world through invention and discovery. From stone tools and fire at the dawn of humankind to today's self-driving cars, inventions have moved society forward at a remarkable pace. This informative volume shows just how much some of the inventions that we take for granted have transformed the world.

Cyberculture: The Key Concepts David J. Bell, Brian D Loader, Nicholas Pleace, Douglas Schuler, 2004-07-31 The only A-Z guide available on this subject, this book provides a wide-ranging and up-to-date overview of the fast-changing and increasingly important world of cyberculture. Its clear and accessible entries cover aspects ranging from the technical to the theoretical, and from movies to the everyday, including: artificial intelligence cyberfeminism cyberpunk electronic government games HTML Java netiquette piracy. Fully cross-referenced and with suggestions for further reading, this comprehensive guide is.

The Body and the Screen Michele White, 2006 White shows that despite the onscreen promise of empowerment and coherence (through depictions of materiality that structure the experience), fragmentation and confusion are constant aspects of Internet spectatorship.--BOOK JACKET.

How Does a Network Work? Matt Anness, 1900-01-01 There were communications networks long before the advent of social networking sites like Facebook and Twitter. In fact, modern computer networks—whether on a website, college campus, or just in your home—stem from technology used to create the first telephone networks, and later, television networks. Readers will appreciate the history behind communications networking while learning how today's networks connect people. Colorful photographs accompany accessible information about LANs, WiFi, and more, and interesting sidebars further explain the networks we rely on every day.

The Webcam as an Emerging Cinematic Medium Paula Albuquerque, 2018 All the world's a stage - literally so, given the ubiquitous presence of webcams recording daily life in cities. This footage, allegedly documentary, recreates cities as cinematic environments as people interact with the multitudes of cameras and screens around them. Paula Albuquerque's original research and experimental films, presented in this groundbreaking book, expose fictionalising elements in archival webcams and explore video surveillance as an urban condition that influences both perceptions of the past and visions of the future.

Beyond Webcams Ken Goldberg, Roland Siegwart, 2002 The design, function, and challenges of online telerobotic systems. Remote-controlled robots were first developed in the 1940s to handle radioactive materials. Trained experts now use them to explore deep in sea and space, to defuse bombs, and to clean up hazardous spills. Today robots can be controlled by anyone on the Internet. Such robots include cameras that not only allow us to look, but also go beyond Webcams: they enable us to control the telerobots' movements and actions. This book summarizes the state of the art in Internet telerobots. It includes robots that navigate undersea, drive on Mars, visit museums, float in blimps, handle protein crystals, paint pictures, and hold human hands. The book describes eighteen systems, showing how they were designed, how they function online, and the engineering challenges they meet.

1001 Computer Words You Need to Know Jerry Pournelle, 2004 Defines the essential vocabulary of computers and the Internet, with more than one thousand entries, each with a sample sentence and supplementary notes, that cover everything from operating systems and software applications.

Shooting the Family Patricia Pisters, Wim Staat, 2005 Shooting the Family, a collection of essays on the contemporary media landscape, explores ever-changing representations of family life on a global scale. The contributors argue that new recording technologies allows families an unusual kind of freedom—until now unknown—to define and respond to their own lives and memories. Recently released videos made by young émigrés as they discover new homelands and resolve conflicts with their parents, for example, reverberate alongside the dark portrayals of family life in the formal filmmaking of Ang Lee. This book will be a boon to scholars of film theory and media studies, as well as to anyone interested in the construction of the family in a postmodern world.

The Cybercities Reader Stephen Graham, 2004 Bringing together a vast range of debates and examples of city changes based on Information and Communications Technology (ICT), this book illustrates how new media in cities shapes societies, economies and cultures.

The Robot in the Garden Ken Goldberg, 2001-08-24 An interdisciplinary collection of essays on telepistemology—the study of knowledge acquired at a distance. The Robot in the Garden initiates a critical theory of telerobotics and introduces telepistemology, the study of knowledge acquired at a distance. Many of our most influential technologies, the telescope, telephone, and television, were developed to provide knowledge at a distance. Telerobots, remotely controlled robots, facilitate action at a distance. Specialists use telerobots to explore actively environments such as Mars, the Titanic, and Chernobyl. Military personnel increasingly employ reconnaissance drones and telerobotic missiles. At home, we have remote controls for the garage door, car alarm, and television (the latter a remote for the remote). The Internet dramatically extends our scope and reach. Thousands of cameras and robots are now accessible online. Although the role of technical mediation has been of interest to philosophers since the seventeenth century, the Internet forces a reconsideration. As the public gains access to telerobotic instruments previously restricted to scientists and soldiers, questions of mediation, knowledge, and trust take on new significance for everyday life. Telerobotics is a mode of representation. But representations can misrepresent. If Orson Welles's War of the Worlds was the defining moment for radio, what will be the defining moment for the Internet? As artists have always been concerned with how representations provide us with knowledge, the book also looks at telerobotics' potential as an artistic medium. The seventeen essays, by leading figures in philosophy, art, history, and engineering, are organized into three sections: Philosophy; Art, History, and Critical Theory; and Engineering, Interface, and System Design. Contributors: Albert Borgmann, Tom Campanella, John Canny, Judith Donath, Hubert Dreyfus, Ken Goldberg, Alvin Goldman, Oliver Grau, Marina Gržinić, Blake Hannaford, Michael Idinopulos, Martin Jay, Eduardo Kac, Machiko Kusahara, Jeff Malpas, Lev Manovich, Maurice Merleau-Ponty, Eric Paulos, Catherine Wilson

Encyclopedia of New Media Steve Jones, 2002-12-10 Edited by Steve Jones, one of the leading scholars and founders of this emerging field, and with contributions from an international group of scholars as well as science and technology writers and editors, the Encyclopedia of New Media widens the boundaries of today's information society

through interdisciplinary, historical, and international coverage. With such topics as broadband, content filtering, cyberculture, cyberethics, digital divide, freenet, MP3, privacy, telemedicine, viruses, and wireless networks, the Encyclopedia will be an indispensable resource for anyone interested or working in this field. Unlike many encyclopedias that provide short, fragmented entries, the Encyclopedia of New Media examines each subject in depth in a single, coherent article. Many articles span several pages and are presented in a large, double-column format for easy reading. Each article also includes the following: A bibliography Suggestions for further reading Links to related topics in the Encyclopedia Selected works, where applicable Entries include: Pioneers, such as Marc Andreessen, Marshall McLuhan, and Steve Jobs Terms, from Access to Netiquette to Web-cam Technologies, including Bluetooth, MP3, and Linux Businesses, such as Amazon.com Key labs, research centers, and foundations Associations Laws, and much more The Encyclopedia of New Media includes a comprehensive index as well as a reader's guide that facilitates browsing and easy access to information. Unspun Thomas Swiss, 2001 Visit the Unspun website which includes Table of Contents and the Introduction. The World Wide Web has cut a wide path through our daily lives. As claims of the Web changes everything suffuse print media, television, movies, and even presidential campaign speeches, just how thoroughly do the users immersed in this new technology understand it? What, exactly, is the Web changing? And how might we participate in or even direct Web-related change? Intended for readers new to studying the Internet, each chapter in Unspun addresses a different aspect of the web revolution--hypertext, multimedia, authorship, community, governance, identity, gender, race, cyberspace, political economy, and ideology--as it shapes and is shaped by economic, political, social, and cultural forces. The contributors particularly focus on the language of the Web, exploring concepts that are still emerging and therefore unstable and in flux. Unspun demonstrates how the tacit assumptions behind this rhetoric must be examined if we want to really know what we are saying when we talk about the Web. Unspun will help readers more fully understand and become critically aware of the issues involved in living, as we do, in a wired society. Contributors include: Jay Bolter, Sean Cubitt, Jodi Dean, Dawn Dietrich, Cynthia Fuchs, Matthew Kirschenbaum, Timothy Luke, Vincent Mosco, Lisa Nakamura, Russell Potter, Rob Shields, John Sloop, and Joseph Tabbi.
