**Modal Matters** Phillip Bricker, 2020-02-27 Drawing together his work from four decades, Phillip Bricker provides a comprehensive account of modal reality - the realm of possible worlds - from a Humean perspective, with excursions into neighboring topics in metaphysics. Many of the chapters in this volume focus on aspects of David Lewis's metaphysics and his defence of modal realism, sometimes further developing and defending Lewis's views, sometimes deviating from them in substantial ways. The volume is presented in four parts: part one sketches an account of reality as a whole, both the mathematical and the modal, defending a form of plenitudinous realism; part two presents and defends a realist theory of concrete possible worlds with an absolute ontological distinction between the actual and the merely possible; part three presents and defends a Humean account of modal plenitude, formulating and endorsing principles that guarantee a plenitude of recombination, of possible structures, and of alien contents; and part four applies the Humean account to truthmaking, mereology, spacetime, and quantities. An uncompromising Humean, Bricker shows that holding fast to Humean strictures leads to views that differ in radical ways from those prevalent among contemporary metaphysicians.

**Reality and Humean Supervenience** Gerhard Preyer, Frank Siebelt, 2002-07-15 Reality and Humean Supervenience confronts the reader with central aspects in the philosophy of David Lewis, whose work in ontology, metaphysics, logic, probability, philosophy of mind, and language articulates a unique and systematic foundation for modern physicalism.

**Science and Necessity** John Bigelow, Robert Pargetter, 1990 This book espouses an innovative theory of scientific realism in which due weight is given to mathematics and logic. The authors argue that mathematics can be understood realistically if it is seen to be the study of universals, of properties and relations, of patterns and structures, the kinds of things which can be in several places at once. Taking this kind of scientific platonism as their point of departure, they show how the theory of universals can account for probability, laws of nature, causation, and explanation, and explore the consequences in all these fields. This will be an important book for all philosophers of science, logicians, and metaphysicians, and their graduate students. The readership will also include those outside philosophy interested in the interrelationship of philosophy and science.

We Are a Family 3 Bob Traley, 2011-11-15 The We Are A Family series IS NOT about any rich or famous people. It IS a factual account of how ONE FAMILY is living out the Christian life of the Creator's processes of JUSTIFICATION, SANTIFICATION, and eventual GLORIFICATION. His desire and love for us, along with His gift of FREE WILL, causes each of us to live a life on Earth of ups and downs, daily, weekly, monthly, and yearly. Each of these experiences allow us to either grow closer to Him through PRAISE and THANKSGIVING or farther from Him by SELF GLORIFICATION of our successes and BLAME of Him for our tribulations. Part 1 covers the years 1873-1975. Part 2 covers 1976-1982. Part 3 covers 1983-1988. It is hoped that the book will inspire the reader to record a similar collection of successes and failures of their own family members as a LEGACY for future generations. Bob began his Tour of Earth in Kingston, NY in 1932. After High School the U.S. Navy provided him with both educational and experiential knowledge. His adult life with various Fortune 500 corporations provided extensive worldwide travel. At the time of Part-3 publication, he and his wife are residing on Hutchinson Island, FL while the children and grandchildren are pursuing their Tour across the U.S.A.

*Shinto, Nature and Ideology in Contemporary Japan* Aike P. Rots, 2017-09-07 Shinto, Nature and Ideology in Contemporary Japan is the first systematic study of Shinto's environmental turn. The book traces the development in recent decades of the idea of Shinto as an 'ancient nature religion,' and a resource for overcoming environmental problems. The volume shows how these ideas gradually achieved popularity among scientists, priests, Shinto-related new religious movements and, eventually, the conservative shrine establishment. Aike P. Rots argues that central to this development is the notion of chinju no mori: the sacred groves surrounding many Shinto shrines. Although initially used to refer to remaining areas of primary or secondary forest, today the term has come to be extended to any sort of shrine land, signifying not only historical and

ecological continuity but also abstract values such as community spirit, patriotism and traditional culture. The book shows how Shinto's environmental turn has also provided legitimacy internationally: influenced by the global discourse on religion and ecology, in recent years the Shinto establishment has actively engaged with international organizations devoted to the conservation of sacred sites. Shinto sacred forests thus carry significance locally as well as nationally and internationally, and figure prominently in attempts to reposition Shinto in the centre of public space.

*God and Necessity* Brian Leftow,2012-09-06 Brian Leftow offers a theory of the possible and the necessary in which God plays the chief role, and a new sort of argument for God's existence. It has become usual to say that a proposition is possible just in case it is true in some 'possible world' (roughly, some complete history a universe might have) and necessary just if it is true in all. Thus much discussion of possibility and necessity since the 1960s has focussed on the nature and existence (or not) of possible worlds. *God and Necessity* holds that there are no such things, nor any sort of abstract entity. It assigns the metaphysical 'work' such items usually do to God and events in God's mind, and reduces 'broadly logical' modalities to causal modalities, replacing possible worlds in the semantics of modal logic with God and His mental events. Leftow argues that theists are committed to theist modal theories, and that the merits of a theist modal theory provide an argument for God's existence. Historically, almost all theist modal theories base all necessary truth on God's nature. Leftow disagrees: he argues that necessary truths about possible creatures and kinds of creatures are due ultimately to God's unconstrained imagination and choice. On his theory, it is in no sense part of the nature of God that normal zebras have stripes (if that is a necessary truth). Stripy zebras are simply things God thought up, and they have the nature they do simply because that is how God thought of them. Thus Leftow's essay in metaphysics takes a half-step toward Descartes' view of modal truth, and presents a compelling theist theory of necessity and possibility.

This second edition adds a substantial section on decision and game theory, as well as a chapter on information theory and the efficient coding of information.

*Necessity and Possibility* Michael Tooley,1999 First published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

**Modality and Meaning** W.G. Lycan,2012-12-06 Part I of this book presents a theory of modal metaphysics in the possible-worlds tradition. 'Worlds' themselves are understood as structured sets of properties; this 'Ersatzist' view is defended against its most vigorous competitors, Meinongianism and David Lewis' theory of existent concrete worlds. Related issues of essentialism and linguistic reference are explored. Part II takes up the question of lexical meaning in the context of possible-world semantics. There are skeptical analyses of analyticity and the notion of a logical constant; and an 'infinite polysemy' thesis is defended. The book will be of particular interest to metaphysicians, possible-world semanticists, philosophers of language, and linguists concerned with lexical semantics.
