A Way to Garden Margaret Roach, 2019-04-30 “A Way to Garden prods us toward that ineffable place where we feel we belong; it’s a guide to living both in and out of the garden.” —The New York Times Book Review For Margaret Roach, gardening is more than a hobby, it’s a calling. Her unique approach, which she calls “horticultural how-to and woo-woo,” is a blend of vital information you need to memorize and intuitive steps you must simply feel and surrender to. In *A Way to Garden*, Roach imparts decades of garden wisdom on seasonal gardening, ornamental plants, vegetable gardening, design, gardening for wildlife, organic practices, and much more. She also challenges gardeners to think beyond their garden borders and to consider the ways gardening can enrich the world. Brimming with beautiful photographs of Roach’s own garden, *A Way to Garden* is practical, inspiring, and a must-have for every passionate gardener.

The Horseless Age, 1903

The Saddle and Show Horse Chronicle, 1921

Notes from the Garden Henry Homeyer, 2003 A hands-on gardener, Henry Homeyer gives practical advice on how to garden, whether building a hot box, transplanting peonies, defeating the deer, growing ladyslipper orchids and shiitake mushrooms, or keeping the birds out of the berry bushes. Each month covers a range of topics relevant to the season: starting seedlings, edging and mulching, gardening with children, getting rid of invasive plants, pruning, planting shrubs for attracting and feeding birds, putting the garden to bed, growing houseplants, . . . These are just a few of Homeyer's 69 short reflections and

observations on matters of interest to amateur, dedicated, and armchair gardeners alike. Homeyer grew up in the 1950s learning about organic gardening from a grandfather who used manure tea and compost, not 10-10-10, herbicides, and DDT. For him, organic gardening is not a political position, but a common sense approach to having the best soil and the healthiest plants. Of special relevance to denizens of zones 3-5, the climatic belt which includes New England and runs across southern Canada and west to the Rockies, each of the twelve chapters (one for each month) contains several pieces combining technical information, practical tips, personal reflections, and more than a little humor. An unusual feature is Homeyer's interviews with other gardeners. Meet Joe Mooney, the aging wizard of turf at Fenway Park. Spend an afternoon in the garden with Jamaica Kincaid. Visit Jean and Wes Cate, growers of heirloom vegetables at Fox Run Farm. Learn more about the White House gardens from chief horticulturist Dale Haney. Or marvel at Marguerite Tewksbury, an 85-year-old organic gardener who single-handedly runs a farm stand, drives her 1950 Ford Ferguson tractor, and weeds her 6,000-square-foot vegetable patch with a full-sized rototiller. She doesn't say that keeping active and eating organically keeps her healthy and vigorous, but I have a feeling that it does, writes Homeyer.

I Can Only Draw Worms Will Mabbitt,2019-03-19 A hilarious picture book in bright, neon colors that is perfect for fans of *The Book With No Pictures* and *The Day the Crayons Quit*. This is part counting book, part introduction to worms, but all superbly silly. The fact that the author/illustrator can only draw worms will not take anything away from the laugh-out-loud adventure readers will have as they turn the pages of this slightly subversive picture book.

"You Are Not Expected to Understand This" Torie Bosch,2022-11-15 Leading technologists, historians, and journalists reveal the stories behind the computer coding that touches all aspects of life—for better or worse Few of us give much thought to computer code or how it comes to be. The very word “code” makes it sound immutable or even inevitable. “You Are Not Expected to Understand This” demonstrates that, far from being preordained, computer code is the result of very human decisions, ones we all live with when we use social media, take photos, drive our cars, and engage in a host of other activities. Everything from

law enforcement to space exploration relies on code written by people who, at the time, made choices and assumptions that would have long-lasting, profound implications for society. Torie Bosch brings together many of today's leading technology experts to provide new perspectives on the code that shapes our lives. Contributors discuss a host of topics, such as how university databases were programmed long ago to accept only two genders, what the person who programmed the very first pop-up ad was thinking at the time, the first computer worm, the Bitcoin white paper, and perhaps the most famous seven words in Unix history: "You are not expected to understand this." This compelling book tells the human stories behind programming, enabling those of us who don't think much about code to recognize its importance, and those who work with it every day to better understand the long-term effects of the decisions they make. With an introduction by Ellen Ullman and contributions by Mahsa Alimardani, Elena Botella, Meredith Broussard, David Cassel, Arthur Daemmrigh, Charles Duan, Quinn DuPont, Claire L. Evans, Hany Farid, James Grimmelmann, Katie Hafner, Susan C. Herring, Syeda Gulshan Ferdous Jana, Lowen Liu, John MacCormick, Brian McCullough, Charlton McIlwain, Lily Hay Newman, Margaret O'Mara, Will Oremus, Nick Partridge, Benjamin Pope, Joy Lisi Rankin, Afsaneh Rigot, Ellen R. When to Jump Mike Lewis, 2018-01-09 "A lively and inspiring guidebook for anyone who wants to make the jump from normal to extraordinary." —Tony Robbins, #1 New York Times bestselling author of *Unshakeable* and *MONEY: Master the Game* An inspirational book that lays out the "Jump Curve"—four steps to wholeheartedly pursuing the career of your dreams—through experiences from a variety of people

who have jumped and never looked back When Mike Lewis was twenty-four and working in a prestigious corporate job, he eagerly wanted to leave and pursue his dream of becoming a professional squash player. But he had questions: When is the right time to move from work that is comfortable to a career you have only dared to dream of? How have other people made such a jump? What did they feel when making that jump—and afterward? Mike sought guidance from others who had “jumped,” and the responses he got—from a banker who started a brewery, a publicist who became a Bishop, a garbage collector who became a furniture designer, and on and on—were so clear-eyed and inspiring that Mike wanted to share what he had learned with others who might be helped by those stories. First, though, he started playing squash professionally. The right book at the right time, *When to Jump* offers more than forty heartening stories (from the founder of Bonobos, the author of *The Big Short*, the designer of the Lyft logo, the *Humans of New York* creator, and many more) and takeaways that will inspire, instruct, and reassure, including the ingenious four-phase Jump Curve.
