Trading Environments Gordon M. Winder,Andreas Dix,2015-12-07 This volume examines dynamic interactions between the calculative and speculative practices of commerce and the fruitfulness, variability, materiality, liveliness and risks of nature. It does so in diverse environments caught up in new trading relationships forged on and through frontiers for agriculture, forestry, mining and fishing. Historical resource frontiers are understood in terms of commercial knowledge systems organized as projects to transform landscapes and environments. The book asks: how were environments traded, and with what environmental and landscape consequences? How have environments been engineered, standardized and transformed within past trading systems? What have been the successes and failures of economic knowledge in dealing with resource production in complex environments? It considers cases from northern Europe, North and South America, Central Africa and New Zealand in the period between 1750 and 1990, and the contributors reflect on the effects of transnational commodity chains, competing economic knowledge systems, environmental ignorance and learning, and resource exploitation. In each case they identify tensions, blind spots, and environmental learning that plagued commercial projects on frontiers.

Lectures on Polytopes Günter M. Ziegler, 2012-05-03 Based on a graduate course at the
Technische Universität, Berlin, these lectures present a wealth of material on the modern theory of
convex polytopes. The straightforward exposition features many illustrations, and complete proofs for
most theorems. With only linear algebra as a prerequisite, it takes the reader quickly from the basics
to topics of recent research. The lectures introduce basic facts about polytopes, with an emphasis on
methods that yield the results, discuss important examples and elegant constructions, and show the
excitement of current work in the field. They will provide interesting and enjoyable reading for
researchers as well as students.
